(Each question carries 3 marks)

13. Define wellness. Explain its main dimensions. [K] [CO1]
Answer: Definition -1 mark, any four dimensions-2 narks
Wellness is the state of complete physical, mental, and social well-being, not merely the absence of disease.
Main dimensions include:

- **Physical wellness:** Maintaining a healthy body through exercise, nutrition, and sleep.
- **Mental/Emotional wellness:** Ability to cope with stress and maintain positive thinking.

- **Social wellness:** Maintaining healthy relationships and social interactions.
- **Intellectual**
- **Spiritual**
- **Occupational**
- **Cultural**
- **Financial**

14. State two components of a healthy lifestyle. [K] [CO1]
Answer: Any two healthy components- 1.5 each

- Balanced and nutritious diet
- Regular physical exercise

15. What are the safe practices required for performing Asanas? [K] [CO5]
Answer:

Liberal valuation

- Practice on an empty stomach or after light meals.
- Perform asanas slowly and avoid sudden movements.
- Maintain proper breathing during practice.
- Stop if pain or discomfort occurs.

16. What is environmental wellness? Explain its importance. [K] [CO1]
Answer:
Environmental wellness refers on how surroundings affect the health and how our actions impact the environment. It is important because it promotes good health, reduces pollution, conserves natural resources, and improves quality of life.

17. What are the key goals of mental health promotion? [U] [CO4]
Answer: Any three with explanations

- Improve emotional well-being and coping ability.
- Reduce stress and mental disorders.
- Promote positive relationships and social support.
- Encourage healthy lifestyle and self-care practices.

18. Explain three-part breath (Dirga Pranayama). [U] [CO5]
Answer: Definition -1, Pratice-1, Benefits-1
Dirga Pranayama is a deep breathing technique used in yoga. It involves breathing in three stages: filling the abdomen, expanding the rib cage, and finally filling the upper chest. The breath is then slowly released. This practice improves lung capacity, relaxes the mind, and reduces stress.

19. How does sleep help regeneration? [K] [CO1]
Answer: Definition of regeneration-1, importance of sleep-2
Sleep helps the body repair and regenerate tissues, restore energy levels, and strengthen the immune system. It also improves memory, concentration, and overall physical and mental health. ***Liberal valuation***

20. Mention two benefits of exercise on heart health. [K] [CO2]
Answer: Any two benefits with brief explanation- 1.5 each

- Improves blood circulation and strengthens the heart muscle.
- Helps reduce blood pressure and risk of heart disease.

Part C – Short Essay Questions

(Each question carries 5 marks)

21. Discuss the effect of aerobic exercise on muscles. [U] [CO3]
Answer: Define aerobic exercise- 1; benefits on muscular system (any 4) -4
Aerobic exercise such as walking, running, cycling, and swimming improves muscle endurance and strength. It increases oxygen supply to muscles, helping them work efficiently for longer periods. Regular aerobic activity improves muscle tone, enhances blood circulation, and reduces fatigue. It also increases mitochondrial activity in muscle cells, improving energy production and overall muscular performance.

22. Describe how peer relationships influence adolescent mental health. [U] [CO4]
Answer: any five points
Peer relationships play an important role in adolescent development. Positive peer support can increase confidence, improve communication skills, and reduce stress. Healthy friendships provide emotional support and a sense of belonging. However, negative peer pressure can lead to risky behaviors, anxiety, and poor decision-making. Therefore, supportive and respectful peer relationships contribute significantly to good mental health in adolescents. ***Liberal valuation***

23. What are the different yoga practices for maintaining good physical and mental health? [K] [CO5]
Answer: Define yoga-1 mark; any 4 yoga practices with explanation/ mention any 8 yoga practices – 4 marks
Yoga practices/ sadanas include: Yama, niyama, asana, pranayama, pratyahara, dharana, dhyana, Samadi, mudras, satkarmas etc.

- **Asanas (postures):** Improve flexibility, strength, and posture.
- **Pranayama (breathing exercises):** Improve lung capacity and reduce stress.
- **Meditation:** Calms the mind and improves concentration.
- **Relaxation techniques:** Help reduce fatigue and anxiety.
  Together these practices promote both physical fitness and mental well-being.

24. How does meditation help to improve our mental well-being? [U] [CO5]
Answer: Any five points with explanation- 5 marks
Meditation helps calm the mind and reduce stress. It improves concentration, emotional

balance, and self-awareness. Regular meditation lowers anxiety, promotes relaxation, and improves sleep quality. It also enhances positive thinking and overall mental health.

25. Describe the agencies supporting mental health in Kerala. [K] [CO4]
Answer: Any 2 agencies with explanation / names of any four- 4 marks; General activities of these agencies-1 mark
Several agencies support mental health services in Kerala.

MHAT, Kerala; Mehac Foundation, Manasa Keralam etc. or any similar

26. Explain stretching exercises and their importance. [U] [CO2]
Answer: Any five points
Stretching exercises involve gently extending muscles to improve flexibility and range of motion. These exercises help prepare the body for physical activity and reduce the risk of injury. Stretching improves muscle coordination, increases blood circulation, and reduces muscle stiffness. Regular stretching also improves posture, relaxation, and overall physical performance.
