Name : .....

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) Regular EXAMINATION October 2025

Third SEMESTER

Discipline Specific Core Course (DSC) - MG3DSCZGY200,MG3DSCZIM200 - PROTISTAN DIVERSITY AND ANIMAL DIVERSITY - NON CHORDATA - I

(2024 ADMISSION ONWARDS)

Duration: 1 Hour 30 Minutes **Maximum Marks: 50**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple Choice Questions

Answer all questions

Each question carries **1** marks

1. The mode of transmission of *Ancylostoma duodenale* : [K] / [CO4]

   a). Ingestion of eggs b). Skin penetration

   c). Mosquito bite d). Sexual transmission

2. Identify the class to which Obelia belongs. [K] / [CO3]

   a). Hydrozoa b). Anthozoa

   c). Scyphozoa d). None of the above

3. Diatoms are often found as ----------. [K] / [CO1]

   a). White powdery coating on stones b). Brown slippery coating on submerged stones

   c). Black deposits on damp soils d). Green slimy coating on leaves

4. Which stage of Plasmodium is infectious to humans? [K] / [CO1]

   a). Gametocyte b). Trophozoite

c). Merozoite d). Sporozoite

5. How can the spread of amoebic dysentery be prevented? [U] / [CO1]

a). Using insect repellents b). Avoiding contact with infected animals

c). Maintaining hygiene and using clean drinking water d). Wearing masks in public places

6. Body symmetry of Porifera is ---------- [K] / [CO2]

a). Radial or asymmetrical b). Bilateral

c). Spherical d). Pentamerous radial

7. *Ascaris lumbricoides* belongs to which class of nematodes? [K] / [CO4]

a). Trematoda b). Aphasmidia

c). Phasmidia d). Acanthocephala

8. What is a distinctive morphological feature of Trichonympha? [K] / [CO1]

a). Chloroplasts and eyespot b). A single flagellum and contractile vacuole

c). A large number of flagella covering the body d). Pseudopodia for locomotion

9. In Protista, locomotion is affected by ----------. [K] / [CO1]

a). Pseudopodia b). Flagella

c). Cilia d). All the above

10. Which class of annelids shows ectoparasitic mode of life? [K] / [CO4]

a). Hirudinea b). Polychaeta

c). Archiannelida d). Oligochaeta

11. *Giardia intestinalis* belongs to : [K] / [CO1]

a). Phylum Metamonada b). Phylum Kinetoplasta

c). Phylum Opalina d). Phylum Ciliophora

12. Locomotion in Paramecium is carried out by …… [K] / [CO1]

a). Flagella b). Cilia

c). Tentacles d). Setae

[1x12 = 12]

Part B

Short Answer Questions

Answer any **6** questions

Each question carries **3** marks

13. Write an account on the adaptations of nematodes for parasitic life. [U] / [CO4]

14. Describe two structural features of the test of Foraminifera. [K] / [CO1]

15. Discuss on the economic importance of Red algae. [U] / [CO1]

16. Outline the public health significance of *Schistosoma haematobium.* [U] / [CO4]

17. Differentiate the Syconoid canal system from the Asconoid type in sponges. [U] / [CO2]

18. Describe the organ system level of organization in animals. [U] / [CO1]

19. Define alloiogenesis and explain it with a suitable example. [U] / [CO4]

20. Classify corals under their respective phylum and outline two distinguishing traits. [U] / [CO3]

[3x6 = 18]

Part C

Short Essay Questions

Answer any **4** questions

Each question carries **5** marks

21. Explain the locomotion, nutrition, and reproduction in Opalina. [U] / [CO1]

22. Write short notes on the structure and functions of comb plates and colloblasts. [U] / [CO3]

23. Explain the significance of conjugation. [U] / [CO1]

24. Discuss the burrowing adaptations of annelids with special reference to Polygordius. [U] / [CO4]

25. Discuss the types of coelom and explain their significance in the classification of animals. [U] / [CO2]

26. Discuss the parasitic adaptations of Phylum Platyhelminthes. [U] / [CO4]

[5x4 = 20]
