MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR /IMPROVEMENT/ REAPPEARANCE EXAMINATION November 2025

First SEMESTER

Multi-Disciplinary Courses (MDC) - MG1MDCMBG101 - MICROBIOLOGY IN EVERYDAY LIFE

(2024 ADMISSION ONWARDS)

Duration: 45 Minutes **Maximum Marks: 35**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple Choice Questions

Answer all questions

Each question carries **1** marks

1. Microbiology literacy helps society mainly by: [U] / [CO1]

   a). Promoting chemical pesticides

   b). Understanding role of microbes in health and environment

   c). Ignoring hygiene education

   d). Promoting chemical fertilizers

2. What is the main role of lactic acid bacteria in fermented dairy products? [K] / [CO2]

   a). Convert ethanol to acetic acid

   b). Converts lactose to lactic acid

   c). Produce carbon

   d). Produce acetic acid

3. Which algae is rich in protein and commonly used as a dietary supplement? [K] / [CO2]

a). Spirulina b). Ectocarpus

c). Pseudomonas d). Nori

4. Which of the following practices prevents foodborne diseases most effectively? [K] / [CO1]

a). Using gloves only

b). Hand washing with soap and water

c). Wearing jewelry

d). Talking over food

5. In hazardous waste management, source reduction aims to: [U] / [CO3]

a). Minimize waste generation at its origin

b). Burn waste at high temperature

c). Convert waste into electricity

d). Dump waste into landfills

6. The purpose of recycling household waste is to: [U] / [CO3]

a). Create more landfills

b). Convert used materials into reusable products

c). Increase waste generation

d). Reduce product quality

7. Beneficial microorganisms are used in all of the following except: [U] / [CO1]

a). Yogurt production b). Bread production

c). Antibiotic production d). Food spoilage

8. What is the main microbial agent in fermented sausages? [K] / [CO2]

a). Yeast b). Lactic acid bacteria

c). Mold d). Algae

9. Select the source of ground water from following. [U] / [CO3]

a). Spring b). Pond

c). Dew d). Rain

10. Misuse or overuse of antibiotics can lead to: [U] / [CO4]

a). Faster recovery b). Antibiotic resistance

c). Viral mutation d). Increased immunity

[1x10 = 10]

Part B

Fill in the blanks questions

Answer all questions

Each question carries **1** marks

11. Some microbes are _____, causing diseases in humans, animals, and plants. [K] / [CO1]

12. One of the major concerns in recreational areas is _____, especially where people swim or bathe. [U] / [CO3]

13. The use of safe and clean _____ in households helps in preventing waterborne diseases. [U] / [CO3]

14. The microorganism responsible for “eyes” in Swiss cheese is _____. [U] / [CO2]

15. _____drugs are available only with a prescription from a licensed medical professional. [U] / [CO4]

[1x5 = 5]

Part C

True or false questions

Answer all questions

Each question carries **1** marks

16. Industrial microbiology deals with the use of chemical fertilizers. [U] / [CO1]

17. All microorganisms are useful to humans. [U] / [CO2]

18. Cross-contamination occurs only when raw and cooked foods touch directly. [U] / [CO2]

19. Flies can transfer germs from faeces to food surfaces. [U] / [CO3]

20. The isolation and quarantine of patients and suspected ones are not part of preventive measures. [U] / [CO3]

[1x5 = 5]

Part D

One word answer questions

Answer any **5** questions

Each question carries **1** marks

21. Select the term for removal of visible dirt from surfaces. [U] / [CO1]

22. Which mold produces blue cheese or Roquefort cheese? [K] / [CO2]

23. What is the primary sugar fermented by lactic acid bacteria? [K] / [CO2]

24. A fermented South Indian dish made from rice and lentil batter. [K] / [CO2]

25. Define solid waste. [K] / [CO3]

26. Name the vector of dengue. [K] / [CO3]

27. What are the key reasons for AMR? [K] / [CO4]

28. Why are medicines mixed with coffee grounds or cat litter before disposal? [K] / [CO4]

[1x5 = 5]

Part E

Short answer questions

Answer any **5** questions

Each question carries **2** marks

29. Explain the role of recycling in environmental hygiene and resource conservation. [U] / [CO1]

30. Explain the sources and types of liquid waste and their impact on human health. [U] / [CO1]

31. Explain the methods of waste disposal and their advantages and disadvantages. [U] / [CO1]

32. Describe the common bacterial pathogens found in raw foods and their effects on health. [U] / [CO2]

33. Describe how yeast contributes to alcoholic beverage production. [U] / [CO2]

34. Discuss about two food or waterborne disease, their causatives and symptoms. [U] / [CO3]

35. Discuss the preventive measures for respiratory diseases. [U] / [CO3]

36. Write any four control measures to prevent fungal infections [U] / [CO3]

[2x5 = 10]
