[3 x 5 = 15]

Part – C

Long Essay Questions

9 A. Explain the stages in the entrepreneurship process and elaborate what happens in each stage. (U, CO1)

OR

B. Explain the major barriers to Entrepreneurship with suitable examples (U, CO1)

10.A. **Case Study:** HomeLink Connect Pvt. Ltd**. (Compulsory)**

In **2013**, three college friends - **Aarav Nair**, **Meera Sethi**, and **Dev Chaudhary** launched **HomeLink Connect** in Bangalore after first-hand frustration with paying **1–2 months' rent in brokerage** to house-hunting agents. They turned this recurring pain point into a tech-enabled **consumer-to-consumer (C2C) platform** where tenants and landlords could list and connect directly. Using **AI-based ranking**, listings were sorted according to commute time, liveability metrics, and price trends, eliminating the need for brokers.

Within six months of piloting in Bengaluru, HomeLink received **over 35,000 user signups**, validating demand and enabling the refinements recommended via their **Lean Canvas model**. Their early success attracted major investors like **Tiger Global, General Atlantic, and Moore Strategic Ventures**, resulting in a **$210 million Series E funding round in November 2021**—valuing HomeLink at **$1.01 billion** and making it India's **first prop-tech unicorn.**

By **2023**, HomeLink had scaled to **six major cities** (Bengaluru, Delhi-NCR, Mumbai, Hyderabad, Pune, Chennai), facilitated **over 500,000 transactions per year**, and offered **value-add services** - leasing legal support, packing/movers, tenant insurance, and society-management tools—under its fast-growing **HomeLinkHood App**, deployed in over **10,000 housing communities**

Despite facing hostility from local broker associations—including an incident where agents attacked their office in 2015 - HomeLink reinforced trust and reputation via a "**Say No to Brokerage**" campaign, verified listings, responsive legal support, and high service standards . Today, the company stands as a textbook example of how environmental scanning**,** lean prototyping**,** systematic planning**,** legal incorporation**, and** branding can come together to build a disruptive, sustainable startup platform.

- Summarise the three key elements of the *business opportunity* that HomeLink founders identified before launching.
- Explain how Aarav, Meera, and Dev used environmental scanning to confirm the opportunity across Bangalore, analyze the rental market inefficiencies, and frame their digital model.
- Summarise the main sections of their business plan and how each contributed to investor confidence.
- Identify two types of feasibility study they likely conducted and explain one insight each gave at an early stage.

[2 x 20 = 40]
