Skill Enhancement Course (SEC) - MG4SECSOC200 - PERSONALITY DEVELOPMENT AND SOFT SKILLS
(2024 ADMISSION ONWARDS)
Duration: 1 hour 30 minutes Maximum Marks: 50
Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)
Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A
Short Answer
Answer any **13** questions. Each question carries **2** marks.

1. Transferable Skills: Transferable skills are abilities that can be applied across different jobs or situations, such as communication skills used in both academic presentations and workplace meetings. (CO1 – U)

2. Visual Aids: Visual aids should be simple, relevant, and used to support key points so that they enhance understanding without diverting the audience's attention from the speaker. (CO4 – U)

3. Social Stress: Social stress refers to the pressure or tension experienced by individuals due to interactions, expectations, or conflicts within social relationships or social environments. (CO3 – K)

4. Rational Problem Solving: Rational problem solving is a systematic process of identifying a problem, analysing possible solutions, and selecting the most logical and effective option. (CO5 – K)

5. Logical Reasoning: Logical reasoning is the ability to analyse information and draw valid conclusions based on structured thinking and evidence. (CO1 – U)

6. Soft Skills: Soft skills are personal and interpersonal abilities such as communication, teamwork, and adaptability that are essential for effective functioning in the 21st-century workplace. (CO1 – K)

7. Stage Fear: Stage fear is the anxiety or nervousness a person experiences while speaking or performing in front of an audience. (CO3 – K)

8. Stress Management: Stress management refers to techniques and strategies used to control and reduce stress in order to maintain mental and physical well-being. (CO3 – U)

9. First Step in Rational Decision-Making Model: The first step in the rational decision-making model is identifying and clearly defining the problem. (CO5 – K)

10. General Adaptation Syndrome: General Adaptation Syndrome consists of three stages—alarm, resistance, and exhaustion—through which the body responds to prolonged stress. (CO3 – U)

11. Primary Appraisal: Primary appraisal is the stage in stress evaluation where an individual assesses whether a situation is threatening, harmful, or challenging. (CO3 – K)

12. Locus of Control and Academic Success: Locus of control relates to academic success by determining whether a student believes achievements depend on personal effort (internal locus) or external factors. (CO2 – A)

13. Social vs Occupational Stress: Social stress arises from interpersonal relationships and social expectations, whereas occupational stress originates from job-related pressures and work environments. (CO3 – An)

14. Bounded Rationality: Bounded rationality refers to the idea that decision-making is limited by the information available, time constraints, and the cognitive capacity of individuals. (CO5 – K)

15. Stress Reaction: Stress reaction is the physical, emotional, or psychological response that occurs when an individual faces challenging or demanding situations. (CO3 – U)

16. Self-Awareness: Self-awareness is the ability to recognize and understand one's own emotions, strengths, weaknesses, and behaviour. (CO2 – K)

Part B – Short Essay

17. Personal Branding and Interview Performance: Personal branding reflects how an individual presents their skills, values, and personality to others, especially during interviews. Strong soft skills such as communication, confidence, and professionalism help candidates effectively demonstrate their personal brand. Therefore, personal branding becomes a bridge connecting soft skills with career opportunities and interview success. (CO4 – E)

18. Emotional Intelligence and Interpersonal Relationships: Emotional intelligence enables individuals to understand and manage their own emotions while empathizing with others. This helps in effective communication, conflict resolution, and maintaining healthy relationships. As a result, emotionally intelligent individuals build stronger and more cooperative interpersonal relationships. (CO4 – An)

19. Innovative Solutions for Workplace Problems: Innovative solutions for workplace problems may include promoting open communication, encouraging teamwork, and adopting digital tools to improve productivity. Organizations can also implement training programs to enhance employees' problem-solving and creative thinking skills. Such strategies foster a positive work environment and improve overall efficiency. (CO5 – C)

20. Corporate Wellness Program Proposal: A corporate wellness program should include stress-management workshops, physical fitness initiatives, and counselling support for employees. Organizations can also promote flexible work schedules and healthy workplace environments. Such programs enhance employee well-being while improving productivity and organizational performance. (CO3 – C)
