MAHATMA GANDHI UNIVERSITY,KOTTAYAM

MGU-UGP (HONOURS)REGULAR EXAMINATION ,MARCH 2025

SECOND SEMESTER

Discipline specific core course (DSC)MG2DSCPHL100: INDUCTIVE LOGIC

PART A

Answe any 8 questions

Each question carries 2 marks

1. Proposition - thing which affirms or denied
2. Logic is science of reasoning
3. False generalization
4. Combining two or more simple propositions - coneectives like and- or..if.. then
5. Derive a new conclusion based on similar situations
6. The relationship between cause and effect
7. Deducting known effect from the known things- identify the cause of the remaining effect
8. Law of identity -Law of non- contradiction- law of excluded middle
9. Hypothesis assumes a causal connection-
10. General to paricular- from individual instances to generalization
11. Supposition which is proved and found to be false
12. A set of premises and coclusion

PART B

ANSWER ANY SIX QUESTIONS

EACH QUESTION CARRIES 5 MARKS

13. Foundation of argument- truth and validity of the argument depends on premises
14. Induction starts from observed fact- leads to hypothesis formation- support evidence- strengthen theories
15. Scientific induction establishes causal connection between the events-non scientific informal generalization
16. Not varifiable through direct or indirect observation-logically week
17. Applicable in large number of instances- fails in the situations like multiple cause exist-
18. Law of non - contradiction- A statement cannot be true and false at the same time- Law of excluded middle- A statement is either true or false
19. Hypothesis are imaginative- Nature give broad hints-prepared minds know how to take it
20. James wat -relation between heat and pressure
21. Every event must have a cause- same cause produce same effect

PART C
ANSWE ANY 2 QUESTIONS
EACH QUESTION CARRIES 12 MARKS

22. Rejection of causalty-relation of ideas and matters of fact- psychological explanation-future will resembles the past
23. Deduction- general to paricular- conclusion conclusively drawn- specific conclusions- certain- Induction starts from observation- inductive leap- probable truth
24. Analogy - inference from similar facts or events- hypothesis- tentative explanation for observed facts-
25. Hypothesis - try to explain the causal relation among the events based on observation- Mill's method- Method of Agreement- method of difference- Joint method of agreement and difference- method of concomitant variation- method of residues
26. Process of comparison among the verified hypothesis -elimination of competing hypothesis- select best from the verified hypothesis- proved hypothesis-
Verified with support evidences raised the status of theory
