ANSWER KEY
QP CODE:25901754
MAHATMA GANDHI UNIVERSITY, KOTTAYAM
MGU-UGP (HONOURS) REGULAR/IMPROVEMENT/REAPPEARANCE EXAMINATION APRIL 2026
SECOND SEMESTER
Multi-Disciplinary Courses (MDC) - MG2MDCPOL100 - INTRODUCTION TO INTELLECTUAL PROPERTY RIGHTS
(2024 ADMISSION ONWARDS)

PART A

1.c) 1948

2.a) 1886

3.a) Copyright

4.b) Industrial Design

5.c) 20 years

6.c) Brand name or logo

7.c) Darjeeling Tea

8.d) Trademark Act, 1999

9.a) GATT

10.c) It facilitates shared R&D risks and reduces time to market through IP collaboration.

PART B

11.World Intellectual Property Organization- promotes global IPR protection and cooperation - established in 1967 and headquartered in Geneva - administers international treaties and registration systems - encourages innovation creativity and technology transfer among member countries.

12. Patents provide exclusive legal rights to inventors for new inventions - protection usually lasts for twenty years from filing date - prevents unauthorized making using or selling of invention - encourages research development and technological advancement in industries.

13. Literary works such as books and articles are protected under copyright law - musical works and artistic creations also receive protection - cinematograph films computer software and sound recordings are covered - safeguards creators against unauthorized copying and distribution.

14. Intellectual Property Rights- provide legal protection for inventions and creative works - encourages inventors and creators to invest in research and innovation - ensures economic

rewards and market advantage - promotes technological progress industrial growth and healthy competition.

15. India under TRIPS Agreement must provide minimum standards of IPR protection - required to amend patent copyright and trademark laws according to WTO norms - ensures enforcement mechanisms against infringement - balances public interest with protection of innovation and trade.

16. Compulsory licensing- allows government to authorize use of patented invention without patent holder's consent - granted under special conditions like public health emergencies or non-availability of product - ensures wider access to essential goods especially medicines.

17. Present legal systems- generally do not recognize Artificial Intelligence as an inventor - patent laws in most countries require inventor to be a natural person - AI can assist innovation processes but ownership and inventorship are assigned to humans.

18. Design Act 2000 in India- protects the visual appearance and aesthetic features of products - covers shape configuration pattern and ornamentation of industrial designs - prevents unauthorized copying of registered designs - promotes creativity and commercial competitiveness in industries.

PART C

19. General Agreement on Tariffs and Trade- promoted reduction of tariffs and trade barriers among nations - encouraged free and fair international trade through multilateral negotiations and trade agreements - established rules for resolving trade disputes and preventing discrimination - contributed to expansion of global markets economic cooperation and international trade liberalization - later evolved into the World Trade Organization in 1995.

20. Intellectual Property Rights- encourage innovation by granting legal protection and exclusive rights to creators and inventors - motivates investment in research development and technological advancement across industries - helps businesses gain competitive advantage and generate revenue through licensing and commercialization - attracts foreign investment and supports industrial growth employment generation and knowledge based economic development in modern economies.

21. Open-source software licensing- allows users to freely use modify and distribute software - promotes transparency collaboration and community driven innovation among developers worldwide - source code remains accessible encouraging improvement and error correction by users - licenses such as GPL and MIT ensure legal rights and responsibilities - reduces software costs and supports technological advancement and digital accessibility.

22. Digital piracy- involves unauthorized copying downloading and distribution of copyrighted content through the internet - causes major financial losses to software, music, film and publishing industries worldwide - rapid technological advancement and online file sharing platforms make enforcement difficult - piracy weakens incentives for creators and innovators - governments and companies use stricter cyber laws digital rights management and awareness campaigns to combat piracy.
