MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR EXA MINATION MARCH 2025

SECOND SEMESTER

Multi-Disciplinary Courses (MDC) - MG2MDCJMC100 - AI AND MEDIA

(2024 ADMISSION ONWARDS)

Duration: 1.5 Hours
Maximum Marks: 50

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple Choice Questions

Answer **all** questions

Each question carries **1** marks

1. a) Chatbots [U] / [CO1]
2. a) AI surpassing human control [U] / [CO1]
3. a) Neural Networks [U] / [CO1]
4. b) Optimizing ad placement based on user [K] / [CO1]
5. b) John McCarthy [K] / [CO1]
6. b) To provide guidance and ensure responsible AI development and deployment [U] / [CO3, CO4, CO5]
7. b) To make educational and marketing content more engaging [U] / [CO2]
8. b) It helps visually impaired users access content [U] / [CO2]
9. b) Create realistic images from text descriptions [U] / [CO2]
10. b) Improving sound quality by removing noise [K] / [CO2]
11. a) They are based on text prompts and deep learning models [K] / [CO2]
12. c) A field of study focused on human language and computers [U] / [CO2]
13. a) Krisp [U] / [CO2]

14. d) Grammarly [U] / [CO2]

15. c) Inputs guiding AI to generate meaningful content [U] / [CO2]

[1x15 = 15]

Part B

Short Answer Type Questions (100 Words)

Answer any **5** questions

Each question carries **3** marks

16. Development of AI in Space Exploration: [A] / [CO5]

- Automates satellite and rover functions (e.g., Mars rovers).
- Enables image analysis and data interpretation from space.
- Supports navigation, path planning, and communication.
- Predicts spacecraft malfunctions and maintenance needs.
- Reduces manual intervention in high-risk missions.

17. Use of AI in Marketing Media Content: [An] / [CO5]

- Analyzes consumer data for targeted ad creation.
- Automates content scheduling across platforms.
- Generates product descriptions, captions, and visuals.
- Tracks engagement and modifies content in real-time.
- Uses chatbots and recommendation systems to personalize UX.

18. Uses of Generative AI in Entertainment: [An] / [CO3, CO4, CO5]

- Creates digital characters and synthetic voices.
- Develops storylines, scripts, and music automatically.
- Enhances VFX and animation through AI rendering.
- Assists in dubbing and lip-syncing.
- Offers real-time virtual set design.

19. Difference Between ANI and AGI: [U] / [CO1, CO4]

- ANI: Specialized in specific tasks (e.g., Siri, chess AI).
- AGI: Performs any intellectual task a human can do.
- ANI lacks consciousness and flexibility.
- AGI aims for human-like general reasoning.
- AGI is still theoretical, ANI is widely used.

20. AI Language Models & Purpose: [K] / [CO2]

- AI models trained on large datasets of human language.
- Understands, generates, and summarizes text.

- Examples: GPT, BERT.
- Used in translation, chatbots, and content creation.
- Supports human-machine communication.

21. AI for Personalized Marketing Emails: [A] / [CO2]

- Analyzes user behavior and preferences.
- Automatically generates tailored email content.
- Uses dynamic subject lines and personalization.
- Schedules optimal delivery time.
- Increases open rates and engagement.

22. Applications of AI-Driven Audio Enhancement Tools: [K] / [CO2]

- Removes background noise from recordings.
- Improves clarity in voiceovers and calls.
- Enhances speech in low-quality audio.
- Restores old or damaged audio files.
- Used in podcasts, interviews, and media editing.

23. AI-Driven Content Creation – Advantages & Disadvantages [An] / [CO2]

Advantages:

- Speeds up content generation.
- Cost-effective and scalable.
- Can personalize at scale.

Disadvantages:

- Risk of misinformation and bias.
- Lacks emotional nuance.
- Ethical issues around originality.

[3x5 = 15]

Part C

Essay Type Questions (350 Words)

Answer any **2** questions

Each question carries **10** marks

24. **Ethical Implications of Using AI to Generate Content:** [An] / [CO3]

- **Authorship and Credit:** Who owns AI-generated content?

- **Bias and Discrimination:** Models can reinforce stereotypes.
- **Misinformation:** Risk of generating fake or harmful content.
- **Plagiarism:** AI may unknowingly replicate existing material.
- **Transparency:** Lack of disclosure may mislead audiences.
- **Manipulation:** Deepfakes and fake news used to deceive.
- **Accountability:** Who is responsible for AI errors?
- **Fair Use & Copyright:** Unclear boundaries on dataset usage.
- **Job Displacement:** Threat to creative professionals.
- **Conclusion:** Ethical guidelines and oversight are essential.

25. **Applications of AI in Media Production**: [An] / [CO3, CO4, CO5]

- **Script Writing:** AI tools generate plotlines and dialogues.
- **Editing:** Automates video and audio cuts using pattern recognition.
- **Subtitling:** Auto-generates multilingual captions.
- **Voice Synthesis:** Creates synthetic narrators.
- **Virtual Anchors:** AI-generated news presenters.
- **Personalization:** Delivers content based on viewer preferences.
- **Automation:** Speeds up post-production tasks.
- **Social Media Management:** AI creates and posts content.
- **Analytics:** Provides viewer insights to improve strategy.

26. **Risks & Benefits of AI in Journalism & News** [An] / [CO2]

Benefits:

- Automates routine reporting.
- Analyzes big data for investigative journalism.
- Provides 24/7 news updates.
- Customizes content for different audiences.

Risks:

- Misinformation and content manipulation.
- Reduction in human oversight.

- Ethical issues with synthetic newsreaders.
- Echo chambers from algorithmic filtering.

27. **Process of AI-Driven Content Creation**: [U] / [CO2]

- **Input Prompt:** User provides keywords or instructions.
- **Natural Language Processing:** AI interprets the prompt.
- **Data Access:** Model draws from training data.
- **Content Generation:** Produces text, image, or audio content.
- **Refinement:** Allows user editing and feedback.
- **Output Delivery:** Final content is formatted and shared.
- **Applications:** Blogs, ads, stories, videos, etc.
- **Tools:** ChatGPT, Jasper, Copy.ai, DALL·E, Synthesia.

[10x2 = 20]
