MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR EXAMINATION March 2026

Fourth SEMESTER

Skill Enhancement Course (SEC) - MG4SECJMC201 - UNDERSTANDING PHOTOGRAPHY

(2024 ADMISSION ONWARDS)

Duration: 1 hour 30 minutes **Maximum Marks: 50**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple Choice Questions

Answer all questions

Each question carries **1** marks

1. 17. What is the primary function of the 'Tripod Mount' located at the bottom of the camera body? [K] / [CO1, CO2, CO3, CO4]

   a). A) To house the external memory card.
   b). B) To provide a standardized threaded hole for stabilization gear.
   c). C) To connect the camera to a television or monitor.
   d). D) To secure the battery inside the compartment.

2. 44. When a photographer uses "Manual Focus," which part of the camera equipment are they physically rotating? [An] / [CO1, CO2, CO3, CO4]

   a). A) The Mode Dial on the camera body.
   b). B) The Zoom ring on the lens.
   c). C) The Focus ring on the lens barrel.
   d). D) The Tripod mount screw.

3. 24. On a "Full-Frame" camera system, which focal length is most commonly associated with a 'Normal' lens? [A] / [CO1, CO2, CO3, CO4]

   a). A) 10mm to 18mm
   b). B) 50mm
   c). C) 300mm
   d). D) 600mm

4. 12. Where would a photographer attach an external flash or a wireless trigger on a DSLR or Mirrorless camera? [A] / [CO1, CO2, CO3, CO4]

   a). A) Shutter Trigger
   b). B) Eyecup
   c). C) Hot Shoe
   d). D) Mirror

5. 2. What is the defining characteristic of a Mirrorless camera compared to a traditional DSLR? [U] / [CO1, CO2, CO3, CO4]

   a). A) It uses a film roll instead of a digital sensor.
   b). B) It lacks an internal reflex mirror and optical viewfinder.
   c). C) It cannot exchange lenses.
   d). D) It is only used for video production.

6. Use of which technique most directly helps organize a busy scene? [A] / [CO2]

   a). Add more subjects
   b). Use foreground framing only
   c). Simplify by excluding distractions
   d). Increase shutter speed

7. Use the correct completion of the statement 'For a landscape with a dramatic sky, you should place the horizon near the'. [A] / [CO2]

   a). top third line
   b). bottom third line
   c). centre line
   d). anywhere; it never matters

8. Identify when a framing element is likely to become distracting in a photograph. [U] / [CO2]

   a). darker than the subject and draws attention away
   b). slightly blurred
   c). at the edge
   d). symmetrical

9. Explain how hard light typically affects the appearance of shadows in a photograph. [U] / [CO2]

   a). soft and gradual
   b). sharp-edged
   c). no shadows
   d). coloured

10. Use of which combination of camera settings will best create a portrait with a blurred background. [A] / [CO2]

    a). f/16 and wide angle
    b). f/2.0, longer focal length, subject far from background
    c). high ISO only
    d). slow shutter only

11. To develop a cinematic look with subject-background separation using rim light, which setup should be created? [C] / [CO3]

a). Three-point lighting b). Four-point lighting c). Loop lighting d). Flat lighting

12. Explain the most likely cause of an unintentionally tilted horizon in a photograph. [U] / [CO2]

a). perspective distortion b). camera leveling/composition control

c). lens vignetting d). colour temperature

13. To develop a cinematic portrait with rim lighting, which setup should be planned? [C] / [CO3]

a). Three-point lighting

b). Four-point lighting

c). Butterfly lighting

d). Flat lighting

14. A photographer wants to compose a dramatic side-lit profile emphasizing texture. Which direction of light should be created? [C] / [CO3]

a). Front lighting b). Top lighting

c). Back lighting d). Side lighting

15. To generate depth using a small shadow on one cheek, which lighting should be created? [C] / [CO3]

a). Loop b). Flat

c). Split d). Butterfly

[1x15 = 15]

Part B

Short Answer Type Questions (100 words)

Answer any **5** questions

Each question carries **3** marks

16. 38. If you widen your Aperture (e.g., from f/8 to f/2.8) to let in more light, what must you do to your Shutter Speed to maintain the same exposure level? Explain the visual consequence of this change. [An] / [CO1, CO2, CO3, CO4]

17. 27.Analyze the relationship between 'Camera Shake' and shutter speed when shooting handheld. [An] / [CO1, CO2, CO3, CO4]

18. 23.Analyze the impact of Aperture on 'Lens Speed' and its importance in low-light photojournalism. [An] / [CO1, CO2, CO3, CO4]

19. Explain why colour helps guide the viewer's attention in a photograph. [U] / [CO2]

20. Demonstrate balance- symmetrical or asymmetrical distribution by describing one practical step you would take while framing a shot. [U] / [CO2]

21. Design a three-point lighting setup for an interview scenario. [C] / [CO3]

22. Produce professional colour correction for digital photographs. [C] / [CO4]

23. Design a flat lighting setup for group photography. [C] / [CO3]

[3x5 = 15]

Part C

Essay Type Questions (350 Words)

Answer any **2** questions

Each question carries **10** marks

24. 24. You are shooting a fast-moving indoor sport (e.g., basketball) in a poorly lit gymnasium. You find that at ISO 400, your shutter speed is too slow to freeze the players, resulting in blur. Justify the decision to "push" your ISO to 6400. In this scenario, why is a noisy-but-sharp image considered superior to a clean-but-blurry image? [An] / [CO1, CO2, CO3, CO4]

25. 4. Contrast the internal structural design of a DSLR with a Mirrorless camera. Discuss how the presence or absence of a reflex mirror affects the size, weight, and the way an image is previewed by the photographer. [K] / [CO1, CO2, CO3, CO4]

26. Explain how you would show the true scale of a monument/building in a photograph. [U] / [CO2]

27. Design a lighting setup for cinematic storytelling. [C] / [CO3]

[10x2 = 20]
