## PART B

11.States secure national interests through diplomacy and alliances—strengthen military and economic capabilities—use soft power and international institutions to safeguard sovereignty and security.

12. Liberalism in EU-promotes cooperation—emphasizes shared institutions and collective decision-making—supports integration through trade, law, and democratic values.

13. Track I diplomacy- involves official negotiations—conducted by state representatives—focuses on formal agreements and conflict resolution at governmental level.

14. Globalization enhances interdependence—yet challenges sovereignty through external influence—states struggle to balance autonomy with global economic and political pressures.

15. Global South is diverse in history and economy—different colonial legacies and political systems—unequal possession of power and resources-varied development trajectories-prevent it from being monolithic bloc.

16. League of Nations reflected idealist hopes—peace-making-central to First Great Debate in IR—international security and cooperation-idea of global rule of law-criticized for weaknesses but shaped discourse on collective security.

17. Realists view anarchy as absence of authority in the international system—absolute lawlessness-leading to conflict and power struggles—anarchy is a permanent condition-pessimistic view-Liberals see it as space for cooperation through institutions-anarchy can be transformed-optimistic view.

18. Brain drain refers to skilled migration—talented professionals leave home countries—results in loss of expertise and development challenges-causing loss of talent-reduced innovation- slowing economic and social development in the home country.

19. International Political Economy-analyse how political institutions, power relations economic systems interact to shape policy- development outcomes- global inequality- studies interaction of politics and economics—global capitalist system-focuses on trade, finance, and globalization—explains power relations shaping global markets.

20. Interdisciplinary approach integrates economics, politics, sociology—offers holistic solutions for global governance—improves policy-making by addressing complex, interconnected challenges-for example addressing climate change collectively.

## PART C

21. Global digital infrastructure includes internet backbones, data centres, and cloud networks—enables connectivity across nations—supports e-commerce, governance, and communication- raises concerns of digital divide and cybersecurity.

22. Regional integration begins with preferential trade agreements—progresses to free trade areas and customs unions—later evolves into common markets and political unions-reflecting deeper cooperation.

23. Prisoners' Dilemma illustrates mistrust in cooperation—a situation where two individuals/actors acting in self-interest produce a worse outcome for both than cooperation-applies to arms control, climate agreements, and trade—shows how rational self-interest can hinder collective gains in modern international politics.

24. Culture informs IR theory by shaping identity and norms—explain how these shape state behaviour, cooperation, and conflict in global politics-explains behaviour beyond material interests—highlights values, traditions and narratives that influence diplomacy, conflict resolution, and global governance.
