QP CODE: 25900039 **MAHATMA GANDHI UNIVERSITY, KOTTAYAM**

SECOND SEMESTER MGU-UGP (HONOURS) REGULAR EXAMINATION MARCH 2025

Discipline Specific Core Course - MG2DSCCMA100 - AI POWEREDPRESENTATION TOOLS AND TECHNIQUES - SCHEME

(2024 ADMISSION ONWARDS)

Duration: 1.5 Hours Maximum Marks: 50

Remember (K), Understand (U), Apply (A), Analyze (An), Evaluate (E), Create (C), Interest (I), Appreciation (Ap), and Skill (S)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

[Learning Domain] [CO No(s)]

Part A

Multiple Choice Questions

Answer all questions. Each question carries 1 mark

1	a) Click Insert > Chart	[U]	[1]
2	c)View or d). Animation	[U]	[1]
3	b)Use Master Slides	[K]	[1]
4	All options are wrong, correct answer is Slide -> Slide properties -> Background **(Marks can be given to all options)**	[K]	[1]
5	a)Align and Distribution Toolbar	[K]	[1]
6	c)Impress	[K]	[1]
7	a) Press the Shift key	[K]	[2]
8	a)To save time and give a professional appearance	[U]	[2]
9	b)To add motion effects to text and objects	[U]	[2]
10	b)gslides **(Complex question) – Marks can be given to all options**	[U]	[2]
11	b)Yes, using File > Print settings and preview > Choose "Print with notes"	[U]	[2]
12	c) Formatting Toolbar	[U]	[2]
13	**c)** PowerPoint (.ppt, .pptx) and PDF & **d).** Audio (.mp3)	[U]	[2]
14	b)Generating speaker notes and summaries	[U]	[3]
15	**a)**Provide well-structured text with key points & **b).** Copy and paste long, unformatted paragraphs	[U]	[3]
16	b).Canva with AI design features	[U]	[3]
17	c)Synthesia **(Out of syllabus) – Marks can be given to all options**	[U]	[3]
18	b)Protects sensitive data from unauthorized access	[U]	[3]

19 a) It allows AI-powered automatic customization of slides [U] [3]

20 b)Google Slides [U] [3]

(1 × 20 = 20)

Part B

Short Answer Questions. Answer any 10 questions. Each question carries 3 marks

21 Explanation of changing background colors: (1 mark)

You can change the background color of a slide by going to the "Slide" menu and selecting "Set Background". This allows you to choose from solid colors, gradients, hatches, or image backgrounds.

Explanation of changing fonts and text styles: (1 mark)

Fonts can be customized by selecting the text box and using the "Format" menu. From here, you can adjust font type, size, style, and color. The "Master Slide" view can be used to set fonts consistently across slides.

Explanation of using themes and layouts: (1 mark)

Themes can be applied to change the overall design of slides, including backgrounds, colors, and fonts. You can also modify layouts by going to "Master Slide" view and adjusting placeholders and elements, ensuring consistent formatting throughout the presentation.

[U] [1]

22 Navigating to the transition option: (1 mark)

In LibreOffice Impress, go to the “Slide Show” menu and select “Slide Transition”. (This opens a sidebar or dialog where you can apply transitions to individual slides.)

Selecting a transition effect: (1 mark)

From the Slide Transition panel, you can choose a transition style (e.g., Fade, Wipe, Push, Zoom).(These effects determine how the current slide changes to the next one.)

Customizing transition settings: (1 mark)

You can set options like speed, sound, and whether the transition happens on click or automatically after a time delay.(Click “Apply to All Slides” if you want the same effect on every slide.)

[U] [1]

23 Process of saving a presentation *(1 mark)*

In LibreOffice Impress, to save a presentation, click on **File > Save** or press **Ctrl + S**. If it’s a new file, a dialog box will appear where you can enter the file name and choose **a location**. After that, click Save to store the presentation.

Different file formats available *(1 mark)*

- **.ODP** (default OpenDocument Presentation format)
- **.PPT / .PPTX** (Microsoft PowerPoint formats)
- **.PDF** (for exporting as a readable, non-editable file)
- **.OTP** (used for saving templates)

Importance of saving work frequently *(1 mark)*

Frequent saving helps **avoid data loss** due to crashes, power failure, or accidental closure. It ensures that recent changes are **not lost** and protects the user's effort and time.

[U] [1]

24 Types of media that can be added *(1 mark)*

In LibreOffice Impress, you can insert various types of media, including **images**, **audio files**, and **video files**. Supported formats include **MP3, WAV** (for audio) and **MP4, AVI** (for video). These elements enhance the presentation's interactivity and appeal.

How to insert audio or video files *(1 mark)*

To insert audio or video: Go to **Insert > Media > Audio or Video**.

Select the desired file from your computer. The media object appears on the slide and can be resized or moved like any other object.

How to customize audio or video files *(1 mark)*

After inserting, you can: Use the **Playback toolbar** to play, pause, or stop the media.

Set options such as **automatic start** or **play on click**.Adjust the **volume**, and **loop** playback if needed.

[U] [1]

25 Accessing the share option *(1 mark)*

Open the presentation in Google Slides and click on the **"Share"** button at the top-right corner. This opens the sharing settings window where you can manage access and permissions.

Choosing who to share with *(1 mark)*

You can share the presentation by: Entering email addresses of specific people Or by generating a shareable link. You can control access by selecting permissions such as **Viewer**, **Commenter**, or **Editor** for each person or link.

