MAHATMA GANDHI UNIVERSITY, KOTTAYAM
MGU-UGP (HONOURS) REGULAR/IMPROVEMENT/REAPPEARANCE
EXAMINATION NOVEMBER 2025
FIRST SEMESTER
Discipline Specific Core Course (DSC)

MG1DSCCMA101 – INTRODUCTION TO WEB DESIGNING
(2024 ADMISSION ONWARDS)

Duration: 1 hour 30 Minutes **Maximum Marks: 50**

ANSWER KEY

PART A – VERY SHORT ANSWERS (1 mark each)

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation (Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Very Short Answer Questions Answer **All** Questions. Each Question carries 2 marks

1. Which attributes of <marquee> control the direction of the scrolling text? [U]/[CO1]
The direction attribute controls the direction (left, right, up, down).

2. Give the purpose of HTML5 <aside> element? [U]/[CO2]
The <aside> element is used for indirect or sidebar content related to the main content (e.g., ads, related links, notes).

3. Write the value you would use for the font-style property to ensure normal text styling. [U]/[CO3]
Use font-style: normal;

4. What is the role of Semantic Web? [K]/[CO1]
The Semantic Web makes web content machine-readable, enabling better automation, data integration, and intelligent search.

5. Imagine you're creating an article with sections and subsections. Which heading tags would you use to ensure a clear hierarchy of information? [U/[CO1]
Use <h1> for title, <h2> for sections, <h3> for subsections, and so on up to <h6>.

6. Name the two primary categories of web pages. [K]/[CO1]

1. Static web pages
2. Dynamic web pages

7. In an external CSS file <h1> heading is styled red and a class selector sets it to blue, but it still appears green. What might be the reason? [U]/[CO3]
A higher priority rule is overriding both—likely inline CSS.

8. Identify the use of input type="email" in HTML5. [K]/[CO2]
It accepts and validates email-format input (e.g., user@example.com).

9. Identify the use of <navi> tag? [U]/[CO2]
<nav> is used to define navigation links, such as menus or navigation bars. Mistake in tag hence marks can be given if attempted

10. Name the property that is used to set the width of an element's border. [U]/[CO3]
border-width

PART B – SHORT ANSWERS (5 marks each)
Answer any FOUR questions

11. Differentiate between Internal and External Linking. [U]/[CO1]
Internal Linking:
- Links to pages within the same website.
- Helps navigation and keeps users on the site.

External Linking:
- Links to other websites.
- Used for references, resources, and citations.

12. Which type of selector would you choose for elements that require unique styling like header and why? [U]/[CO3]
Use an ID selector (#header).
IDs are unique within an HTML document, making them ideal for elements that must have distinct styling.

13. Explain how we can allow users to select multiple options in a form. Illustrate with an example. [U]/[CO2]
Use either checkboxes or <select multiple>.
Example using <select multiple>:

```
<select name="skills" multiple>
  <option>HTML</option>
  <option>CSS</option>
  <option>JavaScript</option>
</select>
```

14. What is the use of text-shadow in CSS? [U]/[CO3]
text-shadow adds shadow effects to text to create depth, glow, or highlight effects.
Example:
text-shadow: 2px 2px 4px gray;

15. Explain the role of <script> tag and where it is typically placed in an HTML document. [U]/[CO2]

- The <script> tag is used to embed or link JavaScript.
- It is usually placed before the closing </body> tag to improve loading performance.
- Can be placed in <head> when necessary.

16. What are the reasons for using Proxy Servers? [K]/[CO1]
Proxy servers are used for:

- Security and anonymity
- Caching and improving performance
- Access control
- Content filtering
- Bypassing restrictions

PART C – ESSAY QUESTIONS (10 marks each)
Answer any TWO questions

17. Create HTML code for the given table as shown below. [U]/[CO1]

```
<table border="1">
  <tr>
    <th>Year</th>
    <th>Gender</th>
    <th>BCA</th>
  </tr>
  <tr>
    <td rowspan="2">2022</td>
    <td>Boys</td>
    <td>55</td>
  </tr>
  <tr>
    <td>Girls</td>
    <td>50</td>
  </tr>
  <tr>
    <td rowspan="2">2023</td>
    <td>Boys</td>
    <td>50</td>
  </tr>
```

```
  <tr>
    <td>Girls</td>
    <td>45</td>
  </tr>
</table>
```

18. Describe the role of navigation (Navi), audio, video elements in advanced multimedia content and how it transformed the web designing and user experience. State the implications of these advancements for both developers and users. [U]/[CO2]

Modern multimedia elements have significantly transformed web design:

- <nav> organizes navigation links, improving structure, accessibility, and ease of use.
- <audio> and <video> allow embedded media without plugins like Flash.
- Provide controls (play/pause), captions, streaming, and responsiveness.

Transformation of Web Design & User experience:

- Websites became interactive, rich, and engaging.
- Enhances learning, entertainment, and accessibility.
- Provides a more immersive user experience.

Implications for Developers:

- Easier integration of multimedia.
- Consistent behavior across browsers.
- Reduced reliance on third-party plugins.

Implications for Users:

- Faster, smoother media playback.
- Better accessibility features.
- Improved navigation and usability.

Mistake in Nav tag hence a minimum of 3.5 may be given if attempted.

19. Discuss the significance of using CSS for Web Development. [U]/[CO3]

CSS is essential because:

- Separates content and design for cleaner structure.
- Enables consistent styling across multiple web pages.
- Allows responsive design for mobile, tablet, and desktop.
- Supports advanced layouts like Flexbox and Grid.
- Reduces repeated code and speeds up development.
- Enhances appearance with animations, effects, colors, and typography.
- Improves user experience by creating visually appealing and readable pages.
