QP CODE: 25900162

MAHATMA GANDHI UNIVERSITY, KOTTAYAM
MGU-UGP (HONOURS)
REGULAR EXAMINATION MARCH 2025
SECOND SEMESTER
Discipline Specific Core Course (DSC) - MG2DSCPJM102 -
DIGITALJOURNALISM AND MOJO
(2024 ADMISSION ONWARDS)

Duration:2 Hours **Maximum Marks: 70**

Part A
Multiple Choice Questions
Answer all questions. each question carries 1 mark

No	Answer
1	a). Portability
2	b). By enabling ordinary people to report real-time events using their smartphones
3	c). Phishing attacks
4	a). Spotify Podcasts
5	a). Identifying what type of content works best for the target audience
6	b). Use the video's embed code or link it
7	b). Sound
8	c). Roundtable formats feature multiple participants discussing topicscollectively
9	a). Otter.ai
10	b). To blur the background and focus on the subject

Part B
Short Answer Type Questions Answer any ten questions. each question carries 3 marks

No	Answer
11	Smartphones have revolutionized news coverage by enabling real-time reporting, instant content creation, and quick distribution, making news more accessible and dynamic.
12	To improve video quality while using MOJO, use a stabilizer or tripod, ensure good lighting, use an external microphone for clearer sound, shoot in high resolution, and avoid shaky camera movements.
13	An E-Zine (electronic magazine) is a digital publication distributed online, typically featuring articles, images, and multimedia content. It can be delivered via email or hosted on websites, offering a more interactive and accessible alternative to traditional print magazines.
14	The main elements of an interactive E-Zine include clickable links, embedded videos, interactive polls or surveys, social media integration, dynamic content such as animations or slideshows, and user-commenting sections. These features enhance reader engagement and make the experience more immersive.
15	An E-Zine creator can optimize content for SEO by using relevant keywords in titles, headings, and throughout the content, adding alt text to images, ensuring fast page load times, creating mobile-friendly designs, including internal and external links, and regularly updating content with fresh articles. Additionally,

	incorporating meta descriptions, optimizing images, and promoting the E-Zine on social media can improve its search engine visibility.
16	Key factors that make a mobile journalist effective include technical proficiency with mobile devices, strong storytelling skills, adaptability to fast-paced environments, the ability to capture high-quality video and audio, effective use of social media for real-time reporting, and understanding of ethical journalism practices.
17	A podcast's title and description significantly impact its discoverability by incorporating relevant keywords that align with what potential listeners are searching for. For example, a podcast titled "Tech Innovations for Entrepreneurs" paired with a description like "Stay up to date on the latest tech trends, gadgets, and apps designed to help entrepreneurs grow their businesses" will attract listeners interested in technology and entrepreneurship. Clear, descriptive titles and concise, keyword-rich descriptions improve search engine optimization (SEO), making the podcast easier to find in directories or search engines.
18	Three key features of mobile journalism are portability, real-time reporting, and multimedia integration.
19	Three mobile apps for recording or editing podcasts are: 1. Anchor 2. GarageBand 3. Audacity (via mobile version or alternative apps like WaveEditor)
20	The 'export' function in video editing apps allows users to save the edited video in a specific file format and resolution, making it ready for sharing, distribution, or uploading to platforms like YouTube or social media. It consolidates all edits, effects, and adjustments into a final product, ensuring compatibility with various devices and platforms. Additionally, it offers options to adjust the video's quality and file size to suit different needs, like streaming or storage.
21	An external lens improves mobile video quality by enhancing the phone's camera capabilities. It allows for better zoom, wider angles, improved depth of field, and clearer focus, resulting in sharper and more professional-looking videos. External lenses, such as wide-angle, macro, or telephoto lenses, provide more creative control and higher quality than the built-in lens of the mobile camera.
22	A ring light in MOJO setups provides even, flattering lighting by surrounding the camera lens with a circular light source. It helps eliminate shadows, reduces blemishes, and ensures consistent illumination, improving the overall video quality, especially in low-light conditions. It is particularly useful for close-up shots, such as interviews or vlogs, ensuring the subject is well-lit and visually appealing.

Part C
Essay Type Questions Answer any two questions. each question carries 15 marks

No	Answer
23	Using mobile journalism equipment raises several ethical concerns, primarily around issues of privacy, accuracy, and bias. Mobile journalists may inadvertently capture sensitive or private information, leading to privacy violations, especially in public spaces or during personal moments. The ease of editing and sharing content can also contribute to the spread of misinformation if proper fact-checking is not

	followed, potentially compromising journalistic integrity. Additionally, the portability and accessibility of mobile devices can lead to a lack of transparency about the context in which content is created, causing ethical dilemmas related to manipulation, consent, and the responsible portrayal of subjects. Balancing speed with ethical journalism standards is crucial in the rapidly evolving mobile journalism landscape.
24	Application level
25	Essential tools and accessories for mobile journalism include a smartphone with a high-quality camera, a tripod or gimbal for stability, an external microphone for better sound quality, and portable lighting (like a ring light) to ensure proper illumination. Additionally, external lenses (wide-angle, macro, or telephoto) can enhance the phone's camera capabilities, while editing apps (such as Adobe Premiere Rush or InShot) are necessary for post-production. A power bank ensures the mobile device stays charged during long shoots, and storage devices or cloud backups help manage large media files. These tools collectively enhance the quality and efficiency of mobile journalism.
26	Mobile journalists use various distribution platforms, such as social media (Facebook, Twitter, Instagram, TikTok), news apps, podcasts, and video-sharing sites (YouTube, Vimeo) to reach their audience. They leverage these platforms for real-time updates, sharing multimedia content, and engaging directly with followers. Social media allows for immediate dissemination of breaking news, while podcasts and video platforms offer more in-depth storytelling. Additionally, mobile journalists often utilize websites and email newsletters to further distribute their content, build a loyal following, and promote interactivity through comments and shares, expanding their reach and enhancing audience engagement.
