# MAHATMA GANDHI UNIVERSITY, KOTTAYAM

## MGU-UGP (HONOURS) REGULAR EXAMINATION March 2026

## Fourth SEMESTER

## Discipline Specific Core Course (DSC) - MG4DSCZGY200, MG4DSCZIM200 - ANIMAL DIVERSITY CHORDATA - I

(2024 ADMISSION ONWARDS)

**Duration: 1 hour 30 minutes** **Maximum Marks: 50**

***Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)***

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

### Part A

Multiple Choice Questions

Answer all questions

Each question carries **1** marks

1. Warm-blooded vertebrates include [U] / [CO1]

   a). pisces and reptiles b). aves and mammals

   c). reptiles and amphibians d). amphibians and pisces

2. Example of super order Chondrostei is [U] / [CO1]

   a). Amia b). Sardinella

   c). Acipenser d). Labeo

3. How many lungs is functional in snakes [U] / [CO1]

   a). One b). Two

   c). Three d). Four

4. What characteristic makes chordates deuterostomes? [U] / [CO1]

   a). Mouth is formed first b). Blastopore becomes the mouth

c). Anus is formed near the blastopore

d). Mouth and anus form simultaneously

5. The migration of hilsa fish is [U] / [CO3]

a). Anadromous

b). Potamodromous

c). Amphidromous

d). Catadromous

6. Which duct of the frog is associated with the liver? [U] / [CO2]

a). Pancreatic duct

b). Hepatic duct

c). Bile duct

d). Urinogenital duct

7. Which siphon brings water into the body of Ascidia? [K] / [CO1]

a). Exhalant siphon

b). Cloacal siphon

c). Inhalant siphon

d). Atrial siphon

8. Accessory respiration is common in fishes of [U] / [CO3]

a). Fast rivers

b). Stagnant ponds

c). Open sea

d). Cold streams

9. Fertilization in Euphlyctis hexadactylus occurs in: [K] / [CO2]

a). Ovary

b). Oviduct

c). Water

d). Uterus

10. A common example of Cyclostomata is [U] / [CO1]

a). Heteropneustes

b). Catla

c). Cephalaspis

d). Petromyzon

11. The heart of fishes pumps [U] / [CO1]

a). Only oxygenated blood

b). Only deoxygenated blood

c). Mixed blood

d). Oxygenated blood to lungs

12. Which adaptation of the hind limbs enables frogs to swim efficiently? [U] / [CO2]

a). Short toes

b). Webbing between toes

c). Presence of claws d). Thick skin

**[1x12 = 12]**

## Part B

Short Answer Questions

Answer any **6** questions

Each question carries **3** marks

13. Mention two neotenic features of Larvacea. [U] / [CO1]

14. What are lungfishes? [U] / [CO1]

15. Differentiate between cycloid and ganoid scales. [A] / [CO3]

16. What are the salient features of Chelone? [U] / [CO1]

17. Mention the divisions of the nervous system in a frog. [K] / [CO2]

18. Describe proteroglyphous fangs with a diagram. [K] / [CO3]

19. Explain the life cycle of Thaliacea. [U] / [CO1]

20. Describe the structure and function of the calcaneum in frogs. [U] / [CO2]

**[3x6 = 18]**

## Part C

Short Essay Questions

Answer any **4** questions

Each question carries **5** marks

21. Compare the anatomy of Cephalochordata with vertebrates. [U] / [CO1]

22. Describe the major morphological characters used in the subclassification of Chondrichthyes. [U] / [CO1]

23. Describe parental care in fishes. [U] / [CO3]

24. Give the salient features of Order Urodela. Substantiate it with an example. [K] / [CO1]

25. Differentiate between the systemic and pulmocutaneous arteries in frogs, mentioning their respective functions. [U] / [CO2]

26. Distinguish between Eryx johnii and Eryx conicus. [U] / [CO3]

**[5x4 = 20]**
