SECOND SEMESTER MGU-UGP (HONOURS)/MGU-BBA (Honours)/MGU-BCA (Honours)/MGU-BVOC(Honours) REGULAR/IMPROVEMENT/REAPPEARANCE EXAMINATIONS, APRIL 2026

Ability Enhancement Courses (AEC) - MG2AECENG100 - ENGLISH FOR SCIENCE - PART II

Part A. MCQ. Answer all questions. Each question carries 1 mark.

1. In the word 'go', which diphthong is present? [K] / [CO1]
   Answer: b). /əʊ/
2. What does the line "For every atom belonging to me as good belongs to you" suggest [U]/[CO1]
   Answer: c). A reminder of universal interconnectedness
3. “Did you finish your homework?" Which of the following is a possible answer? [U] / [CO2]
   Answer: b). Yes, I did
4. What is the primary focus of Emma Bryce's TED-Ed talk? [K] / [CO1]
   Answer: b). journey of plastic waste after disposal
5. Identify the correct stress pattern for the word 'education' [U] / [CO1]
   Answer: b). EDU-ca-TION

[1x5 = 5]

Part B. SHORT ANSWER. Answer any 6 questions. Each question carries 5 marks

6. Categorise the following words based on the number of syllables: [A] / [CO1]
   One syllable: green, put, dance
   Two syllables: pencil, butter, silence
   Three syllables: memory
   Four syllables: remarkable, historical
   Five syllables: imaginable
7. Complete the sentences with appropriate question tags. [A] / [CO2]
   a. They should call us before coming, **shouldn’t they?**
   b. Your brother isn’t home yet, **is he?**
   c. We need to submit the report today, **don’t we?**
   d. She hardly ever complains, **does she?**
   e. There’s a problem with the internet, **isn’t there?**
8. What is Attenborough's main concern about the 'unconsciously predicated' belief of economies and political systems, and what are the consequences of this belief? [U] / [CO1]
   Answer: Attenborough warns that economies assume nature’s stability—regular seasons, water, food—but this is false. With the Holocene ending, environmental instability threatens global systems, risking food security, resources and human survival unless urgent collective action is taken.
9. Mark the stressed words in the following sentences: [U] / [CO1]
   Answer: Here are the sentences with **stressed (content) words** marked in **bold**:
   1. They **watched** the **sunrise together**.
   2. I **finished** my **homework early**.
   3. She **called** me in the **afternoon**.
   4. The **baby** is **crying loudly**.
   5. We **cleaned** the **house** all **day**.
10. Write any any five words which has the vowel sounds /u:/ and write another five words with the sound /u/ in it [A] / [CO1]
    Answer: Write full credit to appropriate responses
11. What emotions does the song "Blowin’ in the Wind" evoke, and how do they contribute to its impact? [An] / [CO1]

a blend of reflection, sadness, frustration and quiet hope. - emotions deepen its impact encouraging listeners to think critically rather than offering direct solutions.

12. Write a letter to the editor about the role of youth in saving the environment. [U] / [CO3]
    Answer: to be concise and persuasive – format (sender details-date- recipient details-salutation)
13. Write five instances of using neutral tone in communication. [K] / [CO1]
    Answer: routine statements- non-final pauses- reading lists or numbers – technical or formal speech
14. Identify three words where the /v/ sound appears in different positions (beginning, middle, and end). [A] / [CO1]
    Answer: Any sensible response may be given appropriate credit.

[5x6 = 30]

Part C. ESSAY. Answer any 1 question. Each question carries 15 marks

15. Explain how click and bioorthogonal chemistries "liberated chemists from old constraints," according to Carolyn Bertozzi. [An] / [CO1, CO3]
    Answer: In her Nobel Prize Banquet Speech 2022, Carolyn Bertozzi explains that click and bioorthogonal chemistries “liberated chemists from old constraints” by removing the need for harsh conditions and complex procedures.
    Earlier, chemists were limited to reactions that worked only in controlled laboratory settings. These new approaches allow reactions that are fast, reliable and compatible with living systems. As a result, chemists can now study and modify molecules directly inside cells without disrupting natural processes, greatly expanding the scope of chemical research and its applications in biology and medicine.
16. Write an interview transcript where a student is being interviewed by a university admission panel. Include questions about academic achievements, extracurricular activities, and future goals. [A] / [CO3]
    Answer: Check the relevance of the questions – do they reflect academic achievements, extracurricular activities, and future goals -- the relevance of the response.
17. Prepare a group discussion involving four participants on the topic,
    Social Media: A Boon or Bane [A] / [CO3]
    Answer: Any sensible response may be given appropriate credit.

[15x1 = 15]
