Name : .....

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR EXAMINATION APRIL 2026

SECOND SEMESTER

Multi-Disciplinary Courses (MDC) - MG2MDCGEO100 - NATURAL HAZARDS

(2024 ADMISSION ONWARDS)

Duration: 1 Hours **Maximum Marks: 35**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple choice

Answer all questions

Each question carries **1** marks

1. A tsunami is primarily triggered by: [K] / [CO1]

   a). Volcanic eruptions b). Underwater earthquakes

   c). Hurricane winds d). Meteor impacts

2. What is the main factor that contributes to landslides? [K] / [CO2]

   a). Too much rain and water saturation b). Cold temperatures

   c). Strong winds d). Dry soil

3. Name the agency in India that is primarily responsible for issuing cyclone warnings [K] / [CO3]

   a). National Disaster Response Force (NDRF) b). Indian Meteorological Department (IMD)

   c). Kerala State Disaster Management Authority (KSDMA) d). Indian Navy

4. Kerala is particularly vulnerable to which of the following natural hazards? [U] / [CO2]

a). Drought

b). Earthquakes

c). Flood and Landslide

d). Tsunami

5. Which of the following is a biological hazard? [U] / [CO1]

a). Earthquake

b). Dengue

c). Flood

d). Landslide

6. What is a tsunami? [K] / [CO2]

a). A large ocean wave caused by an earthquake or volcanic eruption

b). A type of hurricane

c). A storm surge caused by a cyclone

d). A tidal wave caused by the moon's gravity

[1x6 = 6]

Part B

Short answer

Answer any **5** questions

Each question carries **3** marks

7. Describe about Earthquake risk factors [U] / [CO2]

8. Describe the health risks associated with animals to human [K] / [CO3]

9. Discuss the role of dams and levees in mitigating flood risks through engineering solutions. [U] / [CO2]

10. Explain the importance of understanding natural hazards. [K] / [CO1]

11. How do natural hazards lead to loss of biodiversity? [U] / [CO1]

12. Explain the process of cyclone formation, focusing on the role of warm air, moisture, and the Coriolis Effect. [U] / [CO3]

13. Explain importance of community based early warning systems in hazard mitigation [U] / [CO3]

[3x5 = 15]

Part C

Short note

Answer any **2** questions

Each question carries **7** marks

14. Explain the difference between geological and meteorological hazards. [U] / [CO1]

15. Define anthropogenic factors and explain their role in the increase of natural hazards. [K] / [CO2]

16. Discuss major natural hazards in India [U] / [CO1]

17. Explain about preparedness and mitigation of flood [U] / [CO3]

[7x2 = 14]
