15. Google (1 x 15 = 15)

Part B - Short Answer Type questions. Answer any 5 questions. Each question carries 3 marks

16. Risks of oversharing-Personal data can be misused. Risk of identity theft increases. Leads to cyberstalking and harassment. Affects personal reputation.

17. Digital footprints & hiring- Employers check online profiles. Positive content improves chances. Negative posts reduce opportunities. Online behavior reflects personality.

18. Keywords in SEO-Keywords help search engines find content. Improve website ranking. Increase visibility online. Attract target audience.

19. Content marketing- Creating useful and engaging content. Attracts audience attention. Builds brand awareness. Example: blogs, videos, posts.

20.Deepfakes- AI-generated fake media. Looks real but is manipulated. Used for misinformation. Difficult to identify.

21.Digital media literacy- Helps identify fake news. Encourages critical thinking. Promotes responsible sharing. Supports informed decisions.

22.Cognitive bias- People believe familiar ideas. Ignore opposing information. Helps spread misinformation. Reinforces false beliefs.

23.Verification vs Fact-checking- Verification checks source authenticity. Fact-checking checks accuracy of content. Verification comes first. Both ensure reliability (3 x 5 = 15)

Part C – Essay Type Questions. Answer any 2 questions. Each question carries 10 marks

24. Cognitive bias, echo chambers, filter bubbles- Cognitive bias affects thinking and judgment. Echo chambers expose users to similar views. Filter bubbles are created by algorithms. All limit diverse information. They reinforce existing beliefs. They spread misinformation. They create polarized opinions. They distort reality perception. Critical thinking can reduce effects.

25. Social media algorithms & marketing- Algorithms control content visibility. They prioritize engaging content. High engagement increases reach. Brands must post regularly. Relevant content attracts audience. Use of keywords and hashtags helps. Interaction improves visibility. Trend-based content performs better. Strategy is important for success.

26. Rapid information flow-Information spreads quickly online. It helps during emergencies. It increases awareness. It connects people globally. It spreads misinformation easily. It causes confusion and panic. Verification becomes difficult. Leads to information overload. Balance between speed and accuracy is needed.

27. Influencers & audience- Influencers shape opinions. They affect youth behavior. Promote brands and products. Create trends online. Can spread misinformation. May promote unrealistic standards. Ethical responsibility is important. Guidelines and regulation are needed. Responsible content is necessary. (10 x 2 = 20)
