PART B

11. Instagram is used for sharing photos, videos, and stories-building personal and business branding- promoting products- engaging audiences through reels and lives- supporting influencers- enables communication- marketing- creative expression- community building across diverse user groups.

12. Main function of media -to inform, educate, and entertain the public- disseminates news, shapes opinions, enables public debate- acts as a watchdog-media connects society by providing timely information and supporting democratic participation.

13. Social media platforms- Facebook, Instagram, Twitter, and YouTube- enable communication, content sharing, networking, and community engagement- support information exchange, political mobilization, entertainment, and digital marketing- influencing public opinion and social behaviour.

14. Misuse of information-example -spreading false news about a health emergency- causing panic-such misinformation misleads people-harms public trust- creates social confusion-often circulates quickly through social media without verification.

15. Editorial policies ensure accuracy-by guiding verification methods- source reliability, ethical standards- content review- regulate what can be published-prevent misinformation-maintain transparency- hold journalists accountable-strengthening trust in media institutions.

16. Facts serve to establish truth-support evidence-based decisions- ensure credibility in communication- provide clarity, reduce misinformation- form the basis for informed debates, policy-making, and responsible media reporting.

17. E-democracy- empowers marginalized groups through online consultations, grievance portals, digital petitions, and participatory budgeting-platforms like MyGov, RTI portals, and social media campaigns enable visibility, collective action, accountability-improving access to decision-making and promoting social justice.

18. IT Act, 2000- addresses cybercrimes such as hacking, identity theft, cyber fraud, and publishing obscene content- provides legal recognition for electronic records, establishes penalties- empowers agencies to investigate offences-amendments strengthened data protection, online safety, and cyberlaw enforcement.

PART C

19. Cybercrime - illegal activities conducted through computers or digital networks- including hacking, phishing, identity theft, financial fraud, and cyberbullying-precautionary methods include using strong passwords-enabling two-factor authentication- updating software-avoiding unknown links- securing networks- backing up data- using antivirus tools to reduce digital vulnerabilities.

20. Scientific temper promotes critical thinking- evidence-based reasoning- scepticism toward unverified claims on social media- guides individuals to check sources- compare information-evaluate credibility- avoid emotional reactions- ensures informed judgments- reduces misinformation- strengthens responsible digital behaviour in an information-heavy environment.

21. Data cleaning and preprocessing- remove errors, duplicates, inconsistencies- improving accuracy and reliability- processes help standardize formats- handle missing values- enhance dataset quality for analysis-clean data leads to more valid insights-better decision-making-stronger model performance in data-driven applications.

22. E-governance combats corruption- increasing transparency- reducing human discretion-enabling digital tracking-providing direct citizen services-measures to strengthen integrity include secure authentication- robust cybersecurity- transparent procurement systems- open data portals- grievance redress platforms- regular audits-such systems build trust, efficiency, and accountability in public administration.
