MAHATMA GANDHI UNIVERSITY, KOTTAYAM
MGU-UGP (HONOURS) REGULAR/IMPROVEMENT/REAPPEARANCE EXAMINATION APRIL 2026
SECOND SEMESTER
Discipline Specific Core Course (DSC) - MG2DSCHSC100 - PERSPECTIVES OF HOME SCIENCE - II
(2024 ADMISSION ONWARDS)

Maximum Marks: 50

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Part A

Short Answer Type Questions. Answer any 10 questions.
Each question carries 2 marks

1. What is the nature-nurture controversy? [K] / [CO1]
   It refers to the debate about whether heredity (nature) or environment (nurture) plays the major role in the development of an individual. Hereditarians believe development is mainly influenced by heredity, while environmentalists believe environment has the greater influence. ***(two points- 1 mark each)***
2. 'Human Development involves the study of qualitative and quantitative changes'. Give examples. [K] / [CO1]
   - Quantitative change: Increase in height, weight etc.
   - Qualitative change: Improvement in thinking, emotional maturity, problem-solving ability, etc. ***(1 mark each)***
3. Give an example of how development is predictable. [K] / [CO1]
   Children creep, crawl and sit before they learn to walk. Children usually begin cooing, babbling, speak simple words before they start forming complete sentences. ***(any one example - 2 marks)***
4. Define the cross-sectional method. [U] / [CO2]
   It is a child study method in which different groups of children at different stages of development are studied and compared at the same time. ***(2 marks for definition)***
5. Expand TAT and CAT. [U] / [CO2]
   - TAT – Thematic Apperception Test
   - CAT – Children's Apperception Test ***(1 mark each)***
6. What is the purpose of anthropometry? [K] / [CO2]
   - To assess the nutritional status of children.
   - To measure and compare children's height and weight with standard values for the same age group. ***(two points- 1 mark each)***
7. The latin word extension derived from. [U] / [CO3]
   - 'Ex-tensio', Ex-out and tension- stretching. ***(two points- 1 mark each)***
8. Which step in extension teaching involves convincing people of the benefits of new practices.
   - Fourth step(***1 mark)*** Conviction***(1 mark)*** ([K] / [CO3]
9. State one reason why needs assessment is conducted [U] / [CO3]

- To identify real problems of people , To prioritize important needs,To avoid unnecessary programmes ,To plan effective extension activities ,To ensure better use of resources. . ***(any one points- 2marks)***

10. Give one example for a home science extension activity. [K] / [CO4]
    - Nutritional awareness progamme for rural mothers. ***(can write any community oriented programme- 2marks)***
11. Which career options are available in Home Science? [U] / [CO4]
    - Education field, hospitals counselling, artistic field, textile field. ***(can write any area related - 2marks)***
12. What are the consequences of poor nutrition on health? [U] / [CO4]
    - Weakens immune system, affects growth-. ***(any two points- 1 mark each)***

[2x10 = 20]

Part B

Short Essay Type Questions. Answer any 5 questions
Each question carries 4 marks

13. How do various domains of development influence each other? Discuss with examples. [K] / [CO1]

    The domains of development are interconnected so that a child's progress in one domain influences the progress in other domains of development. Example: Healthy brain development (physical development) aids cognitive functioning. Cognitive development helps in emotional control and social interaction. Language development improves communication and promotes social development. ***(Explanation – 2 marks and any two examples – 2 marks)***
14. Describe the role of nutrition and intelligence in the growth and development of a child. [K] / [CO1]

    Intelligence and nutrition influence growth and development of children.
    - **Intelligence:** High intelligence is associated with faster development, while low intelligence may lead to delayed development. ***(2 marks)***
    - **Nutrition:** Proper nutrition is essential for healthy growth and development. Inadequate nutrition can cause delayed growth and development. ***(2 marks)***
15. Describe the uses and types of questionnaire in child study. [U] / [CO2]

    Use: A questionnaire is used to collect information from parents, teachers, or children through a set of printed questions. ***(1 mark)*** Types:
    - Open-ended questionnaire: Respondents give free responses in their own words. **(1½ *mark*s)**
    - Close-ended questionnaire: Answers are already provided, and respondents mark or choose the correct answer. **(1½ *mark*s)**
16. Illustrate the importance of participatory approaches in extension education. [U] / [CO3]
    - Helps people identify their own needs and solutions.
    - Increases community participation in programmes.
    - Improves acceptance and effectiveness of extension activities.
    - Promotes self-reliance and sustainable development. (***one point 1 mark each)***
17. Classify formal and extension education based on their teaching approach. [U] / [CO3]
    - **Formal education** follows a structured and classroom-based teaching approach with a fixed curriculum, timetable, and examination system.

- **Extension education** follows an informal and need-based teaching approach that emphasizes practical learning, community participation, and problem-solving. (***2 mark each)***

18. List four areas where Home Science is applied in daily life. [U] / [CO4]
    - Areas related to- nutrition, resource management, interior decoration, textiles, fashion, extension and child development. ***(any four point-1 mark each)***
19. Explain how Home Science provides diverse job opportunities in different fields. [U] / [CO4]
    - Job sectors related - nutrition, resource management, interior decoration, textiles, fashion, extension and child development. ***(any four point- 1 mark each)***

[4x5 = 20]

Part C

Essay Type Questions. Answer any 1 question. Each question carries 10 marks

20. Elements of education ensures proper evaluation-Comment [K] / [CO3]
    - Objective –oriented, Client –centered, Two- way communication ,Participation and Involvement, Learning by Doing, Change- Oriented, Interdisciplinary approach, Use of various Teaching Methods, Continued Process, Evaluation and Feedback. ***(any five point-2 mark each)***
21. Describe the purpose, features, advantages and disadvantages of experimental method. [U] / [CO2]

    Purpose: The experimental method is a method of studying children through experiments conducted in a controlled setting to understand behaviour, learning, and development. **(2½ *mark*s)**

    Features: Controlled Setup, Testing Cause and Effect, Groups for Comparison, Repeatable Results. **(2½ *mark*s)**

    Advantages: Gives clear and reliable results, Helps find out what causes certain behaviors, Reduces errors by controlling other factors. **(2½ *mark*s)**

    Limitations: Children may act differently in an artificial setting, Some experiments may raise ethical concerns, The results may not always apply to real-life situations. **(2½ *mark*s)**

[10x1 = 10]
