**Course: BSM 3rd Semester**
**Course Code: MG3DSCSMG201**
**Course Title: Sports Marketing**
**Exam: Regular Examination, October 2025 (2024 Admission Onwards)**
**Maximum Marks: 50**
**Duration: 1 Hour 30 Minutes**
**QP Code-25900645**

**Part A(Answer All questions )**

1.b
2.b
3.b
4.b
5.d
6.b
7.d
8.c
9.d
10.b

**Part B – Short Answer Questions (Answer any 10 questions)**

**Each question carries 2 marks.**

11. What are the repeat order and modified repeat in the business market?

Repeat Order: When a buyer purchases the same product from the same supplier without any changes in specifications, price, or terms. It is also known as a straight rebuy.

Modified Repeat (Modified Rebuy): When the buyer wants to change product specifications, price, delivery schedule, or supplier due to changed needs or dissatisfaction.

12. List any four elements of the marketing communication mix.

1. Advertising

2. Sales Promotion

3. Public Relations/Publicity

4. Personal Selling
(Other elements can include Direct Marketing and Digital Marketing.)

13. Explain the Holistic Marketing Concept.

Holistic marketing recognizes that everything matters in marketing and that a broad, integrated perspective is necessary. It considers four dimensions:

1. Relationship Marketing – building long-term relationships with stakeholders.

2. Integrated Marketing – ensuring consistency across all marketing activities.

3. Internal Marketing – motivating and training employees for customer satisfaction.

4. Socially Responsible Marketing – focusing on ethics, environment, and society.

14. How can a sports apparel company apply digital marketing in its strategy?

A sports apparel company can use digital marketing by:

Running social media campaigns to engage fans and athletes.

Using influencer marketing with sports personalities.

Creating e-commerce platforms for online sales.

Using SEO and targeted ads to reach specific customer groups.

Conducting email campaigns and content marketing for brand awareness.

15. List the various stages of the product development process.

1. Idea Generation

2. Idea Screening

3. Concept Development and Testing

4. Business Analysis

5. Product Development

6. Market Testing

7. Commercialization (Product Launch)

16. Distinguish between product line and product mix in sports organizations.

Product Line: A group of related products offered by a company under a single brand (e.g., Nike's line of running shoes).

Product Mix: The total range of products a company offers (e.g., Nike's mix includes shoes, apparel, accessories, and equipment).

17. Explain the significance of environmental analysis in marketing a football league.

Environmental analysis helps in:

Identifying opportunities (e.g., fan engagement, sponsorships).

Understanding threats (e.g., competition, regulatory changes).

Adapting strategies to political, economic, social, and technological trends.

Ensuring that marketing decisions align with the external environment and audience interests.

18. List any three bases used for market targeting.

1. Demographic Segmentation – age, gender, income, education, etc.

2. Psychographic Segmentation – lifestyle, values, personality.

3. Behavioral Segmentation – usage rate, brand loyalty, benefits sought.
(Geographic segmentation can also be a base.)

19. Explain alternatives with respect to the consumer decision-making process.

In the evaluation of alternatives stage, consumers compare different brands or products based on criteria such as:

Price

Quality

Features

Brand reputation
They select the best alternative that satisfies their needs and preferences.

20. Give a real-life example where effective feedback improved communication.

Example: In a sports team, a coach receives feedback from players that training sessions are too long. The coach shortens sessions and improves efficiency, leading to better performance.
This feedback loop enhances mutual understanding and communication effectiveness.

21. Differentiate desire from demand.

Desire: A wish to own a product or service (e.g., wanting a new sports bike).

Demand: When the desire is backed by the ability and willingness to pay for it (e.g., actually purchasing the bike).

22.How would you differentiate between exploratory, descriptive, and causal research designs?

1. Exploratory Research Design:

Used to explore or gain insights into a problem.

Helps identify new ideas or relationships.

Usually qualitative in nature (e.g., interviews, focus groups).

Example: Interviewing fans to understand reasons for declining match attendance.

2. Descriptive Research Design:

Describes characteristics of a population or phenomenon.

Quantitative in nature (e.g., surveys, observation).

Answers questions like “who,” “what,” “when,” and “where.”

Example: Survey to find out the percentage of fans who buy tickets online.

3. Causal Research Design:

Determines cause-and-effect relationships between variables.

Conducted through experiments.

Answers “why” and “how” questions.

Example: Testing whether increased advertising leads to higher ticket sales.

**Part C– Short Essay Questions (Answer any 4 questions)**

**Each question carries 5 marks.**

23.How relationship marketing becomes relevant with reference to a fitness studio

1. Building Long-Term Customer Loyalty:
Relationship marketing helps a fitness studio retain members by maintaining strong personal connections, offering customized workout plans, and recognizing loyal customers.

