QP code: 25901587

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR EXAMINATION March 2026

Fourth SEMESTER

Skill Enhancement Course (SEC) - MG4SECZGY200 - EMERGENCY LIFE SUPPORT AND FIRST AID

(2024 ADMISSION ONWARDS)

Duration: 1 hour 30 minutes **Maximum Marks: 50**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple Choice Questions
Answer all questions
Each question carries 1 marks

1. First aid is best described as: [K] / [CO1]

a). Advanced medical treatment b). Long-term hospital care

Ans. c) Immediate help given before professional care arrives

c). Immediate help given before professional care arrives d). Surgical intervention

2. The letter 'R' in the R.I.C.E. protocol represents [A] / [CO3]

a). Rest b). Read c). Run d). Rift

Ans. a) Rest

3. What is ABC in terms of CPR? [K] / [CO2]

a). Airway, Bathing and Circulation b). Airway, Breathing and Cleaning

c). Airway, Breathing and Circulation d). Atmosphere, Breathing and Circulation

Ans. c) Airway, Breathing and Circulation

4. Burns affecting more than 15% body surface in adults are considered [U] / [CO4]

a). Serious b). Moderate c). Minor d). Superficial

Ans. a) Serious

5. An unconscious victim should be placed in the recovery position ONLY if they are: [A] / [CO5]

a). Not breathing b). Breathing normally c). Bleeding d). In cardiac arrest

Ans. b) Breathing normally

6. Which of the following helps reduce swelling in sprains? [U] / [CO1]

a). Burn cream b). Antiseptic wipe c). Instant cold pack d). Thermometer

Ans. c) Instant cold pack

7. Which part of the body holds bones together at joints? [A] / [CO3]

a). Tendons b). Ligaments c). Bone marrow d). None of the above

Ans. b) Ligaments

8. How does the 5-and-5 rule apply to a conscious child? [A] / [CO5]

a). 5 breaths, 5 thrusts b). 5 back blows, 5 thrusts

c). 5 compressions, 5 breaths d). 5 thrusts, 5 sweeps

Ans. b) 5 back blows, 5 thrusts

9. A rescuer should NOT enter deep or fast-moving water unless: [U] / [CO3]

a). The victim is shouting b). Properly trained

c). It is daytime d). Wearing shoes

Ans. b) Properly trained

10. After snake bite, food and drink should: [A] / [CO4]

a). Be given immediately b). Be avoided

c). Be forced d). Be sweetened

Ans. b) Be avoided

11. The FAST method is used to identify symptoms of: [U] / [CO1]

a). Shock b). Epilepsy c). Stroke d). Heart failure

Ans. c) Stroke

12. Respirators are used to [U] / [CO5]

a). Protect respiratory system b). Increase dust exposure

c). Improve sound levels d). Monitor temperature

Ans. a) Protect respiratory system

[1x12 = 12]

Part B

Short Answer Questions

Answer any 6 questions

Each question carries 3 marks

13. How should a rescuer modify choking relief for an obese victim? [A] / [CO5]

Ans. Perform chest thrusts instead of abdominal thrusts (due to large abdomen).
Place hands at the center of the chest (sternum)**.**
Give quick inward thrusts until the object is expelled or victim becomes unresponsive.
(3 marks for any 3 relevant points)

14. Briefly describe shock management in drowning. [An] / [CO3]

Ans. Lay the victim flat and elevate legs (if no injury suspected).
Keep the victim warm and dry (remove wet clothes, cover with blanket).

