MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR EXAMINATION March 2026
Fourth SEMESTER

Discipline Specific core Course (DSC) - MG4DSCPSY202 - PSYCHOLOGY OF MARKETING AND ADVERTISEMENTS (2024 ADMISSION ONWARDS)

Duration: 2 hours Maximum arks: 70

Part A
MULTIPLE CHOICE QUESTIONS
Answer all questions
Each question carries 2 marks

1. B Fosters empathy and compassion
2. C Inconsistency between attitudes and behaviours
3. D All of the above
4. B Actions/ Behaviour
5. D heading
6. D Sub heading
7. C Makes information meaningful by connecting it to existing knowledge
8. D All of the above
9. B Performance based advertising
10. B Billboard
11. C The need to belong
12. C Classical conditioning
13. B Percieved trust and credibility
14. B Managing communication during a product crisis
15. A Simplicity and elegance

Part B
Short Essay
Answer any 4 questions
Each question carries 10 marks

16. What is meant by AIDA model? How is it beneficial in advertising?

AIDA Model

AIDA Model is a selling concept presented by Elmo Lewis to explain how personal selling works. AIDA Model outlines the processes for achieving promotional goals in terms of stages of consumer involvement with the message. The Stages are Attention, Interest, Desire, and Action.

Benefits: AIDA helps in creating more effective messages. By focusing on attention-grabbing elements, maintaining interest, building desire, and providing a clear call-to-action, businesses can craft messages that resonate with their audience.

17. Discuss how advertisers use the three component model of attitudes to prepare advertising campaigns.

The Three Components of Attitudes

A) Cognitive component (Beliefs / Knowledge)- This includes what the person thinks is true about the object (facts, perceptions, and learned information).
B) Affective component (Feelings / Emotions) - This includes emotional reactions, likes/dislikes, and mood-linked responses.
C) Conative component (Behavioural intention / tendency) - This reflects the intention or likelihood of acting.

Advertising often targets these three components differently:
• Cognitive persuasion: providing reasons and evidence (features, comparisons, proof).
• Affective persuasion: building positive emotions around the brand (music, warmth, humour, aesthetic).
• Conative persuasion: triggering intention/action (discounts, call-to-action, trial offers).

18. What are the ethical principles in advertising? How is advertising regulated through laws and regulations?

Ethics in Advertising

1. Truthfulness and Honesty in Advertising

2. Transparency and Disclosure

3. Respect for Consumer Privacy

4. Fair Representation and Non-Discrimination

5. Social Responsibility in Advertising

6. Accountability and Brand Responsibility

7. Long-Term Consumer Trust Over Short-Term Gains

THE STUDENT MAY EXPLAIN THE USE OF LAWS IN REGULATING ADS, AND GIVE EXAMPLES LIKE THE FOLLOWING LAWS:

1. **Consumer Protection Act, 2019**

Under the **Consumer Protection Act, 2019**, a consumer can take action against a brand for false advertising.

2. **Drugs and Magic Remedies (Objectionable Advertisements) Act, 1954**

   This Act prohibits misleading advertisements related to drugs, medicines, and magic remedies. If a brand falsely claims that a product can cure an illness, consumers can file complaints under this law.

3. **The Emblems and Names (Prevention of Improper Use) Act, 1950**

   I**ndividuals are not allowed to use or keep using, without prior permission from the Central Government** or its authorized officer, any name or emblem listed in the Schedule or any imitation of it that looks similar.

4. **The Information Technology Act, 2000**

   It is the primary law in India for matters related to cybercrime and e-commerce.

19. Explain the relevance of consumer interpretation of messages in advertisements with special reference to the Red Bull case study.

In 2014, Red Bull settled a class-action lawsuit for **$13 million** over allegations of false advertising, specifically regarding its slogan "Red Bull gives you wings." Consumers claimed the drink did not provide the promised performance boost/wings, leading to a settlement for anyone who purchased the product between 2002 and 2014.

