Name : .....

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR/IMPROVEMENT/REAPPEARANCE EXAMINATION APRIL 2026

SECOND SEMESTER

Discipline Specific Core Course (DSC) - MG2DSCGEO100 - EXOGENOUS EARTH PROCESSES

(2024 ADMISSION ONWARDS)

Duration: 1 Hour 30 Minutes **Maximum Marks: 50**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple choice

Answer all questions

Each question carries **1** marks

1. Recognize the process which is responsible for the formation of clouds. [K] / [CO1]

   a). Evaporation b). Condensation

   c). Sublimation d). Precipitation

2. Which part of the glacier is showing plastic flow when it moves? [U] / [CO3]

   a). The upper part of the glacier where crevasse are common b). At the interface between the underlying bedrock and the thick glacier

   c). In the lower part of the glacier between the interface with the bedrock and the overlying zone of rigidity d). at the bottom margin of glaciers

3. What happens do to transportation by waves ? [U] / [CO3]

   a). Waves deposit sediments directly onto the shore

b). Waves break rock fragments into smaller pieces

c). Waves carry sediments to different locations along the coast

d). Waves carve cliffs into new shapes

4. What is the main process responsible for the formation of caves in karst regions? [U] / [CO3]

a). Chemical weathering b). Wind abrasion

c). Erosion by rivers d). Mechanical weathering

5. What is the name of the landscape formed by the dissolution of soluble rocks, often featuring caves, sinkholes, and underground streams? [U] / [CO3]

a). Desert b). Kast

c). Plateau d). Delta

[1x5 = 5]

Part B

Short answer

Answer any **7** questions

Each question carries **3** marks

6. Explain the main types of erosion and how do they contribute to shaping the Earth's surface? [U] / [CO3]
7. Describe gully erosion? [K] / [CO3]
8. Explain why wind ierosion is more effective in arid regions than in humid regions? [U] / [CO3]
9. Differentiate between abrasion and attrition. [U] / [CO3]
10. Describe the role played by abrasion in forming features like cliffs and caves? [U] / [CO3]
11. Describe the different types of coastal processes that shape a coastline. [U] / [CO3]
12. Describe the role of sea water as a geomorphic agent. [U] / [CO3]
13. Describe the importance of the atmosphere in the Earth system. [U] / [CO1]
14. Explain how wind abrasion affects rock surfaces in desert environments. [U] / [CO3]

[3x7 = 21]

Part C

Short note

Answer any **3** questions

Each question carries **8** marks

15. Analyze the role of human activities in accelerating or hindering weathering. [U] / [CO2]

16. Glacier is a powerful geomorphic agent to form various landform through erosion. Do you agree it? Substantiate your views. [U] / [CO3]

17. Discuss how do meandering stream differ from braided streams. Add a note of formation of an oxbow lake. [U] / [CO3]

18. Discuss how waves and currents contribute to the deposition of sediments along coastlines. [U] / [CO3]

19. Discuss in detail the various types of weathering products and their significance in soil formation. [U] / [CO2]

[8x3 = 24]
