25900805 A

MAHATMA GANDHI UNIVERSITY, KOTTAYAM
MGU-UGP (HONOURS) REGULAR /IMPROVEMENT/ REAPPEARANCE EXAMINATION NOVEMBER 2025
FIRST SEMESTER
Multi-Disciplinary Courses (MDC) - MG1MDCECT102 - DATA ANALYTICS
(2024 ADMISION ONWARDS)
Duration: 1 Hours Maximum Marks: 35
Scheme
SERIES A
Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)
Part A
Multiple Choice Questions
Answer any 35 Questions Each Question carries 1 mark

Q No	Question	Answer	(Level / CO)
1	What is an effective way to mitigate risks associated with multimedia data?	b) Regularly updating data formats and ensuring security measures are in place	U / CO1
2	Name one outcome of effectively using big data in organizations.	b)Enhanced operational efficiency	U / CO1
3	Identify a scenario where secondary data is used.	b) Reviewing historical documents for trends	U / CO1
4	Which of the following best describes quantitative data?	c)Data that can be measured and expressed numerically	K / CO1
5	Select the process used to remove inaccuracies or inconsistencies from raw data.	b)Data cleaning	U / CO1
6	Which sector has significantly benefited from data analytics in recent years?	c)All sectors, including healthcare, finance, and marketing	K / CO1
7	What is one way data analytics can enhance customer satisfaction?	b)By personalizing customer experiences	U / CO1
8	In what way is numerical data typically used in predictive analytics?	c)By identifying relationships between variables and making forecasts	U / CO1
9	Which of the following is an example of qualitative data?	c) Product satisfaction level (e.g., "satisfied", "dissatisfied").	K / CO1
10	Identify a scenario where secondary data is used.	b)Reviewing historical documents for trends	U / CO1
11	Recognize the relationship between discrete data and counting.	b)Discrete data comes from counting individual units	U / CO1
12	Identify how navigation data can be visualized in descriptive analytics.	d)By creating heat maps of historical traffic congestion and movement patterns	U / CO1

13	It is true that effective interpretation of data in predictive analytics requires:	c). An understanding of business context and objectives	U / CO1
14	Recognize a key characteristic of secondary data.	b). It is collected by someone else for a different purpose	U / CO1
15	When exporting data to a PDF, which option allows you to specify what part of the workbook to export?	b). Export Selection	U / CO1
16	Recognize a type of variable that is discrete.	a). The number of books in a library	U / CO1
17	If you want to save a copy of the current workbook in a different location, which command should you use?	c). Save As	U / CO1
18	Name the type of data that primary data refers to.	c). Data collected firsthand by the researcher	K / CO2
19	How do diagnostic and prescriptive analytics differ fundamentally?	b)Diagnostic analytics focuses on "what happened" while prescriptive focuses on "what should be done"	A / CO1
20	What action would you take to modify a scatter plot to better display a relationship between two variables?	a)Add a trend line to the scatter plot	A / CO1
21	Which of the following tools or techniques is commonly used for de-duplication in databases?	b) Hashing algorithms	K / CO1
22	When creating a histogram, which action will provide more detailed insight into the distribution of your data?	b)Decrease the bin width to create more intervals for better precision	U / CO1
23	If you have a pie chart showing department expenditures, and you want to display the percentage of total for each category, what feature would you use?	a)Add data labels and choose the option to show percentages	A / CO1
24	Which of the following steps would you take to visualize monthly temperature data over the past year using a Line Chart in Excel?	b)Insert a line chart and choose the monthly temperature data as the source.	K / CO1
25	Which action would you take to make a bar graph easier to interpret if it has too many categories?	b)Group similar categories or limit the number of bars displayed	U / CO1
26	You are working with a dataset where feature A has a range between 10 & 100, and feature B has a range between 0.01 & 0.1. Which step would apply to make the features comparable?	b)Standardize both features so they have a mean of 0 and standard deviation of 1	A / CO1
27	What is the primary goal of data preprocessing?	b)To clean and prepare raw data for analysis	K / CO1
28	When importing data from a text file, which delimiter is commonly used?	d)Both A and B (Semicolon and Comma)	K / CO1
29	You want to display a column chart showing the number of units sold by different sales representatives. How can you ensure that the chart dynamically updates as you add more sales data?	b)Use a named range or Excel table to automatically adjust the chart data	A / CO1

30	Which of the following is an advantage of using surveys for data collection?	b)They provide quick access to large amounts of data	K / CO1
31	You want to add a line of best fit to your scatter chart to make predictions based on your data. Which of the following should you do?	b)Insert a trendline that fits the data	A / CO1
32	Which formatting option allows you to shade cells based on their values relative to others?	a)Color Scales	K / CO1
33	What is the result of =LOWER("Pampa river")?	d)pampa river	A / CO2
34	If cell A1 contains "apple,banana", then the result of formula=SUBSTITUTE(A1,"orange","apple")	c) apple, banana	A / CO2
35	Which of the following is a key benefit of using visualizations in data analysis?	b)They can reveal trends and patterns quickly	U / CO2
36	Which function returns the sum from a set of values?	d)SUM	U / CO2
37	Which function can be used to get the number of empty cells in a range?	d)COUNTBLANK	U / CO1
38	You are conducting an experiment to test the effectiveness of a new learning method. What should you apply to ensure unbiased results?	b)Randomly assign participants to experimental and control groups	A / CO1
39	Which of the following is a key feature of focus groups?	c)Group interaction and discussion	K / CO1
40	What is the main reason for converting data types during the cleaning process?	b)To ensure consistency and compatibility for analysis or modeling	U / CO1
