# MAHATMA GANDHI UNIVERSITY, KOTTAYAM

## MGU-UGP (HONOURS) REGULAR /IMPROVEMENT/ REAPPEARANCE EXAMINATION NOVEMBER 2025

## FIRST SEMESTER

## Discipline Specific Core Course (DSC) - MG1DSCTXL100 - TEXTILE SCIENCE

(2024 ADMISION ONWARDS)

**Duration: 1.5 Hours** **Maximum Marks: 50**

***Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)***

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

### Part A

Multiple Choice Questions

Answer **All** Questions

Each Question carries **1** marks

1. List out the incorrect one of preparing acetate rayon. [U] / [CO2]

   a). Cotton linters or wood chips are purified  b). Oxidization

   c). Ripening or Ageing  d). Acetylators

2. Which weave creates small localised dots or figures with the help of extra warp/weft yarns? [U] / [CO4]

   a). Plain Weave  b). Twill Weave

   c). Satin Weave  d). Spot Weave

3. Select the process, which is not involved in the production of cotton yarn. [U] / [CO2]

   a). ginning  b). carding

   c). spinning  d). retting

4. Which of the following is a common use of the net fabric? [U] / [CO4]

a). Upholstery b). Denim Jeans

c). Woollen Sweaters d). Bridal Veils

5. Polyester is known for its resistance to which of the following? [U] / [CO2]

a). colour fading b). stretching

c). mildew and mold d). all of the above

6. Find out the method of retting which is commonly used for flax processing. [U] / [CO2]

a). water retting b). heat retting

c). dry retting d). solvent retting

7. Which of the following is a characteristic of filament fiber? [U] / [CO1]

a). short and uneven b). long and continuous

c). always natural d). always synthetic

8. Identify one characteristic feature of fabric made with satin weave. [U] / [CO4]

a). Glossy surface b). Rough Texture

c). Heavy Weight d). Dense Pattern

9. Which is the first synthetic fibre? [K] / [CO2]

a). Nylon b). Acrylic

c). Polyester d). Rayon

10. Select any one correct acid and alcohol for the preparation of polyester [U] / [CO2]

a). Ethyleneglycol and Terephthalic acid b). Glacial acetic acid

c). Shredded Cellulose. d). Phosphoric acid

**[10x1 = 10]**

## Part B

Fill in the Blanks Questions

Answer **All** Questions

Each Question carries **1** mark

11. The fiber extracted from the flax plant is known as _____. [K] / [CO1]

12. The direction of twist in yarn can be either…..... [K] / [CO3]

13. …..... fabric are good insulators of heat. [U] / [CO2]

14. ….....is the simplest type of weave. [U] / [CO4]

15. Acrylic is non for its …….. to sunlight, which allows it to maintain colour and strength in outdoor use. [U] / [CO2]

16. Unlike natural fibers, synthetic fibers are not very_____, which makes them less breathable. [U] / [CO1]

17. The Distaff hold the fibers ,which are then ….....onto the spindle [U] / [CO3]

18. Before spinning, cocoons are boiled to soften the_____,a protien that holds the fibers together. [U] / [CO2]

19. A double cloth weave uses _____ (number) of yarns to construct the fabric. [U] / [CO4]

20. Cotton fibres have a ……. cross-sectional shape. [K] / [CO2]

**[10x1 = 10]**

## Part C

Answer in one Word or One Sentence

Answer **All** Questions

Each Question carries 1 mark

21. Cite any one type of felt. [U] / [CO4]

22. What is Slub? [K] / [CO3]

23. Name one type of Novelty yarn? [U] / [CO3]

24. What happens to silk fibres when exposed to water? [U] / [CO2]

25. Whatis the elasticity of nylon? [U] / [CO2]

26. List out the feeling of wool fibre. [U] / [CO2]

27. How did acrylic polymer is made? [U] / [CO2]

28. What Process aligns fibers parallel? [U] / [CO3]

29. How does acetate rayon perform in terms of absorbency? [U] / [CO2]

30. Write in a sentence, the odor emitted by burning acrylic fibers ? [U] / [CO2]

**[10x1 =10]**

## Part D

Short Answer Questions

Answer any **5** Questions

Each Question carries **2** marks

31. Differentiate between left hand twill and right hand twill. [U] / [CO4]

32. What are the characterstics features of flax under microscopy? [U] / [CO2]

33. What are the main advantages of Rotary Spinning? [U] / [CO3]

34. Explain the significance of the shining surface observed in discuss rayon fibres under a microscope. [U] / [CO2]

35. Explain pile weave and give two examples of fabrics created using this weave? [U] / [CO4]

36. Differentiate between Blends and Mixtures. [U] / [CO4]

**[5x2 = 10]**

## Part E

Long Answer Questions

Answer any **2** Question

Each Question carries **5** marks

37. Discuss how handmade lace differs from machine made lace. [U] / [CO4]

38. Explain the essential properties required for a successful textile fibre? [K] / [CO2]

39. Write in detail on properties of viscose rayon. [U] / [CO2]

40. Write in detail about a) Single yarn b)Cord yarn c) Ply yarn [U] / [CO3]

**[2x5 =10]**
