MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR /IMPROVEMENT/ REAPPEARANCE EXAMINATION NOVEMBER 2025

FIRST SEMESTER

Multi-Disciplinary Courses (MDC) - MG1MDCECT101 - FOUNDATION OF AI AUTOMATION

(2024 ADMISION ONWARDS)

Duration: 1 Hours **Maximum Marks: 35**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple Choice Questions

Answer any **35** Questions

Each Question carries **1** mark

1. Which of the following is NOT a type of AI? [U] / [CO1]

   a). Weak AI b). Strong AI c). Moderate AI d). General AI

2. How many neurons approximately exist in the human brain? [U] / [CO1]

   a). 10 million b). 100 billion c). 1 billion d). 10 trillion

3. What event led to the first AI winter in the 1970s? [U] / [CO1]

   a). The Dartmouth Conference b). The Lighthill report c). MYCIN d). AI advancements

4. What is machine learning primarily focused on? [A] / [CO1]

a). Storing data b). Predicting outcomes c). Creating AI systems d). Analyzing data

5. Which technology is often associated with Narrow AI? [K] / [CO1]

a). Quantum computing b). Machine learning c). The Internet of Things d). Blockchain

6. Which type of AI is capable of performing a specific task? [A] / [CO1]

a). Strong AI b). Narrow AI c). General AI d). Super AI

7. Which of the following is an example of a deep neural network? [A] / [CO1]

a). A neural network with no hidden layers b). A neural network with one hidden layer c). A neural network with multiple hidden layers d). A neural network with an output layer only

8. What does Generative AI primarily do? [U] / [CO1]

a). Generate new data b). Analyze existing data c). Organize data d). Store data

9. What is the primary benefit of using AI in autonomous vehicles? [K] / [CO2]

a). Lower manufacturing costs b). Increased fuel consumption c). Improved safety and decision-making d). Slower navigation

10. How does AI improve customer service in financial institutions? [U] / [CO2]

a). By automating customer queries using chatbots b). By making human representatives obsolete c). By increasing the number of customer service agents d). By providing legal services

11. How does AI assist with vehicle-to-everything (V2X) communication? [K] / [CO2]

a). By allowing vehicles to communicate with infrastructure and other vehicles b). By increasing vehicle emissions c). By replacing human drivers with robots d). By reducing the need for wireless networks

12. Which AI-based technology can dynamically create new storylines in games or interactive entertainment? [U] / [CO2]

a). Convolutional Neural Networks (CNNs)	b). Procedural Content Generation (PCG)	c). K-Nearest Neighbors (KNN)	d). Supervised Learning

13. What is the main advantage of using AI in credit scoring? [A] / [CO2]

a). Complete automation of the credit approval process	b). Ability to analyze both structured and unstructured data for better predictions	c). AI replaces all credit analysts	d). AI ensures no errors in credit approval

14. Which of the following is NOT a challenge in using AI in healthcare? [U] / [CO2]

a). Data privacy concerns	b). High-quality data availability	c). Regulatory hurdles	d). Cost-effectiveness

15. Which AI application helps to generate personalized playlists on music streaming platforms? [U] / [CO2]

a). Speech Recognition	b). Generative Adversarial Networks (GANs)	c). Machine Learning algorithms using user listening patterns	d). Image Recognition

16. Which AI application can assist healthcare providers with administrative tasks? [U] / [CO2]

a). Image recognition	b). Predictive analytics	c). Chatbots	d). Genome sequencing

17. Why is vendor reputation significant in AI tool selection? [U] / [CO2]

a). It indicates their market size	b). It reflects their trustworthiness and reliability	c). It shows their marketing expertise	d). It lowers subscription fees

18. What is Word Embedding in NLP? [A] / [CO2]

a). A method to visualize sentences	b). A technique for representing words in high-dimensional space	c). A function that predicts the next word in a sentence	d). A grammar checking method

