25901658

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) EXAMINATION APRIL 2026
SECOND SEMESTER
MDC - MG2MDCECT100 - IOT BASED SMART FARMING

Scheme- SET A

Part A – Multiple Choice Questions

Answer any 35 questions

Each question carries 1 marks

1 – C – Low power consumption and long-range communication
2 – A – Zigbee
3 – A – Cloud computing
4 – B – As an analog voltage proportional to temperature
5 – B – They help maintain optimal humidity for plant growth
6 – A – Home automation
7 – B – Rain Gauge Sensor
8 – D – Process data and control actuators
9 – A – To connect and share data over the internet
10 – D – MQTT
11 – A – Collect and transmit data
12 – B – By rotating to a specified angle based on control signals
13 – B – GPIO pins
14 – D – All of the above
15 – A – Automate water supply based on soil moisture levels
16 – B – It automatically opens/closes to regulate water flow
17 – A – Percent (% volumetric water content)
18 – B – Linear actuator
19 – C – Automating routine tasks
20 – C – Internet of Things
21 – A – Seedling stage
22 – A – Predicts weather patterns
23 – A – Nitrogen, Phosphorus, Potassium
24 – B – It ensures proper nutrient absorption by plants
25 – A – It provides easy access and scalability for large datasets
26 – D – They capture aerial images to assess crop health
27 – D – Inconsistent data storage formats
28 – C – IoT sensors

29 – A – Germination
30 – A – Monitoring plant growth and adjusting environmental factors
31 – A – By predicting pest outbreaks and suggesting timely interventions
32 – A – By analyzing data patterns and making predictive recommendations
33 – C – Targeted application
34 – A – Methane
35 – B – Rice
36 – A – Soil erosion
37 – A – Increasing disease resistance
38 – A – Nitrogen
39 – A – Temperature
40 – B – Aeroponics delivers nutrients through misted air, while hydroponics uses a nutrient-rich water solution
