SCHEME OF EVALUATION

QP CODE: 25900040

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR EXAMINATION MARCH 2025

SECOND SEMESTER

Discipline Specific Core Course (DSC) - MG2DSCCMA101 - RESPONSIVE WEB DESIGNING

(2024 ADMISSION ONWARDS)

Duration: 1.5 Hours **Maximum Marks: 50**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I), and ppreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Very Short Answer Questions. Answer all questions. Each question carries 2 marks

1. **Name any two pop-up boxes available in JavaScript. [K] / [CO1]**
   Ans: Alert(),prompt(),confirm()—any two [1 mark each]

2. **Name any two key features of jQuery. [U] / [CO2]**
   Ans: Simplified DOM manipulation,Event handling, AJAX support,Cross-browser compatibility (any two) [1 mark each]

3. **Name the foundational layout element in bootstrap that wraps content and align it consistently. [U] / [CO3]**
   .container or .container-fluid [2 marks]

4. **If a website feels like an app, where you don't have to reload pages, what might be causing that? [U] / [CO1]**
   Caused by AJAX or SPA using JavaScript/jQuery

5. **Any four predefined components in Bootstrap. [U] / [CO3]**
   Navbar,Cards,Alerts,Buttons,Modals (any four)

[2x5 = 10]

Part B

Short Answer Questions.

Answer any 5 questions. Each question carries 5 marks

6. **Describe the concept of variable scope in JavaScript. [U] / [CO1]**
   Scope refers to the accessibility of variables.[1/2 Marks]
   Three types: **Global**, **Function/Local**, and **Block scope (with let/const)**.

7. **Explain the steps to implement form validation using jQuery ? [K] / [CO2]**

   Steps with example program.[5 marks]

   Steps only[3 marks]

   Example only[3 marks]

8. **State the importance of typography in web design? [U] / [CO3]**
   Typography plays a **critical role in web design** as it directly affects **usability, aesthetics, brand identity, and user experience**. Explain with example [5 marks]

9. **Describe two ways to include JavaScript in an HTML file. [U] / [CO1]**
   Internal JavaScript: JavaScript code is written **within the HTML file itself**, typically inside the <script> tag. The <script> tag is placed either in the <head> or at the end of the <body> section.
   External JavaScript: The JavaScript code is written in a **separate file** with a .js extension.This file is linked to the HTML document using the <script src="filename.js"></script> tag.
   Explain with example.
   Explanation only[4 marks]
   Two Examples[5 marks]

10. **Explain the usage of .detach method? [U] / [CO2]**

    The .detach() method in jQuery is used to **remove an element from the DOM** while **preserving its data and event handlers**. This makes it different from .remove(), which discards everything related to the element.
    Explanation with Syntax and example [5 marks]

11. **Distinguish the difference between fw-light and fw-bold classes in Bootstrap. [U] / [CO3]**

    Bootstrap provides utility classes to control the **font weight** of text elements. Two such classes are:

    fw-light: Applies a **light font weight**, typically 300 depending on the browser and available font, Used when a **softer, thinner appearance** is desired., Helps give a **minimal or elegant look**.

    fw-bold: Applies a **bold font weight**, typically 700. Used to **highlight or emphasize** important content. Makes text stand out more prominently on the page

    Explain with syntax and example[5 marks]

12. **Illustrate the difference between entry control loop and exit control loop with proper example [U] / [CO1]**

    Explain with example[5 marks]

[5x5 = 25]

Part C

Essay Questions. Answer any 1 question. Each question carries 15 marks

13. Discuss the various methods for handling events in jQuery. Provide examples of methods such as Click event, Hover event and Submit event ? [U] / [CO2]

jQuery simplifies **event handling** by providing various methods to **attach functions to DOM elements** that respond to user actions like clicking, hovering, submitting, etc.

Explain each with syntax and example. [5 marks each]

14. Discuss the principles of Responsive Web Design . [U] / [CO3]

Responsive Web Design (RWD) is a design approach that ensures a website looks and functions well across a **variety of devices** and screen sizes, such as desktops, tablets, and smartphones.

Key Principles:

Fluid Grid Layouts, Mobile-first, Media queries, Viewport meta tag, Bootstrap utilities etc.

Explain in detail with examples [15 marks]

[15x1 = 15]
