[1x20 = 20]

Part B

Short Answer

Answer any **10** questions

Each question carries **3** marks

21. Give a brief account on the contributions of Aristotle. [U] / [CO1]

In *De Anima* (*On the Soul*), he proposed that the soul is the form of the body, not a separate entity. He identified three types of souls: vegetative (plants)**,** sensitive (animals)**, and** rational (humans)**.**

Aristotle believed that knowledge comes from Experience and observation

He wrote extensively on memory, association, and learning, proposing basic laws of association: similarity**,** contrast**, and** contiguity

22. Give an account of the functions Personality Psychologist do. [U] / [CO2]

Research, assess, diagnose and treat, training & coaching, designing therapy & interventions

23. What is Emotional Intelligence, and why is it important for coping with challenges? [U] / [CO4]

Emotional Intelligence is the ability to recognize, understand, manage, and utilize emotions effectively. It is important for coping with challenges because it enhances self-awareness, emotional regulation, motivation, empathy, and coping strategies.

24. Explain the evolution of current definition of psychology. [An] / [CO1]

From the study of Soul (Plato, Aristotle)) followed by “Study of the mind”(Descartes and Locke) then Scientific study of conscious experience”(Wilhelm Wundt,)then “Scientific study of observable behavior”(Watson and Skinner)to the current definition as scientific study of mental processes and behavior(Cogniitve Revolution))Modern definition Scientific study of behavior and mental processes”

25. Briefly explain biopsychological perspective in psychology. [K] / [CO1]

Biopsychological perspective is the study of the biological bases of behavior and mental processes. It emphasizes the role of the brain, nervous system, genetics, hormones, and neurotransmitters in shaping human experience. Behavior is linked to specific brain regions

26. Comment on the contribution of B F Skinner to psychology. [U] / [CO1]

Operant conditioning- emphasizing how consequences, like reinforcements and punishments shape behaviour, and his work on schedules of reinforcement.

27. Who are the professionals who collaborate to deal with mental health disorders? [U] / [CO2]

Psychiatrist, clinical psychologists, psychotherapist, social worker, occupational therpists.(students might write role and qulifications of each also)

Max Wertheimer was a pioneering psychologist best known as the founder of Gestalt psychology**.**One of the fathers of Gestalt psychology along with Wolfgang Köhler and Kurt Koffkawhich argues that **“**the whole is greater than the sum of its parts.”

This challenged earlier approaches like structuralism which focused on breaking consciousness into components. In his famous experiment, Wertheimer discovered the phi phenomenon the illusion of movement when two stationary lights flash in succession. This laid the foundation for understanding apparent motion, which is key in film, animation, and perception

32. What is Community Psychology [U] / [CO2]

Community psychology focuses on understanding and improving the well-being of individuals within their communities by addressing social, environmental, and cultural factors

33. Assess the role of confidentiality in maintaining the therapeutic relationship. [An] / [CO4]

Confidentiality is essential in maintaining the therapeutic relationship as it creates a safe and trustworthy environment for patients to share personal information. Confidentiality ensures that patients' privacy is protected, and their disclosures are not shared without consent. This fosters a sense of security, encouraging patients to be open and honest, which is critical for effective therapy.

[3x10 = 30]

Part C

Essay

Answer any **2** questions
