MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS)

THIRD SEMESTER EXAMINATION

(2024 ADMISSION ONWARDS)

MG3DSEAQC202 – Reproductive Biology and Endocrinology

Duration: 1.5 hrs Maximum Marks: 50

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A
Very Short Answer Questions
Answer All Questions
Each question carries 1 mark

1. What is sexual dimorphism? Give an example for sexual dimorphism in fin fishes [1] [U]

2. What is hermaphroditism? [1] [U]

3. Differentiate between oviparity and viviparity [1] [U]

4. What are pancreatic islets? [2] [U]

5. Comment on sex steroids [2] [U]

6. What is methyl farnesoate? [3] [U]

7. What is moulting? [3] [U]

8. What is induced breeding? [4] [U]

9. Comment on Ovaprim [4] [R]

10. What is a cryoprotectant? Write an example for a cryoprotectant [5] [U]

[1 x 10 = 10] Marks

Part B
Short Answer Questions
Answer any 5 Questions
Each question carries 6 marks

11. Explain sexual dimorphism in fin fishes with examples [1] [U]

12. Explain sex reversal in fishes [1] [U]

13. Explain sex determination in fishes [1] [U]

14. Detail the neuroendocrine control of reproduction in fishes [2] [U]

15. Elaborate the functions of fish pituitary and the function of its hormone secretions [2] [U]

16. Explain parasitic castration in crustaceans [3] [R]

17. Describe the principle of eye stalk ablation in crustaceans [3] [R]

18. Give an account of the purpose of anesthesia in fishes and various anesthetics used [4] [R]

19. Explain the process of gastrulation in fish embryo [5] [U]

[6x 5 = 30] Marks

Part C
Essay Type Questions
Answer any one Question
Each question carries 10 marks

20. Explain the maturity stages of male and female teleost fish [1] [U]

21. Describe the neuroendocrine and true endocrine organs of crustaceans [2] [U]

22. Explain the environmental control of reproduction in fishes [3] [U]

[10 x 1 = 10] Marks
