MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) Regular EXAMINATION October 2025

Third SEMESTER

Value Addition Course(VAC) - MG3VACTXLA00 - TEXTILE PROCESSES

(2024 ADMISSION ONWARDS)

Duration: 1 hour 30 minutes **Maximum Marks: 50**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

MCQ

Answer all questions

Each question carries **1** marks

1. Which type of singeing is most commonly used in textile industry? [K] / [CO1]

   a). Gas singeing b). Plate singeing

   c). Roller singeing d). Chemical singeing

2. The most widely used bleaching agent for cotton is. [K] / [CO1]

   a). Sodium hypochlorite b). Hydrogen peroxide

   c). Sulphur dioxide d). Potassium permanganate

3. What is the primary purpose of applying a stain-resistant finish to textile fabrics? [U] / [CO2]

   a). To prevent liquids and dirt from penetrating the fabric b). To improve fabric colorfastness

   c). To enhance thermal insulation d). To increase fabric weight

4. Name what types of fibers is dope dyeing used for? [K] / [CO3]

   a). Natural fibers b). Synthetic fibers

   c). Blended fibers d). All fibers

5. Dip dyeing is best suited for. [K] / [CO3]

a). Knits only b). Garment dyeing and artistic designs

c). Industrial polyester dyeing d). Roller printing

6. Tumble dyeing is carried out in. [K] / [CO3]

a). Roller printing machine b). Rotating drum

c). Kier boiler d). Padding mangle

7. At which stage Top dyeing is being carried out? [K] / [CO3]

a). Fiber stage b). Sliver/top stage

c). Fabric stage d). Garment stage

8. Cross dyeing produces. [U] / [CO3]

a). Solid uniform color b). Multicolor effects on blended fabrics

c). Only black shades d). Colorless fabrics

9. The tool used to push paste through the screen is called.. [K] / [CO4]

a). Hammer b). Squeegee

c). Roller d). Brush

10. Rotary printing uses rotating _____ screens. [U] / [CO4]

a). Flat b). Cylindrical

c). Round d). Cube

[1x10 = 10]

Part B

Fill In the blanks

Answer all questions

Each question carries **1** marks

11. _____ mercerization is carried out under tension to avoid shrinkage. [U] / [CO1]

12. The removal of starch or other size material from fabric is called _____. [U] / [CO1]

13. Flame retardant finishes reduce the fabric's tendency to _____ when exposed to heat. [U] / [CO2]

14. Beam dyeing is limited to _____ weight fabrics. [U] / [CO3]

15. A disadvantage of stock dyeing is its high _____. [U] / [CO3]

16. Jet dyeing requires a _____ liquor ratio, saving water and energy. [K] / [CO3]

17. Skein dyeing produces yarn that is _____ in texture and suitable for hand-knitting. [U] / [CO3]

18. Pad dyeing requires further fixation steps like steaming, thermofixation, or _____ treatment. [U] / [CO3]

19. The two components used in naphthol dyeing are naphthol and _____. [K] / [CO3]

20. In block printing, design is transferred by repeated _____ of the block. [K] / [CO4]

[1x10 = 10]

Part C

One sentence

Answer all questions

Each question carries **1** marks

21. Define preparatory processes in textile finishing. [U] / [CO1]

22. Mention two uses of flocked fabrics. [U] / [CO1]

23. What is the process called that controls shrinkage in cotton by mechanical compression? [U] / [CO2]

24. Which fibers are commonly dyed using acid dyes? [U] / [CO3]

25. Mention two fibers suitable for basic dyes. [K] / [CO3]

26. Mention two advantages of reactive dyes. [K] / [CO3]

27. What is yarn stage dyeing? [K] / [CO3]

28. What are the common sources of natural dyes? [U] / [CO3]

29. What is jig dyeing? [K] / [CO3]

30. Mention two disadvantages of discharge printing. [K] / [CO4]

[1x10 = 10]

Part D

Short answer

Answer any **5** questions

Each question carries **2** marks

31. Name two types of fabrics that commonly undergo shearing and explain why. [U] / [CO1]

32. How does a water repellent finish differ from a waterproof finish? [U] / [CO2]

33. Why are vat dyes considered superior for denim dyeing? [U] / [CO3]

34. State any two limitation of winch dyeing. [K] / [CO3]

35. Mention two applications of direct dyes. [U] / [CO3]

36. Mention two advantages of roller printing. [U] / [CO4]

[2x5 = 10]

Part E

Long answer

Answer any **2** questions

Each question carries **5** marks

37. Discuss at least three advantages of napping and explain how they improve the performance or appeal of fabric. [U] / [CO1]

38. Discuss the advantages, limitations, and applications of disperse dyes. [U] / [CO3]

39. What are the advantages and disadvantages of package dyeing? [K] / [CO3]

40. Explain the process of duplex printing. [U] / [CO4]

[5x2 = 10]
