MAHATMAGANDHI UNIVERSITY, KOTTAYAM
MGU-BVOC (HONOURS) Regular EXAMINATION November 2025
First Semester
(SDC) - MG1SDCLMT101 – WAREHOUSE MANAGEMENT
(2025 ADMISSION ONWARDS)
ANSWER KEY

Part A: Very Short Answers (1 mark each)

1. Dispatching is a critical part of:
   Outbound.
2. Role of warehouse manager includes:
   Supervision of storage and dispatch.
3. Green warehousing focuses on:
   Environmental protection.
4. Optimal warehouse location process is known as:
   Site Selection.
5. Inventory ready to be shipped:
   Finished goods.
6. Warehouse owned by private firm:
   Private Warehouse.
7. ASRS is used for:
   High-density, fast movement of pallets or totes.
8. Sorting systems support:
   Order accuracy.
9. Warehouse cost can be reduced by:
   Adopting automation.
10. Toxic substances can cause:
    Poisoning, injury, or death.

Part B: Short Answers (2 marks each)

11. Why is it important to maintain proper inventory?
    Proper inventory prevents stockouts, optimizes

costs, and supports efficient operations.

12. Advantages of storage methods?
    Enhance space use, speed access, and improve tracking.
13. What is Pallet Trucks?

    Devices for moving heavy pallet loads manually or powered.

14. Explain ABC Analysis. Categorizes items by value:

    A (high control), B (medium), C (low).

15. Benefits of demand forecasting?

Balances stock, cuts waste, boosts responsiveness.

16. How warehousing impacts inventory management?

Buffers supply/demand, enables consolidation.

17. Importance of first aid facilities?

Reduces injury impact, ensures compliance.

18. What is cross-docking?

Direct transfer from inbound to outbound docks.

19. Best practices for order fulfillment?

Automation, real-time tracking.

20. Steps involved in receiving goods?

Unload, inspect, verify, label, store.

21. How inventory avoids shortage?

Acts as demand buffer.

22. RFID technology?
    Radio-frequency ID for tracking; cuts errors, enables real-time visibility.

Part C: Essay Answers (8 marks each)

23. Green warehousing helps environment through energy-efficient tech, reducing waste and emissions.

24. Demand Forecasting methods: qualitative (opinions), quantitative (trends/regression), causal models.

25. Major challenges in warehouse operations:
    labor, accuracy, space, tech integration.
26. Warehouse challenges & solutions:
    costs/safety; automate, train, optimize layout.
27. How outbound logistics improves satisfaction:
    timely and accurate delivery builds trust.
28. Periodic safety audits and signage:
    audits spot hazards; signage prevents accidents.
29. WMS improves operations:
    automates tasks, optimizes space, provides real-time data.
