Mahatma Gandhi University, Kottayam-

Second Semester MGU-UGP – BSW (Honours) Regular Examination March 2025

MDC -- MG2MDCSWK100 - Human Behaviour And Life Span Development **- QP CODE**: 25900190 –

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A Short Answer any 5 questions Each question carries 3 marks

1. List out the schools of Psychology. • **Structuralism** – Focuses on breaking down mental processes into the most basic components. • **Functionalism** – Emphasizes the purpose of consciousness and behavior. • **Behaviorism** – Focuses on observable behaviors and the ways they're learned. • **Psychoanalysis** – Emphasizes the influence of the unconscious mind on behavior. • **Humanistic Psychology** – Stresses individual potential and self-actualization. • **Cognitive Psychology** – Studies mental processes like memory, thinking, problem-solving, & language.	[U] / [CO1] 3 marks
2. Define Environmental Psychology and its importance. **Definition:** Environmental psychology is the study of the relationship between human behavior and the physical environment, including natural environments, built environments, and social settings. **Importance:** • Enhances the design of living and working spaces. • Promotes sustainability and eco-friendly behavior. • Improves mental well-being through better environmental planning. • Helps in disaster response and recovery through understanding of human-environment interaction.	[K] / [CO1] 1 marks 2 marks
3. Define learning and its types. **Definition:** Learning is a relatively permanent change in behavior or knowledge that results from experience or practice. **Types of Learning:** a) Classical Conditioning b) Operant Conditioning c) Observational Learning (Modeling) d) Cognitive Learning e) Habituation and Sensitization f) Latent Learning	[U] / [CO2] 1 marks 2 marks
4. Define classical conditioning and cite a real-life example. **Definition:** Classical conditioning is a learning process where a neutral stimulus becomes associated with a meaningful stimulus and acquires the capacity to elicit a similar response. **Example:** A student feels anxious when they hear the school bell because it precedes a difficult exam. The bell (neutral stimulus) becomes associated with the stress of the exam (unconditioned stimulus), eventually causing anxiety (conditioned response).	[K] / [CO3] 1.5 marks 1.5 marks
5. Define operant conditioning. **Definition** Operant conditioning is a method of learning that uses rewards and punishments to reinforce or discourage behavior. Proposed by B.F. Skinner, it focuses on voluntary behaviors.	[K] / [CO6 3 marks]
6. Identify the key differences between ICD-10 and DSM-5.	[U] / [CO5] 3 marks

Feature	ICD-10	DSM-5
➢ Developed by	➢World Health Organization WHO)	➢American Psychiatric Association (APA)
➢ Global use	➢Used internationally	➢Primarily used in the U.S.
➢ Scope	➢Covers all diseases, including mental& physical	➢Focuses only on mental disorders
➢ Structure	➢Coded by alphanumeric codes (e.g., F32.0)	
➢ Diagnosis approach	➢More medical and classification-based	➢Descriptive diagnostic criteria ➢Symptom-based and categorical

7. Define adolescence in terms of psychological development. **Definition:** Adolescence is a developmental stage between childhood and adulthood characterized by significant physical, cognitive, emotional, and social changes. **Psychological Aspects:** • Development of identity and self-concept (Erikson's "identity vs. role confusion" stage) • Increased independence and decision-making ability • Emotional instability and mood swings due to hormonal changes • Formation of peer relationships and social identity	[K] / [CO4 1 marks 2 marks

Part B Short Essay Answer any 2 questions Each question carries 10 marks

8. Explain the utility of Humanistic and Cognitive Approaches in addressing Human behaviour. **Humanistic Approach:** o Focuses on **individual potential**, personal growth, and **self-actualization**. o Helps in understanding **subjective experiences**, emotions, and **self-concept**. o Useful in therapy (e.g., **client-centered therapy** by Carl Rogers), education, and counseling by promoting **self-awareness** and **positive self-regard**. **Cognitive Approach:** o Emphasizes **mental processes** such as perception, memory, thinking, and problem-solving. o Useful in **understanding irrational thoughts**, treating **cognitive distortions** (as in CBT), and improving **learning strategies**. o Provides insights into **decision-making**, attention, and language use. Together, these approaches offer a **holistic understanding of human behavior**, addressing both emotional needs (humanistic) and intellectual processes (cognitive).	[A] / [CO2] 5 marks 5 marks
9. Elaborate on self-actualization and highlight the perspective of Maslow. • **Self-Actualization** is the process of realizing one's **full potential**, capabilities, and creativity. • According to **Abraham Maslow**, self-actualization is the highest level in his Hierarchy of Needs. **Maslow's Hierarchy of Needs (from bottom to top):** 1. **Physiological Needs** – food, water, sleep 2. **Safety Needs** – security, stability 3. **Love/Belonging** – relationships, affection 4. **Esteem** – self-respect, recognition 5. **Self-Actualization** – fulfilling one's potential, personal growth Maslow believed that **only after lower-level needs are met**, individuals can achieve self-actualization. It's a key concept in humanistic psychology, focusing on **growth and fulfillment** rather than pathology.	[A] / [CO6] 3 marks 7 marks
10. Elaborate on the significance of Erickson's theory in understanding human behaviour. **Erik Erikson's Psychosocial Theory** outlines **eight stages** of human development, each with a specific **psychosocial conflict** that must be resolved. **Examples of stages:** • **Adolescence (Identity vs. Role Confusion)** – Critical for developing a stable self-identity. • **Young Adulthood (Intimacy vs. Isolation)** – Focuses on forming deep relationships. **Significance:** • Explains how **personality develops over the lifespan**. • Highlights the influence of **social and cultural factors**. • Offers a framework for understanding **challenges at different life stages**. • Helps in psychological counseling and educational support by addressing **developmental crises**. 11. Explain the application of conformity, compliance, and obedience in understanding the behaviour of an individual. **Conformity:** Changing one's behavior or beliefs to match group norms. o **Example:** Dressing a certain way because your peers do. o Shows how **group influence** shapes attitudes and actions. **Compliance:** Responding favorably to a **direct request**. o **Example:** Donating to a cause when asked, even if you didn't plan to. o Important in marketing, sales, and social interactions. **Obedience:** Following orders from an **authority figure**. o **Example:** Milgram's experiment showed how people obey authority even when it conflicts with personal conscience. o Explains behavior in hierarchical settings (e.g., military, workplace). These concepts help in understanding **social influence**, **group dynamics**, and the **mechanisms behind behavior modification** in various contexts.	[A] / [CO5] 3 marks 3 marks 3 marks 1 marks
