QP Code:25900048

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR EXAMINATION MARCH 2025

SECOND SEMESTER

Multi-Disciplinary Courses (MDC) - MG2MDCCSC101 - MASTERING SPREADSHEETS

(2024 ADMISSION ONWARDS)

Duration: 1 Hours **Maximum Marks: 35**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Scheme of Evaluation

Part A

MCQ

Answer all questions

Each question carries **1** marks

1. Which alignment option is used by default for text entries in LibreOffice Calc? [K] / [CO1]

   a). Left b). Right

   c). Center d). Justified

   Ans: a) Left

2. Where can you manage Named Ranges in LibreOffice Calc? [K] / [CO1]

   a). Sheet → Named Ranges and Cells Expressions b). Format →

   c). Edit → Named Ranges d). Tools → Options

   Ans: a). Sheet → Named Ranges and Expressions

3. Identify an example of data visualization in spreadsheets. [U] / [CO1]

   a). Writing a report b). Formatting text in bold

   c). Inserting a header d). Creating a chart or graph

Ans: d) Creating a chart or graph

4. Which of the following data types is used to store values like 12-05- 2024 or 15:30:00 in LibreOffice Calc? [U] / [CO1]

a). Number b). Text

c). Date/Time d). Boolean

Ans : c). Date/Time

5. How is a cell referenced in LibreOffice Calc? [U] / [CO1]

a). Row number followed by row column letter (e.g., 5A)
b). Column letter followed by number (e.g., A5)
c). Column number followed by by row number (e.g., 1,5)
d). Sheet number followed column letter (e.g., S1A5)

Ans: b). Column letter followed by row number (e.g., A5)

6. What happens if you use multiple criteria with "OR" conditions in an Advanced Filter? [U] / [CO1]

a). Only rows that match all shown. conditions are shown.
b). No data is
c). Only rows that match one of the shown. conditions are shown.
d). Only unique data is

Ans: c). Only rows that match one of the conditions are shown.

7. What is the primary purpose of Auto Fill in Libre Office Calc? [K] / [CO1]

a). To format cells
b). To copy data and fill a series of numbers,dates etc
c). To delete duplicate entries
d). To sort data in ascending order

Ans: b). To copy data and fill a series of numbers, dates etc

8. What does "Rows" mean in LibreOffice Calc's Find and Replace dialog? [U] / [CO1]

a). It searches for the term from left to right across the rows
b). It searches for the term top to bottom along the columns
c). It searches within a specific row
d). It stops searching when a row is reached

Ans: **a). It searches for the term from left to right across the rows**

9. What is the primary purpose of a chart in a spreadsheet? [K] / [CO2]

a). To format text in cells
b). To visually represent data for better understanding
c). To sort and filter data text automatically
d). To store large amounts of information

Ans: b). To visually represent data for better understanding

10. What is the purpose of ROUND() function in LibreOffice Calc? [U] / [CO2]

a). Find the square root of a specified number
b). Round a number to a number of decimal places
c). Calculate the remainder of a text division
d). Convert numbers to

Ans: b). Round a number to a specified number of decimal places

11. What is the benefit of using the Autosum feature instead of manually typing a SUM formula? [U] / [CO2]

a). It saves time
b). It reduces errors
c). It provides more flexibility
d). All of the above

Ans: d). All of the above

12. Which of the following is NOT an advantage of using macros? [U] / [CO2]

a). Automates repetitive tasks
b). Reduces human errors
c). Requires manual execution increases each time
d). Saves time and efficiency

Ans: c). Requires manual execution each time

13. What will =RIGHT("Programming", 4) return in LibreOffice Calc? [A] / [CO2]

a). gram
b). ramm
c). ming
d). ammi

Ans: c). ming

14. What will be the result of the formula =IF(A1=0, "Zero", "Non-Zero") if the value in cell A1 is blank? [A] / [CO2]

a). Zero
b). Non-Zero
c). #N/A
d). ""

Ans: a) Zero

15. What is the output of =YEAR(TODAY()), if today is 18th March 2025? [A] / [CO2]

a). 2023
b). 2024
c). 2025
d). 2026

Ans: c). 2025

[1x15 = 15]

Part B

Short Answer Questions

Answer any **4** questions

Each question carries **5** marks

16. What are the different ways to import data into LibreOffice Calc? Give examples of supported file formats. [K] / [CO1]

Ans: Give 4 marks for any 2 of the following methods

1. Opening Files Directly

Use File → Open... to open supported spreadsheet and text files.

2. Insert Sheet from File

Use Sheet → Insert Sheet from File... to add external data into a new sheet.

3.Copy and Paste from Other Applications

4. External Data Links

Sheet → Link to External Data

5. Database Connections

6. Drage And Drop

Give I mark for examples of supported file formats

17. Explain the process of applying conditional formatting to a range of cells in a spreadsheet. [U] / [CO1]

Ans: **Conditional formatting is used to highlight data that is outside the specifications that you have set. (Definition 2 mark)**

Process for applying Conditional Formatting

1) Ensure that AutoCalculate is enabled: Data > Calculate > AutoCalculate.

2) Select the cells where you want to apply conditional formatting.

3) Go to Format > Conditional > Condition , Color Scale, Data Bar, Icon Set, or Date, on the Menu bar to open the Conditional Formatting dialog. Any conditions already defined are displayed.

4) Click Add to create and define a new condition. Repeat this step as necessary.

5) Select a style from the styles already defined in the *Apply Style* drop-down list. Repeat this step as necessary.

6) Alternatively, select New Style to open the Cell Style

dialog and create a new cell style. Repeat this step as necessary.

7) Click OK to save the conditions and close the dialog. The selected cells are now set to apply a result using conditional formatting (3 marks)

18. List and briefly explain different categories of functions available in spreadsheets. [K] / [CO2]

    Ans: Any 5 Functions with its description (1 mark for each category)

19. Provide an example dataset and describe how to summarize data using a Pivot Table. [U] / [CO2]

    Ans: Give an example Dataset (2 marks)

    Process to summarize the above example using pivot table (3 marks)

20. Explain absolute referencing used in spreadsheets with example. [U] / [CO2]

    Ans: The cell reference remains constant when a formula is copied to other cells. It is achieved by adding dollar signs ($) before the column letter and row number. (4 marks)
    Example (1 mark)

21. In a bar chart comparing product sales, the legend is missing. How would you add and customize a legend to enhance the chart's readability? [A] / [CO2]

    Ans: Steps to add Legends(3 marks)

    Steps to customize legends(2 marks)

[5x4 = 20]