19. What is the benefit of asking specific questions? [U] / [CO2]

a). They confuse the AI	b). They provide targeted information	c). They limit the AI's responses	d). They require longer answers

20. DALL-E can generate images that include: [U] / [CO2]

a). Only realistic objects	b). Any concept described in text	c). Only abstract designs	d). Images from uploaded photographs

21. What should a user do if ChatGPT provides incorrect information? [U] / [CO2]

a). Report the issue	b). Always trust the information	c). assume it’s the correct answer	d). Continue using the same response

22. Can Playground AI generate animations? [U] / [CO2]

a). Yes, always	b). No, it only generates static images	c). Only if specified in the prompt	d). Yes, but only short clips

23. What role does community support play in selecting an AI tool? [U] / [CO2]

a). It enhances security	b). It provides quicker resolutions to issues	c). It increases the tool's popularity	d). It improves visual design

24. What should you do if you want to provide feedback on ChatGPT? [U] / [CO2]

a). Complain to friends	b). Submit feedback through official channels	c). Post it on social media	d). Ignore it

25. In NLP, what is the purpose of stop-word removal? [U] / [CO2]

a). To keep only meaningful words and remove common, insignificant words	b). To improve speech recognition accuracy	c). To translate text more efficiently	d). To predict the next word

26. In content generation, fine-tuning refers to: [U] / [CO2]

a). Modifying the output style of the AI model	b). Adjusting hyperparameters of the AI model	c). Personalizing the model to	d). Changing the model's architecture

generate domain-specific content

27. How does AI improve SEO content generation? [U] / [CO2]

a). By generating viral images | b). By analyzing keywords and optimizing text for search engine ranking | c). By producing complex 3D models | d). By predicting stock market trends

28. How does AI help in human resources (HR) automation? [U] / [CO2]

a). By interviewing candidates | b). By automating resume screening, employee onboarding, and performance reviews | c). By scheduling daily office cleaning | d). By designing company advertisements

29. What benefit does AI provide for email management? [U] / [CO2]

a). It allows manual sorting of emails | b). It can automate sorting, replying, and prioritizing emails based on content and urgency | c). It increases email storage | d). It tracks email senders in real-time

30. Can ChatGPT help in generating unit tests? [U] / [CO2]

a). Yes, it can generate unit tests for provided code | b). No, it cannot generate tests | c). Only for Java | d). Only for web applications

31. What is the primary benefit of using AI like MidJourney for image creation? [U] / [CO2]

a). It is free for everyone | b). It can generate unique and creative images quickly | c). It requires no artistic input | d). It can replace professional artists

32. How does DALL-E learn to generate images? [U] / [CO2]

a). Through manual input from | b). By analyzing existing images | c). By using user feedback only | d). Through gaming techniques

artists	and text descriptions		

33. Which of the following is not a feature of ChatGPT? [U] / [CO2]

a). Answering Questions	b). composing music	c). translating languages	d). writing essay

34. In classification, the output is usually [K] / [CO3]

a). A category or label	b). A number	c). A list of features	d). A set of clusters

35. What is "digital footprint"? [E] / [CO3]

a). Physical traces of online activity	b). The information left by users online	c). The hardware used for browsing	d). The speed of internet connection

36. What does "social responsibility" refer to in AI? [U] / [CO3]

a). Focusing on profits only	b). Considering the impact of AI on society	c). Ignoring ethical concerns	d). Keeping technology secret

37. How can AI affect employment? [U] / [CO3]

a). It can create new job opportunities	b). It always leads to job loss	c). It has no effect on jobs	d). It makes jobs easier

38. What does "training an agent" mean? [K] / [CO3]

a). Teaching it to follow rules	b). Allowing it to learn from experience	c). Giving it labeled data	d). Storing data

39. Why is ethical decision-making important in AI? [U] / [CO3]

a). To create complex algorithms	b). To ensure fairness and trust	c). To increase profits	d). To ignore user concerns

