MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR /IMPROVEMENT/ REAPPEARANCE

EXAMINATION NOVEMBER 2025

FIRST SEMESTER

Discipline Specific Core Course (DSC) - MG1DSCPES100 –

FOUNDATION OF PHYSICAL

EDUCATION AND RECREATION

(2024 ADMISSION ONWARDS)

Answer key

Duration: 1 Hour 30 Minutes Maximum Marks: 50

Remember(K), Understand(U), Apply(A), Analyse (An), Evaluate(E), Create(C), Skill(S), Interest (I) and Appreciation (Ap)

Students s hould attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

MCQ

Answer all questions

Each question carries 1 mark

1.Which of the following is a primary objective of physical education in India

D) All of the above [K] / [CO1]

2.Who benefits from physical education

C) All ages and abilities [U] / [CO3]

3.In an idealistic physical education program, the primary focus would be on

B) Mental discipline [U] / [CO5]

4.Which principle of motor learning emphasizes the importance of setting realistic goals?

D) Intrinsic motivation [U] / [CO6]

5. Whole practice is effective for:

D) All of the above [A] / [CO6]

6.The fitness movement of the 1970s and 1980s emphasized

A) Aerobics and jogging [U] / [CO1, CO2]

7.The primary purpose of recreation is:

C) To provide relaxation and enjoyment [K] / [CO1, CO2]

8.Physical education combines

A) Art and science [U] / [CO3]

9.What is the primary goal of physical education

C) To enhance cognitive function [U] / [CO3]

10.Which philosophical perspective would best support a physical education program that emphasizes the development of critical thinking and problem-solving skills?

C) Pragmatism [K] / [CO5]

[10x1 = 10]

Part B

Short Answer Type Questions

Answer any 10 Questions

Each Question carries 2 marks

11.What are the practical applications of Realism in physical education? [U] / [CO5]

Ans : In physical education, realism's practical applications include developing physical and mental skills through hands-on, real-world activities and focusing on practical life skills. This involves using observation and experimentation to teach concepts, prioritizing subjects like health and vocational training, and preparing students to be adaptable and successful in their daily lives.

12.Bloom's Taxonomy: Comprehension Level [U] / [CO7]

Ans : The comprehension level of Bloom's Taxonomy, also known as understanding, is the second level of cognitive complexity, which involves grasping the meaning of information rather than just recalling it. This is demonstrated by the ability to explain, summarize, or translate material into one's own words.

13.What is part practice? [A] / [CO6]

Ans: Part practice is a training method that involves breaking down a complex skill into smaller components and practicing each part separately before combining them to perform the entire skill. This approach is useful for learning complex or unfamiliar movements, as it allows a performer to focus on specific parts without being overwhelmed

14.Bloom's Taxonomy: Synthesis Level [U] / [CO4, CO5]

Ans : Synthesis is the fifth level of Bloom's Taxonomy, where learners create something new by putting together parts to form a new whole. It requires creative, original thinking and involves actions like planning, formulating, and designing.

15.Bloom's Taxonomy: Comprehension Level [U] / [CO6]

Ans: The comprehension level of Bloom's Taxonomy, also known as understanding, is the second level of cognitive complexity, which involves grasping the meaning of information rather than just recalling it. This is demonstrated by the ability to explain, summarize, or translate material into one's own words.

16.Describe the ancient Indian concept of physical education. [A] / [CO1, CO2]

Ans : Ancient Indian physical education was a holistic discipline integrated with academic, spiritual, and cultural life, focusing on the balanced development of mind and body through activities like yoga, martial arts, and strategic games.Indus Valley Civilization ,Vedic Period Yoga, pranayama, and surya namaskar (sun salutations) were introduced, promoting physical and mental development,Epic Period

17.What are some strategies for improving motor learning? [K] / [CO6]

Ans: Strategies for improving motor learning include breaking skills into smaller steps, providing clear instructions and demonstrations, and allowing for frequent practice with gradual increases in difficulty. Providing effective feedback, using fun and engaging activities, and ensuring a positive and relaxed learning environment are also key.

18.How can Idealism and Realism be integrated into a comprehensive physical education program?

