QP CODE: **25901034**

MGU-BVOC (HONOURS) Regular EXAMINATION November 2025

First Semester

Skill Development Components (SDC) - MG1SDCBTX102 - INTRODUCTION TO ICT

(2025 ADMISSION ONWARD

SCHEME FOR VALUATION

Time: 1.30 Hours Max. Marks: 50

Part A

Answer any 10 questions. Each question carries 1 mark.

1. **What does ALU stand for?**
   Arithmetic Logic Unit
2. **Name the two main types of software.**
   System Software and Application Software
3. **Name any two input devices.**
   Keyboard, Mouse
   (Other answers like Scanner, Microphone are also acceptable)
4. **What is the use of the Mailings tab?**
   Used for creating mail merge documents.
5. **Which tab in MS Word is used for changing the orientation of pages?**
   Page Layout / Layout tab
6. **Comment on Print Layout viewing option.**
   It shows how the document will look when printed.
7. **What is the purpose of Microsoft PowerPoint?**
   To create presentations.
8. **Which tab helps in checking spellings and protecting worksheets?**
   Review tab
9. **How many rows are there in an Excel worksheet?**
   1,048,576 rows
10. **What is the function of the Formula Bar in Excel?**
    Used to enter and edit formulas or data in a cell.
11. **Which pane shows the full layout of a slide?**
    Slides Pane / Slide Thumbnails Pane
12. **List any two elements that can be added to a PowerPoint slide.**
    Text, Images
    (Others acceptable: Charts, Tables, Audio, Video, Shapes)

Part B Short Essay Questions

Answer any 4 questions. Each question carries 5 marks

13. Explain the main functions of the Insert tab.

- The Insert tab is used to add various elements into a Word document.
- **Pages group:** Insert cover page, blank page, page break.

- **Tables group:** Insert and format tables.
- **Illustrations group:** Add pictures, shapes, icons, SmartArt, and charts.
- **Links group:** Insert hyperlinks, bookmarks, and cross-references.
- **Header & Footer group:** Insert headers, footers, and page numbers.
- **Text group:** Add text box, WordArt, date/time, symbols.
- **Media group:** Insert online videos or media files.

14. Briefly explain the major components of an ICT system.

- **Hardware:** Physical components like CPU, keyboard, monitor, printer.
- **Software:** System software (OS) and application software.
- **Data:** Raw facts processed to generate information.
- **People:** Users such as operators, administrators, programmers.
- **Procedures:** Rules, policies, and instructions for using ICT systems.
- **Networks/Connectivity:** Communication channels connecting devices and sharing data.

15. Explain the components of MS Word.

- **Title Bar:** Displays document name and application name.
- **Ribbon:** Contains tabs like Home, Insert, Layout, etc., each with tools.
- **Quick Access Toolbar:** Provides shortcuts for commands like save, undo.
- **Workspace / Document Area:** Main area where text is typed.
- **Status Bar:** Shows page number, word count, language, and zoom controls.
- **Scroll Bars:** Allow vertical and horizontal movement through the document.

16. Mention the role of the Formulas Tab in Excel.

- Provides tools for entering formulas and functions.
- **Function Library:** Groups like Math, Text, Logical, Date & Time, Lookup.
- **Defined Names:** Create and manage named ranges.
- **Formula Auditing:** Trace precedents, dependents, show formulas.
- **Calculation group:** Set calculation options—automatic or manual.
- Helps users perform complex calculations efficiently.

17. List out important input devices.

- **Keyboard:** Primary input device for text entry.
- **Mouse:** A Pointing device for navigation.
- **Scanner:** Converts physical documents into digital format.
- **Microphone:** Captures audio input.
- **Webcam:** Captures video input.
- **Joystick / Trackball / Light pen:** Used for gaming or design tasks.

18. What are some common disadvantages of using PowerPoint during presentations?

- Overdependence on slides may reduce interaction with the audience.

- Too many animations or effects can distract viewers.
- Technical issues like projector failure or software crashes.
- May encourage text-heavy slides leading to boring presentations.
- Not suitable for spontaneous or discussion-based sessions.

Part C Long Essay
Answer any 2 questions. Each question carries 10 marks

19. Define Information Technology (IT) and Information and Communication Technology (ICT). Explain the differences between them.