40. What is a "feature"? [E] / [CO3]

a). An output of the model	b). A property of the data	c). The algorithm used	d). The data size

[35X1=35]

Duration: 1 Hours **Maximum Marks: 35**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple Choice Questions

Answer any **35** Questions

Each Question carries **1** mark

1. What is machine learning primarily focused on? [A] / [CO1]

   a). Storing data b). Predicting outcomes c). Creating AI systems d). Analyzing data

2. What should a user do if ChatGPT provides incorrect information? [U] / [CO2]

   a). Report the issue b). Always trust the information c). assume it's the correct answer d). Continue using the same response

3. What is the main advantage of using AI in credit scoring? [A] / [CO2]

   a). Complete automation of the b). Ability to analyze both structured and c). AI replaces all credit analysts d). AI ensures no errors in credit approval

credit approval process	unstructured data for better predictions		

4. What role does community support play in selecting an AI tool? [U] / [CO2]

a). It enhances security	b). It provides quicker resolutions to issues	c). It increases the tool's popularity	d). It improves visual design

5. What is the primary benefit of using AI in autonomous vehicles? [K] / [CO2]

a). Lower manufacturing costs	b). Increased fuel consumption	c). Improved safety and decision-making	d). Slower navigation

6. Why is ethical decision-making important in AI? [U] / [CO3]

a). To create complex algorithms	b). To ensure fairness and trust	c). To increase profits	d). To ignore user concerns

7. Which of the following is NOT a challenge in using AI in healthcare? [U] / [CO2]

a). Data privacy concerns	b). High-quality data availability	c). Regulatory hurdles	d). Cost-effectiveness

8. Can Playground AI generate animations? [U] / [CO2]

a). Yes, always	b). No, it only generates static images	c). Only if specified in the prompt	d). Yes, but only short clips

9. What does Generative AI primarily do? [U] / [CO1]

a). Generate new data	b). Analyze existing data	c). Organize data	d). Store data

10. Which technology is often associated with Narrow AI? [K] / [CO1]

a). Quantum computing	b). Machine learning	c). The Internet of Things	d). Blockchain

11. What does "social responsibility" refer to in AI? [U] / [CO3]

a). Focusing on profits only	b). Considering the impact of AI on society	c). Ignoring ethical concerns	d). Keeping technology secret

12. What should you do if you want to provide feedback on ChatGPT? [U] / [CO2]

a). Complain to friends	b). Submit feedback through official channels	c). Post it on social media	d). Ignore it

13. DALL-E can generate images that include: [U] / [CO2]

a). Only realistic objects	b). Any concept described in text	c). Only abstract designs	d). Images from uploaded photographs

14. What is Word Embedding in NLP? [A] / [CO2]

a). A method to visualize sentences	b). A technique for representing words in high-dimensional space	c). A function that predicts the next word in a sentence	d). A grammar checking method

15. How does AI improve customer service in financial institutions? [U] / [CO2]

a). By automating customer queries using chatbots	b). By making human representatives obsolete	c). By increasing the number of customer service agents	d). By providing legal services

16. Which of the following is not a feature of ChatGPT? [U] / [CO2]

a). Answering Questions	b). composing music	c). translating languages	d). writing essay

17. Which AI-based technology can dynamically create new storylines in games or interactive entertainment? [U] / [CO2]

a). Convolutional Neural Networks (CNNs)	b). Procedural Content Generation (PCG)	c). K-Nearest Neighbors (KNN)	d). Supervised Learning

18. What is the primary benefit of using AI like MidJourney for image creation? [U] / [CO2]

a). It is free for everyone	b). It can generate unique and creative images quickly	c). It requires no artistic input	d). It can replace professional artists

19. What is "digital footprint"? [E] / [CO3]

a). Physical traces of online	b). The information left by	c). The hardware used for	d). The speed of internet

activity	users online	browsing	connection

20. Which AI application helps to generate personalized playlists on music streaming platforms? [U] / [CO2]

a). Speech Recognition	b). Generative Adversarial Networks (GANs)	c). Machine Learning algorithms using user listening patterns	d). Image Recognition

