MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR /IMPROVEMENT/ REAPPEARANCE EXAMINATION NOVEMBER 2025

FIRST SEMESTER

Multi-Disciplinary Courses (MDC) - MG1MDCFDG100 - ELEMENTS AND PRINCIPLES OF DESIGN

(2024 ADMISSION ONWARDS)

Duration: 1 Hours **Maximum Marks: 35**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Answer in One Word or One Sentence

Answer **All** questions

Each question carries **1** mark

1. What sense is enhanced by the tactile quality of a surface? [U] / [CO1]
Ans:- Sense of Touch / Tactile Texture

2. How many colors form a terad color harmony? [K] / [CO2]
Ans:- 4 / Four

3. Define Rhythm by Transition. [K] / [CO3]
Ans:- Rhythm by Transition means creating a smooth flow in a design through gradual changes. It helps the eye move gently from one part to another.

4. Find the type of balance that is characterized by a circular shape. [K] / [CO3]
Ans:- Radial Balance

5. Show any three color schemes in a geometric design? [A] / [CO2]
Ans:- (Draw any one Geometrical design and Apply any 3 Colour schemes in the design)

6. List the types of straight lines. [K] / [CO1]

Ans:- Horizontal line, vertical line, Diagonal line, Thin line, Thick line, Zig zag line etc…

7. Which principle helps to unify various elements in a garment? [K] / [CO3]

Ans:- Harmony / Unity

8. Interpret the placement of analogous colors in a color wheel. [U] / [CO2]

Ans:- An Analogue colour scheme uses Combines 3 to 4 colours that are next to each other on the colour wheel.

9. Draw a design and color it with values of any one color. [A] / [CO2]

Ans:- (Eg:-)

[U] / [CO3]

10. Which Proportion creates stability?

Ans:- Symmetrical / formal / In proportion **[10x1 = 10]**

Part B

Short Answer Questions

Answer any **5** Questions

Each Question carries **2** marks

11. Discuss the design features that give an add-on look to the silhouette. [U] / [CO1]

Ans:-

Emphasis

Emphasis is, dominance or concentration of interest in one area of a design that prevails as the centre of attention and is more eye arresting than any other part. All areas may be interesting, but not all areas should have equal strength of interest. This implies the use of subordination in other parts so that some area may be emphasized.

[A] / [CO2]

12. Create a “50% OFF” tag of size 4” x 2” using any one complementary color harmony/scheme.

Ans:- (Eg:- Yellow - Purple)

13. Which are the three stages of Emphasis?

Ans:- Dominant / High dominance, Sub-dominant / Mid dominance, Sub-ordinate / Low dominance [K] / [CO3]

14. Write the definition of Form? [K] / [CO1]

Ans:- Form is an element of design that refers to the three-dimensional shape of an object. Form has length, width, height, and depth. Form Influenced by Light, Dark and Perspective.

15. Demonstrate the beauty of progressive Rhythm in a gown. [A] / [CO4]

Ans:- (Eg:-)

[K] / [CO1]

16. Describe the effect of wavy lines.

Ans:- Wavy lines create a dynamic gentle effect, universally associated with softness and a continuous rhythm that mimics natural cycles, like water. They evoke feminine qualities, grace, and youthfulness through their curvilinear forms. Visually, they actively suggest gentle movement and flowing motion, entirely replacing sharp edges with roundness and softness in angles, ultimately feeling of harmony and flexibility. **[5x2 = 10]**

Part C

Long Answer Sentence

Answer any **3** Questions

Each Question carries **5** mark

17. Design a 4"x4" logo using a monochromatic color scheme. [A] / [CO2]

Ans:- (Eg:-)

MONOCHROMATIC

A Monochromatic colour scheme uses different shades of same colour is, the one which uses the tints and shades from any hue.

(Eg:-)

18. Discuss about Informal Balance with illustrated examples. [U] / [CO3]

Ans:-

Informal Balance, also called Asymmetrical Balance, is a type of balance where the two sides of a design are not identical, but they still appear visually balanced. The elements are different in shape, size, colour, or position, but they are arranged in a way that creates a sense of harmony. Even though both sides are not the same, they still feel equal in visual weight.

(Eg:-)

19. What way can space create a sense of depth in two-dimensional design? [U] / [CO1]

Ans:-

- SPACE

Space is the distance or area around, above, below, between, or within elements in a design. It can be both positive and negative, and is used to create depth, balance, emphasis, and visual interest.

Positive Space :- Positive space refers to the subject or area within the design.

Negative Space :- Negative space is the background or the area that surrounds the design.

- SHAPE

Shape is the area or outline enclosed by lines. Shape is considered to be a 2 dimensional element, While 3D elements have volume and mass. Therefore a painting has shape, a sculpture has volume and mass.

When space is added to a simple shape, it begins to transform from a flat, two-dimensional form into a three-dimensional one. This introduction of space creates the illusion of depth, making the design appear more realistic and engaging. Instead of looking flat on the page, the form now seems to project outward or recede inward, giving it volume, dimension, and a stronger visual presence. This use of space enhances the overall design by making it more dynamic and expressive.

20. Illustrate a design with the contrast of two colors. Also mention the color harmony to which it belongs. [A] / [CO4]

Ans:- (Eg:-)

COLOR HARMONY

This design belongs to the complementary color harmony, as yellow and purple are opposite each other on the color wheel. Complementary colors naturally create strong contrast and make each other appear more vivid when placed side by side.

[3x5 = 15]

Prepared By,
Mr. Binil Eldhose Mathew
Assistant Professor
Dept. of Fashion Design
Yeldo Mar Baselios College,
Kothamangalam