2. Personalized Communication:
Through regular follow-ups, fitness progress tracking, and personalized messages, members feel valued and motivated to continue.

3. Word-of-Mouth Promotion:
Satisfied members often refer friends and family, helping the studio attract new clients.

4. Continuous Engagement:

By organizing fitness challenges, reward programs, and social media interactions, the studio keeps members engaged and emotionally connected to the brand.

Q24. "Using an example of a new smartphone launch, illustrate how the marketing research process would be applied."

Example: Launch of a new Samsung Galaxy smartphone.

Marketing Research Process:

1. Defining the Problem:
Samsung wants to understand consumer preferences for battery life, camera quality, and price expectations before launching the new phone.

2. Developing the Research Plan:
Decide on data sources (primary and secondary), sampling methods, and research tools such as surveys, interviews, and focus groups.

3. Collecting the Data:
Conduct online surveys with potential customers, analyze competitors' phones, and gather sales data from dealers.

4. Analyzing the Data:
Evaluate consumer preferences—e.g., 60% value camera quality most, 25% prioritize battery life, and 15% focus on price.

5. Presenting the Findings:
Prepare a report showing insights and recommendations for marketing strategy, like emphasizing camera quality in promotions.

6. Making Marketing Decisions:
Based on research, Samsung designs promotional campaigns highlighting advanced camera features and sets a competitive price.

Conclusion:
The marketing research process ensures the new smartphone meets customer expectations and reduces the risk of product failure.

Q25. Differentiate Consumer Market from Business Market.

1. Meaning:

Consumer Market: Buyers purchase goods and services for personal use.

Business Market: Buyers purchase goods and services for resale or production purposes.

2. Type of Buyer:

Consumer Market: Individuals and households.

Business Market: Organizations, institutions, and companies.

3. Purchase Quantity:

Consumer Market: Small quantities.

Business Market: Large or bulk quantities.

4. Decision-Making:

Consumer Market: Influenced by emotions, brand image, and personal preferences.

Business Market: Based on logic, cost, and long-term value.

5. Nature of Demand:

Consumer Market: Direct demand (for final consumption).

Business Market: Derived demand (depends on consumer product demand).

6. Buying Process:

Consumer Market: Simple and quick.

Business Market: Complex and involves multiple decision-makers.

Q26. Explain why an integrated media promotional mix is important for successful sports event marketing.

Answer:

An Integrated Media Promotional Mix combines multiple communication tools (advertising, public relations, digital marketing, sponsorships, and social media) to deliver a unified brand message.

Importance in Sports Event Marketing:

1. Consistent Branding:
Ensures that all promotional messages—on TV, social media, print, and outdoor ads—deliver the same brand image.

2. Wider Reach:
Different media channels reach different audience segments (youth via Instagram, families via TV, etc.).

3. Enhanced Engagement:
Social media interaction, contests, and live updates create excitement and audience participation.

4. Improved Sponsorship Value:
Sponsors get maximum visibility across platforms, increasing event revenue.

5. Better Measurement:
Integrated campaigns can be tracked for effectiveness across various media channels.

Example:
For IPL (Indian Premier League), promotions through TV ads, YouTube highlights, team social media pages, and merchandise create a powerful integrated impact.

Q27. Why is market segmentation important for sports brands like Nike or Adidas when launching new products?

Market Segmentation divides the market into groups with similar characteristics such as age, gender, lifestyle, or income.

Importance for Nike or Adidas:

1. Targeted Marketing:
Allows the brand to focus on specific groups (e.g., youth athletes, casual wearers, or professionals).

2. Product Customization:
Different segments need different products — e.g., high-performance shoes for athletes, stylish sneakers for youth.

3. Efficient Resource Use:
Marketing budget can be effectively allocated to the most profitable segments.

4. Competitive Advantage:
Understanding niche markets helps brands design unique offerings.

5. Brand Loyalty:
Tailoring marketing strategies strengthens emotional connections with consumers.

Example:
Nike targets professional athletes with “Nike Zoom” and lifestyle users with “Nike Air” — both designed for different market segments.

Q28. Define globalization in the context of sports products.

Globalization in sports products refers to the worldwide integration of sports markets, where brands, products, and ideas flow across countries without barriers.

Key Points:

1. Global Brand Presence:
Sports brands like Adidas, Puma, and Nike operate and sell in multiple countries.

2. Standardized Products:
Same sports goods are available globally, creating a universal market.

3. Cross-Cultural Influence:
Designs and trends are influenced by international players and fans.

4. Increased Competition and Innovation:
Companies innovate constantly to meet global standards and consumer expectations.

5. Global Sponsorships:
Brands endorse international athletes and events to build a worldwide image.