Monitor breathing and pulse, provide CPR if needed, and seek medical help.
(3 marks for any 3 relevant points)

15. Describe safety measures at schools [U] / [CO5]
Ans. Maintain safe infrastructure (proper ventilation, lighting, fire exits).
Conduct regular drills (fire, earthquake, evacuation).
Ensure supervision and first aid facilities (trained staff, first aid kits).
(3 marks for any 3 relevant points)

16. What is crisis management? [K] / [CO1]
Ans. Crisis management is the process of preparing for, responding to, and recovering from emergencies or unexpected events. Definition – 1 mark
It involves planning, coordination, and quick decision-making.
Aim is to minimize damage and ensure safety of people. (Key points - 2 mark)

17. Briefly explain first aid management of inhalation poisoning. [An] / [CO4]
Ans. Move the victim to fresh air immediately.
Loosen tight clothing and ensure easy breathing.
Monitor breathing; provide oxygen/CPR if needed and seek medical help.
(3 marks for any 3 relevant points)

18. What is risk mitigation? [U] / [CO5]
Risk mitigation is the process of reducing the likelihood or impact of potential risks by identifying, assessing, and controlling them. (Definition – 1 mark)
It involves identifying and assessing possible dangers.
Taking preventive measures to minimize harm or impact. (Key points - 2 mark)

19. Mention any three health problems that may result from animal bites. [U] / [CO4]
Ans. Rabies infection
Bacterial wound infection
Tetanus (any 3 points - 3 marks)

20. What do you mean by an Automated External Defibrillator ? [K] / [CO5]
Ans. An Automated External Defibrillator (AED) is a portable, lifesaving, medical device used in emergencies to treat sudden cardiac arrest. (Definition – 1 mark)
It delivers an electric shock to restore normal heart rhythm.
It is easy to use with automated voice/visual instructions. (Key points - 2 mark)

[3x6 = 18]

Part C

Short Essay Questions
Answer any 4 questions
Each question carries 5 marks

21. Explain the AVPU scale and its role in assessing a casualty's level of consciousness. [K] / [CO1]
Ans. The AVPU scale is a simple and quick method used in first aid to assess a casualty's level of consciousness.
A – Alert: Patient is fully awake and responsive. (1 mark)
V – Verbal: Responds only to verbal stimuli. (1 mark)
P – Pain: Responds only to painful stimuli. (1 mark)
U – Unresponsive: No response to any stimulus. (1 mark)
Role: It helps responders determine how responsive a person is and guides immediate medical action. (1 mark)

22. Imagine a person is not breathing, and think they may have a spine injury. Which is more crucial, opening the airway or supporting the spine?
Ans. Airway is the priority because breathing is essential for life. (1 mark)
Use jaw-thrust manoeuvre to open airway without moving neck. (1 mark)
Maintain spinal alignment while opening airway. (1 mark)
If airway is blocked, it can lead to brain damage/death quickly. (1 mark)

Hence, a combination of airway management with spine protection is crucial. (1 mark)
[S] / [CO3]

23. Analyze how Industrial IoT (IIoT) improves safety performance in high-risk industries.
[An] / [CO5]

Ans. Real-time monitoring of equipment and environment – 1 mark
Use of sensors to detect hazards (gas, temperature, pressure) – 1 mark
Predictive maintenance to prevent failures – 1 mark
Wearable devices for worker safety – 1 mark
Faster emergency response and decision-making – 1 mark
(Liberal valuation)

24. Explain the major steps involved in Cardiopulmonary Resuscitation given to children.
[U] / [CO2]

Ans. Check responsiveness and breathing – 1 mark
Call for help/emergency services – 1 mark
Start chest compressions (30 compressions) – 1 mark
Give 2 rescue breaths – 1 mark
Continue 30:2 cycle until help arrives – 1 mark

25. Explain the clinical features, complications, and first aid management of scorpion sting.
[An] / [CO4]

Ans. Local symptoms (pain, swelling, redness) – 1 mark
Systemic symptoms (sweating, nausea, breathing difficulty) – 1 mark
Complications (cardiac/respiratory issues) – 1 mark
First aid (cleaning, cold compress) – 1 mark
Seek medical help and keep victim calm – 1 mark

26. How can minor wounds heal more quickly? How do you protect a minor cut? [S] / [CO3]

Ans. Clean wound with water/antiseptic – 1 mark
Apply antibiotic ointment – 1 mark
Cover with sterile dressing – 1 mark
Keep wound clean and dry – 1 mark
Good nutrition and hygiene for faster healing – 1 mark

[5x4 = 20]