Adjusting visibility and privacy settings *(1 mark)*

You can choose whether the file is:

Restricted (only invited users can view)

Anyone with the link can view, comment, or edit. These settings ensure the right level of **security and collaboration** based on your needs.

[U] [2]

26 Opening the linked chart for editing *(1 mark)*

To edit a linked chart (e.g., one inserted from Calc into Impress or Writer), double-click the chart. This opens it in **Chart Edit mode**, allowing access to its data and layout features.

Modifying the chart data *(1 mark)*

To change the data: Click **"Edit Data"** or use the data table that appears.

You can directly **update values**, **labels**, or **categories** in the embedded sheet-like editor. Changes are reflected immediately in the chart preview.

Updating linked charts *(1 mark)*

If the chart is linked to an external Calc file: Make changes in the **source spreadsheet**.

When you open the document with the linked chart (e.g., Impress), you will be prompted to **update the link**. Click **"Yes"** to refresh the chart with the updated data.

[K] [2]

27 Enhancing functionality *(1 mark)*

Add-ons expand the built-in capabilities of Google Slides by adding **specialized tools and features**. For example, add-ons can help with **diagram creation**, **icon insertion**, or **text formatting**, which are not available by default.

Improving productivity *(1 mark)*

Add-ons save time and effort by **automating repetitive tasks** and offering quick solutions for design, formatting, or content insertion. Tools like **SlidesAI** or **Pear Deck** help in creating engaging slides and interactive presentations faster.

Seamless integration and customization *(1 mark)*

Add-ons work directly within Google Slides and integrate smoothly with other Google Workspace apps. Users can **customize presentations** based on specific needs without switching between platforms, making workflow more efficient. [U] [2]

28 Accessing slide thumbnails *(1 mark)*

In Google Slides, the list of all slides appears as **thumbnails on the left pane** of the screen. This view helps users easily identify and select slides for rearrangement.

Reordering the slides *(1 mark)*

To rearrange, simply **click and drag** a slide thumbnail up or down in the slide list. A **line indicator** shows the new position where the slide will be placed when dropped.
Ensuring proper flow *(1 mark)*
Reordering slides helps in organizing the **logical flow** of the presentation. It allows presenters to **group related content**, improve narrative structure, and ensure better audience engagement.

[U] [2]

29 **Real-time collaboration features** *(1 mark)*
Yes, **Gamma AI** supports **real-time content editing**, allowing multiple users to work on the same presentation simultaneously. This functionality is similar to **Google Docs**, where users can edit, add comments, and suggest changes in real-time.
Benefits of real-time editing *(1 mark)*
This feature is highly beneficial for teams working remotely or across different time zones, as it enables **synchronized collaboration**. Team members can make immediate updates, ensuring a smooth and efficient workflow.
Version history tracking *(1 mark)*
Gamma AI also offers **version history tracking**, allowing users to view or revert to **previous versions** of the presentation. This feature ensures that all changes are documented and gives users the flexibility to manage content evolution effectively.

[U] [3]

30 **Canva Magic Design for Presentations (1 mark)**
Canva's Magic Design allows users to create presentations by simply typing a prompt. The AI generates customizable templates, including content and layout, which can be edited further to match specific branding or style preferences. (canva.com)
SlidesAI (1 mark)
SlidesAI is a Google Slides add-on that transforms text prompts into slide decks. It simplifies the process of generating presentations for users with no design expertise, all within Google Slides. (slidesai.io)
Gamma (1 mark)
Gamma is an AI design tool that automatically generates visually appealing presentations from text prompts. It helps create professional-quality slides without requiring coding or design skills. (gamma.app)
******* Or other AI Slide generation tools like **Plus AI, MagicSlides, Simplified AI & Tome.**

[U] [3]

31 **Automated slide creation (1 mark)**
AI-powered slide design tools automatically generate presentations by analyzing text input or prompts. These tools use machine learning to create slides that are visually appealing and well-structured without requiring manual design effort. For example, tools like **Canva Magic Design** or **Gamma** automatically suggest layouts, fonts, colors, and images that align with the content.
Personalization and customization (1 mark)
AI tools offer customization options, allowing users to tailor the generated designs. Users can modify layouts, colors, fonts, and even content based on specific preferences or branding requirements, ensuring the presentation reflects the desired style and tone.
Efficiency and time-saving (1 mark)
AI-powered slide design significantly speeds up the presentation creation process. It automates tasks like formatting, content alignment, and design selection, allowing users to focus on refining the message. This is especially beneficial for users with limited design experience or tight deadlines.

[K] [3]

32 **Standardized templates and design guidelines (1 mark)**
Plus AI ensures consistency by utilizing **pre-set templates** and design guidelines that include specific font styles and color palettes. These templates are designed to maintain a uniform look throughout the presentation, helping users avoid mismatched fonts and colors.

Automatic style application (1 mark)
When creating slides, Plus AI automatically applies the **chosen font** and **color scheme** to all elements in the presentation. This eliminates the need for manual adjustments and ensures that every slide follows the same visual style, promoting consistency.

Customizable branding options (1 mark)
Plus AI allows users to input their own **branding guidelines**, including specific fonts and color codes. This customization ensures that all slides created using the tool adhere to the brand's identity, maintaining professional and consistent design throughout the presentation.
