QP CODE : 25900868

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR / IMPROVEMENT EXAMINATION

NOVEMBER 2025 FIRST SEMESTER

Multi-Disciplinary Course (MDC) -MG1MDCHMC100 - ECO-FRIENDLY PRACTICES IN HOSPITALITY INDUSTRY

(2024 ADMISSION ONWARDS)

Duration-1.5 hours **Maximum Marks- 35**

PART-A – SHORT ANSWER QUESTIONS

ANSWER ANY 6 QUESTIONS. EACH QUESTION CARRIES 2 MARKS

1. **Energy efficiency-** using latest techniques to reduce the usage of energy sources and save energy without loss.(U)(CO1.CO3**)**
2. **Negative socio economic impact-**eco tourism brings negative changes in the society and more expense in waste management and environment protection**.(**K)/(CO1,CO2)
3. **Eco Certification Program**-Hotels can participate in eco-certification programs such as LEED (Leadership in Energy and Environmental Design), Green Key, or EarthCheck to demonstrate their commitment to sustainability.(K)/(CO1,CO3)
4. **Environmental studies**- It is the scientific study of the environmental system aand the status of its induced changes on organisms. It includes not only the study of physical and biological characters of the environment but also the social and cultural factors and the impact of man on the environment.(K)/(CO1)
5. **Opportunities in eco tourism-** sustainable travel to natural areas that conserve the environment and improves the well-being of local people, job opportunity,education,etc.(U)/(CO1,CO2)
6. **Hotel-** A hotel is an establishment that provides lodging, meals, and other services to travelers and guests in exchange for payment.(K)/CO1,CO3)
7. **Reuse**- Instead of disposing of items after a single use, consider finding ways to reuse them. This could involve repurposing items or using durable goods that have a longer lifespan.(K)/(CO1,CO2)
8. **2 water pollution controlling methods**- pollution control laws should be strictly implemented,proper management of domestic and industrial wastes.(K)/(CO2)

9. **Vehicular emissions-** Cars, trucks, buses, and other vehicles emit pollutants such as carbon monoxide (CO), nitrogen oxides (NOx), volatile organic compounds (VOCs), and particulate matter through the combustion of gasoline and diesel fuels.(U)/(CO2)
10. **Ground water recharging-:** Recharging groundwater aquifers with harvested rainwater can help replenish depleted aquifers and maintain groundwater levels, supporting sustainable water resource management.(K)/(CO2)
11. **Waste management system-** A waste management system is a streamlined process that organizations use to dispose of, reduce, reuse, and prevent waste.(U)/(CO1,CO3)
12. **Pollution-** Pollution refers to the introduction or presence of harmful or unwanted substances or contaminants into the environment, which can cause adverse effects on living organisms, ecosystems, and the natural environment.(U)/(CO2) **(6X2 = 12)**

PART-B SHORT ESSAY TYPE QUESTIONS

ANSWER ANY 3 QUESTIONS. EACH QUESTION CARRIES 5 MARKS

13. **Note on Environmental Studies**- sustainable development,pollution control,waste reduction,education,public awareness,biodiversity conservation ,climate change mitigation,etc(U)/(CO1)
14. **Importance of Eco-tourism**- environmental conservation,economic benefits,cultural preservation,education and awareness,sustainable development,etc(U)/(CO1,CO2)
15. **15. Eco friendly practices-** energy saving methods, water conservation techniques, waste reduction, guest education about environmental benefits,etc(U)/(CO1,CO3)
16. **Importance of waste management-** reduce costs,waste reduction,health benefits,environment protection,etc(U)/(CO1,CO2)
17. **Need for water conservation-**useful during summer,domestic ,institutional and industrial use,reduce water wastage,save money,good for environment,etc.(K)(CO2)

(3X5 = 15)

PART - C ESSAY TYPE QUESTIONS.

ANSWER 1 QUESTION.QUESTION CARRIES 8 MARKS.

18. **Importance of environmental studies-** to reduce wastes, to attain sustainable development, pollution control, conservation of natural resources, understand environment and tribes,etc. (U)/(CO1)
19. **Causes and effects of water pollution-Causes-**Industrial ,domestic,institutional wastes,oil spillage, plastic waste,natural wastes,agricultural runoff,mining,etc. **Effects-** loss of aquatic life, spread of diseases, affects photosynthesis, affects ecosystem,agricultural issues, drinking water problem,etc(U)/(CO2)

(1X8 = 8)