Definition of IT (Information Technology):

- IT refers to the use of computers, software, storage, and networks for creating, processing, storing, retrieving, and securing information.
- Focuses mainly on information processing using technological tools.

Definition of ICT (Information and Communication Technology):

- ICT is an extension of IT that includes communication technologies.
- It covers tools that enable communication, sharing, and transmission of information (email, internet, mobile technology, networks).

Differences between IT and ICT:

1. **Scope:**
   - *IT* focuses mainly on information processing technologies.
   - *ICT* includes IT + communication technologies.
2. **Components:**
   - *IT* includes hardware, software, and databases.
   - *ICT* includes IT components plus communication devices like routers, modems, and internet services.
3. **Purpose:**
   - *IT* aims at data processing and information management.
   - *ICT* aims at communication, connectivity, and information exchange.
4. **Usage Areas:**
   - *IT:* Data centres, computing operations, programming.
   - *ICT:* Online communication, telecommunication, video conferencing.
5. **Interaction:**
   - *IT* focuses on computers.
   - *ICT* focuses on connecting people via technology.
6. **Examples:**
   - *IT:* MS Office, database software, computer systems.
   - *ICT:* Internet, email, mobile communication, social media tools.
7. **Outcome:**
   - *IT* improves information processing.
   - *ICT* improves collaboration and communication using technology.

20. Describe the Review tab and explain its usefulness in proofreading and collaborative work.

Review Tab:

- The Review tab in MS Word provides tools for proofreading, editing, and collaboration.
- Helps maintain accuracy, grammar, and consistency in documents.

Main Tools in Review Tab:

1. Spelling & Grammar:
    - Checks for spelling mistakes and grammatical errors.
2. **Thesaurus:**
    - Provides synonyms and antonyms to improve vocabulary.
3. **Word Count:**
    - Displays number of words, pages, characters, lines.
4. **Track Changes:**
    - Records all edits made in the document.
    - Useful for reviewing changes suggested by editors or collaborators.
5. **Comments:**
    - Allows users to add notes or feedback without modifying the text.
6. **Accept/Reject Changes:**
    - Helps in finalizing edits by approving or discarding tracked changes.
7. **Protect Document:**
    - Restricts editing or grants specific permissions to users.
8. **Language Tools:**
    - Translate, set proofing language, and language preferences.
9. **Compare & Combine Documents:**
    - Compare two versions of a document or merge changes from multiple authors.

Usefulness in Proofreading:

- Corrects spelling and grammar errors.
- Enhances clarity and accuracy of content.
- Helps maintain uniform writing style.

Usefulness in Collaborative Work:

- Track Changes allows multiple people to edit the same document.
- Comments facilitate communication between authors, editors, or reviewers.
- Protect Document ensures controlled access and prevents unauthorised changes.
- Compare/Combine helps when multiple versions are created.

21. Discuss the advantages and disadvantages of using MS Excel in modern workplaces.

Advantages of MS Excel:

1. **Easy Data Entry & Storage:**
    - Simple interface for organizing large amounts of data.
2. **Powerful Calculation Tools:**

    - Supports formulas, functions, and complex calculations.
3. **Data Analysis:**
    - Tools like PivotTables, filters, sorting enable data interpretation.
4. **Charting & Visualization:**
    - Graphs and charts help present data visually.
5. **Automation:**
    - Macros and functions save time and reduce manual effort.
6. **Widely Used:**
    - Universal acceptance in industries ensures compatibility.
7. **Flexible Formatting:**
    - Custom formatting, conditional formatting for better clarity.

Disadvantages of MS Excel:

1. **Error-Prone:**
    - Manual entry may lead to mistakes affecting entire datasets.
2. **Not Suitable for Very Large Data:**
    - Slows down with extremely large data sets compared to databases.
3. **Limited Multi-User Collaboration:**
    - Not ideal for simultaneous multi-user editing (unless using cloud).
4. **Security Issues:**
    - Files can be easily edited or corrupted if not properly protected.
5. **Complexity for Beginners:**
    - Advanced features require training and practice.
6. **Version Compatibility:**
    - Different versions may cause formatting or feature issues.
