Part B

Short Answer
Answer any 5 questions
Each question carries 2 marks

11. What does ADDIE stand for?
Ans ADDIE stands for:
A – Analysis
D – Design
D – Development
I – Implementation
E – Evaluation
It's a widely used instructional design model that guides the process of creating effective training and educational programs.

12. How does application and skill practice benefit employees?
Ans:Application and skill practice help employees reinforce learning, build confidence, improve performance, and effectively transfer knowledge to real work situations.

13. How does training help organizations retain employees?
Ans: Training boosts employee engagement, enhances skills, shows commitment to growth, increases job satisfaction, and reduces turnover by promoting career development.

14. Name three training delivery methods.
Ans: Three training delivery methods are:
Instructor-led training (ILT)
E-learning (online training)
On-the-job training (OJT)

15. In what way does training foster innovation within an organization?
Ans: Training fosters innovation by encouraging creative thinking, updating skills, promoting collaboration, and empowering employees to develop and implement new ideas.

16. What are the four primary programs in the TWI model?
Ans: The four primary TWI programs are Job Instruction, Job Methods, Job Relations, and Program Development, each enhancing workforce capability and productivity.

17. What are the key components of training documentation and record-keeping
Ans: Key components include training plans, attendance records, evaluation results, certifications, feedback, trainer details, objectives, schedules, and completion status tracking.

Part C

Short Essay
Answer any 3 questions
Each question carries 5 marks

18. Why is subject knowledge important for a trainer?
Ans: Subject knowledge is essential for a trainer because it builds credibility, ensures accurate information delivery, boosts learner confidence, and enables effective question handling. It also helps in designing relevant content and adapting training methods to meet learner needs effectively.

19. What are the four stages of the CIRO approach?
Ans: The four stages of the CIRO approach are Context, Input, Reaction, and Outcome. It evaluates training by analyzing organizational needs (Context), training design (Input), participant feedback (Reaction), and the resulting behavioral and performance changes or outcomes in the workplace.

20. How does analyzing data from multiple sources improve training evaluation
Ans: Analyzing data from multiple sources improves training evaluation by providing a well-rounded view of effectiveness, identifying gaps, validating outcomes, and ensuring objectivity. It helps tailor future training, enhances decision-making, and aligns programs more closely with organizational goals and learner needs.

21. Why is training typically shorter in duration than development?
Ans: Training is typically shorter because it focuses on specific skills or tasks needed immediately for a job. Development, however, is broader and long-term, aimed at overall growth, leadership, and future roles, requiring more time and continuous learning efforts.

22. What is the primary objective of the training and development phase?
Ans: The primary objective of the training and development phase is to enhance employee skills, knowledge, and competencies to improve performance, productivity, and job satisfaction. It aims to align individual capabilities with organizational goals, preparing employees for current roles and future career growth.
