MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-BVOC (HONOURS) Regular Examination November 2025
First Semester
Minor Pathway Courses (MPC) – **MG1MPCPHS100 – INTRODUCTION TO PUBLIC HEALTH**
(2025 Admission Onwards)

Duration: 1 hour 30 minutes **Maximum Mark50**

ANSWER SCHEME

Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S), Interest (I), Appreciation (Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A
One Word Questions
Answer all questions
Each question carries 1 mark

1. **What are the key determinants of health? (CO1 / K)**
   Ans: Social, economic, environmental, genetic and lifestyle factors
2. **What is the main goal of public health? (CO1 / K)**
   Ans: To prevent disease and promote health of populations
3. **List any one milestone in the evolution of public health. (CO1 / K)**
   Ans: Eradication of smallpox
4. **Name one health indicator used for child health. (CO2 / K)**
   Ans: Infant mortality rate (IMR)
5. **Mention one core function of public health. (CO3 / K)**
   Ans: Assessment
6. **State any two major national health programmes launched by Government of India. (CO3 / K)**
   Ans:
   - National Tuberculosis Elimination Programme (NTEP)
   - National AIDS Control Programme (NACP)
7. **Name one essential public health service. (CO3 / K)**
   Ans: Health education
8. **Name one major public health achievement in India. (CO4 / K)**
   Ans: Polio eradication
9. **What does epidemiology study? (CO4 / K)**
   Ans: Distribution and determinants of diseases
10. **What is the aim of the National Health Policy 2017? (CO4 / K)**

Ans: Achieving Universal Health Coverage (UHC)

(1×10 = 10 marks)

Part B
Short Answer Questions
Answer any 10 questions
Each question carries 2 marks

11. **Explain how environmental factors influence health outcomes. (CO1 / An)**
Ans:

- Pollution leads to respiratory diseases
- Poor sanitation increases infections
- Unsafe water causes waterborne diseases

12. **Explain the influence of environmental factors on health. (CO1 / An)**
Ans:

- Climate affects disease patterns
- Housing and workplace conditions affect morbidity

13. **Describe the types of determinants of health. (CO1 / U)**
Ans:

- Biological
- Environmental
- Socioeconomic
- Behavioral
- Healthcare services

14. **Differentiate between primary and tertiary prevention. (CO2 / An)**
Ans:

- Primary: prevents disease (e.g., immunization)
- Tertiary: reduces complications (e.g., rehabilitation)

15. **Discuss the uses of health indicators. (CO2 / A)**
Ans:

- Measure health status
- Monitor progress
- Compare populations
- Guide health policies

16. **Write short note on principles of health promotion. (CO2 / U)**
Ans:

- Empowerment
- Participation
- Intersectoral coordination
- Equity

17. **Explain how income inequality affects health status. (CO2 / An)**
Ans:

- Limits access to healthcare
- Poor nutrition
- Increased stress and vulnerability

18. **Write short note on pre-pathogenesis phase. (CO2 / U)**
Ans:

- Disease not yet developed
- Interaction of host, agent, environment
- Focus on primary prevention

19. **Importance of intersectoral coordination in disease control. (CO3 / An)**
Ans:

- Involves multiple sectors (water, sanitation, education)
- Improves efficiency and impact
- Prevents duplication of efforts

20. **List any two levels of public-health services. (CO3 / K)**
Ans:

- Primary level
- Secondary level

21. **Describe the role of IEC in health promotion. (CO4 / A)**
Ans:

- Creates awareness
- Changes attitudes
- Promotes healthy behaviors

22. **Write a short note on community involvement in health. (CO4 / U)**
Ans:

- Enhances participation

- Improves acceptability of programmes
- Encourages sustainability

(2×10 = 20 marks)

Part C
Short Essay Questions
Answer any 5 questions
Each question carries 4 marks

23. **Explain the concept and principles of primary health care with examples from India. (CO1 / U)**
Ans:

- Universal access
- Community participation
- Intersectoral coordination
- Use of appropriate technology
- Example: ASHA workers, Anganwadi, NHP

24. **Discuss the objectives and significance of public health. (CO1 / U)**
Ans:

- Improve population health
- Prevent disease
- Increase life expectancy
- Ensure health equity
- Essential for national development

25. **Describe the relationship between health education and behaviour change. (CO2 / U)**
Ans:

- Provides knowledge
- Influences attitudes
- Encourages adoption of healthy behavior
- Leads to sustained lifestyle improvements

26. **Evaluate the role of public health in disaster management and emergency response. (CO3 / E)**
Ans:

- Surveillance and early warning
- Emergency medical services
- Safe water, sanitation, shelters
- Prevention of outbreaks
- Coordination with agencies

27. **Describe the objectives and components of immunization programs in India. (CO3 / U)**
Ans:

- Objectives: prevent VPDs, reduce mortality
- Components: vaccines, cold chain, monitoring, training, awareness
- Example: UIP

28. **Define epidemiology and explain its scope and uses in public health. (CO4 / K)**
Ans:

- Study of distribution and determinants of diseases
- Scope: descriptive, analytical, experimental
- Uses: planning, evaluation, surveillance, control of diseases

29. **Discuss the objectives and components of major national health programs. (CO4 / U)**
Ans:

- Objectives: reduce disease burden, improve health outcomes
- Components: prevention, diagnosis, treatment, IEC, monitoring
- Example: NRHM, NTEP, NPCDCS

(4×5 = 20 marks)