20. Describe the consumer concern that forms the central theme of the legal case against Dhathri hair cream advertisement.

The ad claimed that company's hair cream helped grow new hair which is found to be misleading. Dhathri Ayurveda Private

Ltd along with its brand endorser actor Anup Menon have been fined ₹10,000 each for a misleading advertisement released in 2010.

21. Explain the concepts of Unconditioned Stimulus (US) and Unconditioned Response (UR) in classical conditioning. Illustrate the mechanism with two advertising examples.

Classical conditioning in advertising works by pairing a product (neutral stimulus) with positive imagery, music, or emotions (unconditioned stimulus) to create a positive, automatic association (conditioned response) in the consumer's mind. It uses repetition and consistent pairing to foster brand recognition, preference, and loyalty.

Examples:

Coca-Cola and Happiness: Coca-Cola pairs its beverage with images of smiling friends, music, and sunny beach settings. The warmth of summer (unconditioned stimulus) paired with the drink creates an automatic positive feeling (unconditioned response), leading consumers to associate Coke with joy.

Celebrity Endorsements: Linking a product with a beloved celebrity (unconditioned stimulus) transfers the public's admiration for that person to the brand. For example, a sports star paired with a soft drink brand.

22. What are the ethical principles in advertising? How is advertising regulated through laws and regulations?

Ethics in Advertising

1. Truthfulness and Honesty in Advertising

2. Transparency and Disclosure

3. Respect for Consumer Privacy

4. Fair Representation and Non-Discrimination

5. Social Responsibility in Advertising

6. Accountability and Brand Responsibility

7. Long-Term Consumer Trust Over Short-Term Gains

5. **Consumer Protection Act, 2019**

Under the **Consumer Protection Act, 2019**, a consumer can take action against a brand for false advertising.

6. **Drugs and Magic Remedies (Objectionable Advertisements) Act, 1954**

This Act prohibits misleading advertisements related to drugs, medicines, and magic remedies. If a brand falsely claims that a product can cure an illness, consumers can file complaints under this law.

7. **The Emblems and Names (Prevention of Improper Use) Act, 1950**

I**ndividuals are not allowed to use or keep using, without prior permission from the Central Government** or its authorized officer, any name or emblem listed in the Schedule or any imitation of it that looks similar.

8. **The Information Technology Act, 2000**

It is the primary law in India for matters related to cybercrime and e-commerce.

23. Explain the relevance of consumer interpretation of messages in advertisements with special reference to the Red Bull case study.

In 2014, Red Bull settled a class-action lawsuit for **$13 million** over allegations of false advertising, specifically regarding its slogan "Red Bull gives you wings." Consumers claimed the drink did not provide the promised performance boost, leading to a settlement for anyone who purchased the product

between 2002 and 2014.

24. Describe the consumer concern that forms the central theme of the legal case against Dhathri hair cream advertisement.

The ad claimed that company's hair cream helped grow new hair which is found to be misleading. Dhathri Ayurveda Private Ltd along with its brand endorser actor Anup Menon have been fined ₹10,000 each for a misleading advertisement released in 2010.

25. Explain the concepts of Unconditioned Stimulus (US) and Unconditioned Response (UR) in classical conditioning. Illustrate the mechanism with two advertising examples.

Classical conditioning in advertising works by pairing a product (neutral stimulus) with positive imagery, music, or emotions (unconditioned stimulus) to create a positive, automatic association (conditioned response) in the consumer's mind. It uses repetition and consistent pairing to foster brand recognition, preference, and loyalty.

Examples:

Coca-Cola and Happiness: Coca-Cola pairs its beverage with images of smiling friends, music, and sunny beach settings. The warmth of summer (unconditioned stimulus) paired with the drink creates an automatic positive feeling (unconditioned response), leading consumers to associate Coke with joy.

Celebrity Endorsements: Linking a product with a beloved celebrity (unconditioned stimulus) transfers the public's admiration for that person to the brand.

For example, a sports star paired with a soft drink brand.
