Name : .....

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) Regular EXAMINATION October 2025

Third SEMESTER

Discipline Specific Core Course (DSC) - MG3DSCSAC200 - SPEED, AGILITY, QUICKNESS AND PLYOMETRICS

(2024 ADMISSION ONWARDS)

Duration: 1 Hour 30 Minutes **Maximum Marks: 50**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

MCQ

Answer all questions

Each question carries **1** marks

1. SAQ is important for children because it: [K] / [CO2]

   a). Enhances motor skills b). Builds only strength

   c). Decreases flexibility d). Increases fatigue

2. SAQ improves: [U] / [CO2]

   a). Flexibility b). Speed, coordination, agility

   c). Endurance only d). Balance only

3. Anaerobic speed means: [K] / [CO3]

   a). Speed maintained without oxygen supply

   b). Speed with oxygen

   c). Long-distance pace

d). Endurance capacity

4. Which of the following is an example of an agility drill? [K] / [CO5]

a). Shuttle Run b). Bench press c). Deadlift d). Long jog

5. Anaerobic Speed Reserve is important in: [U] / [CO3]

a). Middle - distance running b). Archery c). Chess d). Yoga

6. Bag drills are MOST suitable for improving: [A] / [CO5]

a). Multidirectional movement b). Meditation

c). Aerobic endurance d). Flexibility

7. Plyometrics compared to resistance training: [U] / [CO4]

a). Reduces speed

b). Improves flexibility more

c). Increases endurance only

d). Improves explosive movement more effectively

8. Plyometrics can be used in rehabilitation to: [U] / [CO1]

a). Reduce coordination b). Restore functional movement

c). Lower mobility d). Avoid skill training

9. Bounding drills are designed to: [U] / [CO4]

a). Improve horizontal explosive power b). Increase static strength

c). Reduce agility d). Relax muscles

10. Plyometrics are MOST useful in: [U] / [CO4]

a). Archery b). Chess c). Yoga d). Jumping and sprinting

[1x10 = 10]

Part B

SHORT ANSWER QUESTIONS

Answer any **10** questions

Each question carries **2** marks

11.	Distinguish between speed and quickness?	[U] / [CO1]
12.	Discuss the effectiveness of SAQ over steady jogging for weight loss?	[U] / [CO2]
13.	Define agility.	[K] / [CO1]
14.	Which component of fitness is mainly improved by rope drills?	[K] / [CO5]
15.	State two key benefits of performing drop jumps.	[U] / [CO5]
16.	Explain the difference between acceleration speed and maximum speed.	[U] / [CO1]
17.	What are the benefit of bunny jumps?	[K] / [CO5]
18.	Explain how plyometrics enhance change of direction ability.	[U] / [CO4]
19.	Explain how exercise selection influences the effectiveness of plyometric training.	[U] / [CO5]
20.	Explain the importance of progression in plyometric design.	[U] / [CO1]
21.	Compare the use of resistance bands and weighted vests in plyometric exercises.	[An] / [CO5]
22.	Why is surface selection important for safe plyometric performance?	[U] / [CO1]

[2x10 = 20]

Part C

SHORT ESSAY QUESTION

Answer any **4** questions

Each question carries **5** marks

23.	Evaluate the role of SAQ in rehabilitation programs.	[E] / [CO1]
24.	Apply maximum anaerobic speed(MAS) profiling in designing a conditioning program for football players.	[A] / [CO3]
25.	Explain the principles of cone drills in enhancing agility.	[U] / [CO5]
26.	Define plyometric training and explain its fundamental purpose.	[U] / [CO4]
27.	Explain special considerations when designing plyometric programs for youth.	[U] / [CO5]
28.	Identify populations for whom plyometric training is contraindicated.	[K] / [CO4]

[5x4 = 20]