[K] / [CO5]

Ans: Integrating the core tenets of Idealism and Realism can create a balanced physical education (PE) program that fosters both moral development and practical, scientific understanding of movement. (Idealism and Realism)

19.Explain how physical education supports academic performance. [U] / [CO3]

Ans: Physical education (PE) supports academic performance by improving cognitive functions like attention, memory, and concentration through increased blood flow to the brain. It also enhances problem-solving and critical thinking skills, reduces stress, and improves sleep quality, which all contribute to better learning and higher academic achievement. Additionally, PE builds life skills like discipline and time management, which translate to better study habits.

20.What is the role of the Sports Authority of India (SAI) in promoting physical education?

[K] / [CO2]

Ans: Sports Authority of India (SAI)SAI, established in 1984, became a major player in promoting sports and physical education across different levels. The Sports Authority of India (SAI) promotes physical education by identifying and nurturing sports talent, providing specialized training and coaching, and developing sports infrastructure across the country.

21.Explain why physical education is not just about winning. [K] / [CO3]

Ans: Physical education is about more than just winning because it teaches critical life skills like sportsmanship, discipline, and teamwork, and provides health benefits like improved mental and physical well-being. It fosters personal growth by teaching resilience through both winning and losing, promotes social skills through cooperation, and contributes to better academic performance by boosting concentration and problem-solving abilities.

22.What are the strengths and weaknesses of Existentialism in physical education?

[U] / [CO4, CO5]

Ans: Strengths : Fosters Individuality and Creativity, Enhances Personal Responsibility, Increases Intrinsic Motivation, Develops Self-Awareness

Weakness ; Lack of Structure and Objective Assessment, Potential for Moral Relativity and Conflict, Potential for Negative Messaging

[10x2 = 20]

Part C

Short Essay Type Questions

Answer any 4 Questions

Each Question carries 5 marks

23.Analyze the influence of technology on physical education and recreation. [U]/[CO1, CO2]

Ans: Modern tools like video projectors, GPS, and gaming systems (like Wii Fit) are being incorporated to enhance engagement and learning in physical education. Technology has positively influenced physical education and recreation by enhancing engagement through personalized data and gamification, improving coaching with real-time feedback and video analysis, and increasing safety and fairness in sports through advanced tracking and referee assistance tools.

24.Analyse the relationship between physical education and economic growth. [U]/[CO1, CO3]

Ans: Physical education contributes to economic growth by improving workforce productivity, reducing healthcare costs, and creating jobs in the sports industry. A healthier population leads to lower absenteeism, higher productivity, and a longer working life, while investments in sports infrastructure

and programs generate employment and economic activity. Ultimately, physical education enhances human capital, which is a key driver of long-term economic development. Boosts workforce productivity, Reduces healthcare costs, Drives economic activity and job creation.

25.What are the key principles of Naturalism in physical education? [K]/[CO4, CO5]

Ans: The key principles of Naturalism in physical education include developing the child according to their innate nature and instincts, believing nature is the ultimate reality and best teacher, and using experiences from the natural world as the primary learning environment. This approach emphasizes physical education, health training, and self-preservation, while advocating for a child-centered, non-fixed curriculum that prioritizes playing and learning through doing, with discipline arising from natural consequences. Nature as the ultimate reality and teacher, Child-centered and instinct-driven curriculum, Learning by doing and sensory training, Autonomy and freedom.

26.How can recreational therapy address social issues? [U] / [CO7]

Ans: Recreational therapy addresses social issues by using group activities to build social skills, increase community integration, and foster a sense of belonging. Through structured leisure activities, it helps individuals improve communication, teamwork, and interpersonal relationships, while also providing a supportive environment to combat isolation and develop coping mechanisms for social situations.

27.Discuss the impact of physical education on environmental sustainability. [K] / [CO3]

Ans: Physical education (PE) impacts environmental sustainability by fostering eco-friendly lifestyles through hands-on experiences and education. This includes promoting active transportation, encouraging resource conservation like recycling and reusable water bottles, and teaching sustainable practices through activities in natural environments. By integrating environmental themes into lessons, PE cultivates both physical fitness and a sense of environmental responsibility in students, helping them become stewards of the planet.

28.Critically examine the definition and scope of physical education highlighting its evolution and current trends.

[K] / [CO1]

Ans: Physical education is a branch of education that deals with wholesome development of a person.P.E is a systematic process of education through physical activities aimed at developing the whole person.It involves the development of physical,mental,social,emotional and cognitive.

Scope of PE and recreation

It includes basic movements and improves the quality of physical movements like running,jogging,walking bounding etc.
