| Third Semester | Value Addition Course

Answer Key - Disaster Management (MG3VACSOC200)

Part A: Very Short Answers (Two Marks)

1. [U] / [CO3] Droughts lead to crop failure, water scarcity, and forced migration, severely affecting rural livelihoods and food security.
2. [An] / [CO2] Disaster management reduces environmental degradation by promoting sustainable use of natural resources and proactive mitigation planning.
3. [An] / [CO2] Integrating disaster education in schools fosters preparedness, civic responsibility, and long-term resilience against crises.
4. [An] / [CO2] The prevention phase focuses on identifying hazards and implementing structural and non-structural measures to minimize disaster impact.
5. [U] / [CO1] A disaster is a sudden disruptive event causing widespread human, material, and environmental losses exceeding local coping capacity.
6. [U] / [CO1] Social inequality, poverty, and poor governance elevate disaster risk by weakening resilience and adaptive capacity.
7. [An] / [CO5] Urban areas face infrastructure collapse; rural regions experience livelihood disruptions, reflecting different vulnerability dimensions.
8. [An] / [CO5] Elderly people face higher vulnerability due to health issues, dependency, and limited mobility during emergencies.
9. [An] / [CO6] The ‘Call for Help Early’ rule ensures immediate medical response and reduces fatalities in mass casualty situations.
10. [An] / [CO4] Development involves structured social and economic progress aiming to enhance quality of life and reduce vulnerability.
11. [An] / [CO4] Development and disaster are inversely related—progress builds resilience, while disasters reverse human gains.
12. [A] / [CO7] Applying local knowledge in crisis management integrates indigenous coping strategies with formal disaster preparedness efforts.
13. [E] / [CO9] Civil society ensures transparency and accountability in disaster relief operations through active participation and oversight.
14. [U] / [CO7] Risk society emphasizes global interdependence and human-made risks, reflecting uncertainty in modern industrial systems.
15. [U] / [CO8] Disaster management builds resilience by empowering communities to recover, adapt, and rebuild effectively after crises.

16. [A] / [CO7] Public sociology fosters awareness campaigns that mobilize citizens toward proactive disaster risk reduction efforts.

Part B: Short Essays (Six–Marks)

17a. Disasters are of two main types: **natural** (earthquakes, floods, cyclones, droughts) and **man-made** (industrial accidents, wars, chemical leaks).
Example: 2004 Indian Ocean Tsunami (natural) and 1984 Bhopal Gas Tragedy (man-made).**[U] / [CO1]. OR**

17b. A **hazard** is a potential threat that can cause harm. When combined with vulnerability and lack of preparedness, it results in a **disaster**, such as an earthquake causing loss of life and property.
[U] / [CO1]

18a. Disasters have severe **social and economic impacts on women**, increasing inequality, unemployment, and exclusion from decision-making. They also face heightened caregiving burdens and reduced livelihood options.
[An] / [CO5]. OR

18b. Legal awareness helps individuals understand their rights, duties, and available remedies. It promotes justice, gender equality, and participation in governance and community welfare.
[An] / [CO6]

19a. Participatory planning engages communities in disaster management by identifying risks, resources, and solutions. It ensures inclusive, context-based interventions and builds community resilience.
[An] / [CO6] OR

19b. Ethical media conduct during disasters demands accurate reporting, privacy protection, and avoidance of sensationalism. It supports relief coordination and public trust.
[E] / [CO9]

20a. Identifying **vulnerable populations** (elderly, women, children, differently abled) before disasters ensures targeted preparedness and reduces risk through focused resource allocation.
[U] / [CO8]. OR

20b. Mass media plays a vital role in mobilizing resources and volunteers by spreading awareness, coordinating aid, and inspiring public participation in relief activities.
[E] / [CO9]