21. How does AI help in human resources (HR) automation? [U] / [CO2]

a). By interviewing candidates	b). By automating resume screening, employee onboarding, and performance reviews	c). By scheduling daily office cleaning	d). By designing company advertisements

22. In classification, the output is usually [K] / [CO3]

a). A category or label	b). A number	c). A list of features	d). A set of clusters

23. Which of the following is an example of a deep neural network? [A] / [CO1]

a). A neural network with no hidden layers	b). A neural network with one hidden layer	c). A neural network with multiple hidden layers	d). A neural network with an output layer only

24. In content generation, fine-tuning refers to: [U] / [CO2]

a). Modifying the output style of the AI model	b). Adjusting hyperparameters of the AI model	c). Personalizing the model to generate domain-specific content	d). Changing the model's architecture

25. How can AI affect employment? [U] / [CO3]

a). It can create new job opportunities	b). It always leads to job loss	c). It has no effect on jobs	d). It makes jobs easier

26. How many neurons approximately exist in the human brain? [U] / [CO1]

a). 10 million	b). 100 billion	c). 1 billion	d). 10 trillion

27. What event led to the first AI winter in the 1970s? [U] / [CO1]

a). The Dartmouth Conference | b). The Lighthill report | c). MYCIN | d). AI advancements

28. How does AI assist with vehicle-to-everything (V2X) communication? [K] / [CO2]

a). By allowing vehicles to communicate with infrastructure and other vehicles | b). By increasing vehicle emissions | c). By replacing human drivers with robots | d). By reducing the need for wireless networks

29. How does AI improve SEO content generation? [U] / [CO2]

a). By generating viral images | b). By analyzing keywords and optimizing text for search engine ranking | c). By producing complex 3D models | d). By predicting stock market trends

30. What is the benefit of asking specific questions? [U] / [CO2]

a). They confuse the AI | b). They provide targeted information | c). They limit the AI's responses | d). They require longer answers

31. Which of the following is NOT a type of AI? [U] / [CO1]

a). Weak AI | b). Strong AI | c). Moderate AI | d). General AI

32. Which AI application can assist healthcare providers with administrative tasks? [U] / [CO2]

a). Image recognition | b). Predictive analytics | c). Chatbots | d). Genome sequencing

33. In NLP, what is the purpose of stop-word removal? [U] / [CO2]

a). To keep only meaningful words and remove common, insignificant words | b). To improve speech recognition accuracy | c). To translate text more efficiently | d). To predict the next word

34. Can ChatGPT help in generating unit tests? [U] / [CO2]

a). Yes, it can generate unit tests for provided code | b). No, it cannot generate tests | c). Only for Java | d). Only for web applications

35. Which type of AI is capable of performing a specific task? [A] / [CO1]

a). Strong AI | b). Narrow AI | c). General AI | d). Super AI

36. What does "training an agent" mean? [K] / [CO3]

a). Teaching it to follow rules | b). Allowing it to learn from experience | c). Giving it labeled data | d). Storing data

37. What benefit does AI provide for email management? [U] / [CO2]

a). It allows manual sorting of emails | b). It can automate sorting, replying, and prioritizing emails based on content and urgency | c). It increases email storage | d). It tracks email senders in real-time

38. How does DALL-E learn to generate images? [U] / [CO2]

a). Through manual input from artists | b). By analyzing existing images and text descriptions | c). By using user feedback only | d). Through gaming techniques

39. Why is vendor reputation significant in AI tool selection? [U] / [CO2]

a). It indicates their market size | b). It reflects their trustworthiness and reliability | c). It shows their marketing expertise | d). It lowers subscription fees

40. What is a "feature"? [E] / [CO3]

a). An output of the model | b). A property of the data | c). The algorithm used | d). The data size
