MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) Regular EXAMINATION October 2025

Third SEMESTER

Discipline Specific Elective (DSE) - MG3DSECOM205 - FUNDAMENTALS OF LOGISTICS MANAGEMENT

(2024 ADMISSION ONWARDS)

Duration: 1 Hour 15 Minutes **Maximum Marks: 70**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

MCQ Questions

Answer any **20** questions

Each question carries **1** marks

1. Which of the following is true about intermodal transportation [U] / [CO1]

   a). One operator is responsible for the entire journey

   b). A single transport contract is issued

   c). Multiple carriers issue their own document

   d). Liability rests only with the first carrier

2. The “Green Dot” symbol on packaging in India indicates: [U] / [CO2]

   a). The product is eco-friendly

   b). The product is suitable for vegetarians

   c). The packaging is recyclable

   d). The product is GMO-free

3. Goods are placed in racks, shelves, or bins in which warehouse zone? [U] / [CO3]

   a). Packing zone

   b). Storage zone

   c). Shipping zone

   d). Receiving zone

4. When analysing ERP functions, what does the term MRP represent? [An] / [CO4]

a). Material Resource Planning
b). Material Requirements Planning
c). Manual Resource Processing
d). Market Research Planning

5. Which of the following is an example of reverse logistics? [U] / [CO1]

a). Delivering groceries to households
b). Collecting used mobile phones for recycling
c). Shipping new cars to dealerships
d). Sending raw materials to factories

6. Which of the following statements is true about logistics? [U] / [CO1]

a). Logistics focuses only on transportation.
b). Logistics is confined to domestic markets.
c). Logistics includes planning, movement, and storage of goods, services, and information.
d). Logistics is unrelated to customer satisfaction.

7. Which equipment is widely used in ports for loading/unloading ships? [U] / [CO2]

a). Gantry cranes
b). Conveyor belt
c). Pallet trolley
d). Handcart

8. Which of the following is not stored in a temperature-controlled warehouse? [U] / [CO3]

a). Fresh produce
b). Frozen meat
c). Industrial items
d). Ice cream

9. A major barrier to implementing new technology in logistics, especially for small and medium-sized enterprises (SMEs), is often the: [U] / [CO4]

a). Lack of a clear return on investment (ROI)
b). Overabundance of skilled technical staff
c). Ease of integration with existing systems
d). Low initial cost of the technology

10. Which engineered system is most suitable for moving goods in a fixed route continuously? [U] / [CO2]

a). Conveyor system
b). Forklift
c). Hand trolley
d). Drone delivery

11. Cross-docking is a warehouse strategy that: [U] / [CO4]

a). Stores products for long periods
b). Transfers goods directly from inbound to outbound without storage
c). Only handles damaged goods
d). Requires maximum storage space

12. Which of the following is NOT a core component of an RFID system? [U] / [CO2]

a). Barometric Sensor
b). RFID Tag
c). RFID Reader
d). Antenna

13. The Reorder Point Formula considers: [An] / [CO3]

a). Lead time and average usage
b). Storage capacity
c). Number of suppliers
d). Packing efficiency

14. Which of the following best describes the role of IoT in logistics? [An] / [CO4]

a). Predicting customer emotions
b). Connecting physical devices for real-time tracking and monitoring
c). Replacing ERP systems entirely
d). Reducing the need for transportation

15. Which document is checked against goods received at a warehouse? [U] / [CO3]

a). Sales Invoice
b). Purchase order
c). Delivery Note
d). Work order

16. Which of the following is a major advantage of road transport in logistics? [U] / [CO1]

a). High speed for long international routes
b). Door-to-door delivery and flexibility
c). Lower cost for bulk commodities
d). No restrictions on cargo weight

17. The primary function of secondary packaging is to: [U] / [CO2]

a). Directly protect the product from damage
b). Facilitate handling, grouping, and transportation of primary packages
c). Act as the final retail-ready package
d). Provide tamper evidence only

18. Which type of warehouse is owned and operated by a single business entity? [U] / [CO3]

a). Public Warehouse b). Private Warehouse

c). Contract Warehouse d). Bonded Warehouse

19. Which logistics document is represented by EDI 856? [An] / [CO4]

a). Invoice b). Advance Ship Notice (ASN)

c). Purchase Order d). Payment advice

20. A major cause of water pollution linked to logistics operations is: [U] / [CO4]

a). Runoff from fuel spills at transport hubs b). Use of energy-efficient lighting

c). Optimized supply chain software d). Employee carpooling initiatives

21. Which provider integrates technology, strategy, and supply chain management across multiple 3PLs? [U] / [CO1]

a). 5PL b). 3PL

c). 4PL d). 6PL

22. A purchase requisition is created to: [U] / [CO2]

a). Pay suppliers b). Request goods or services

c). Approve contracts d). Track transport

[1x20 = 20]

Part B

MCQ Questions

Answer any **25** questions

Each question carries **2** marks

23. A company has high inbound and outbound volumes and wants to minimize product travel time by keeping docks close together. Which layout should they choose? [An] / [CO3]

a). Randomized flexible layout b). L-shaped layout

c). U-shaped layout d). I-shaped (through-flow) layout

24. A retailer complains that it cannot track the location and condition of its shipments in real-time. Which AI-driven solution MOST directly resolves this issue? [U] / [CO4]

a). Predictive maintenance tools b). AI + IoT enabled tracking systems

c). Virtual assistants for HR tasks d). Automated billing software

25. Consider the following statements and choose the correct option. [U] / [CO1]
Statement 1: Containerization revolutionized logistics in the mid-20th century.
Statement 2: Containerization refers to the use of standard containers for efficient transportation.

a). Both statements 1 and 2 are true
b). Statement 1 is true and statement 2 is false
c). Statement 1 is false and statement 2 is true
d). Both statements 1 and 2 are false

26. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO1]
Assertion(A): Ocean freight is more economical than air freight for bulk shipments.
Reason(R): Sea transport has higher cargo capacity and lower cost per unit.

a). Both A and R are true and R is the correct explanation of A
b). Both A and R are true, but R is not the correct explanation of A
c). A is true but R is false
d). A is false but R is true

27. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO4]
Assertion (A): Automated inventory management systems reduce human error in stock tracking.
Reason (R): Manual data entry is prone to mistakes and inconsistencies

a). Both A and R are true, and R is the correct explanation of A
b). Both A and R are true, but R is not the correct explanation of A
c). A is true, but R is false
d). A is false, but R is true

28. Which of the following examples reflects a people-oriented security concern rather than asset-oriented? [U] / [CO3]

a). Preventing forklift collisions in aisles
b). Restricting entry to the bonded warehouse
c). Installing RFID tags on cartons
d). Securing locks on storage racks

29. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO4]
Assertion (A): Automation in digital logistics reduces human errors.
Reason (R): Automated systems minimize manual data entry and processing.

a). Both A and R are true, and R is the correct explanation of A
b). Both A and R are true, but R is not the correct explanation of A
c). A is true, but R is false
d). A is false, but R is true

30. The gravity principle in material handling refers to: [U] / [CO2]

a). Increasing labor dependency

b). Using gravity to move materials and reduce power consumption

c). Moving materials only upwards

d). Selecting equipment based on material weight

31. Consider the following statements and choose the correct option. [U] / [CO1]
Statement 1: Automation in warehouses reduces errors and improves efficiency.
Statement 2: Human labor is no longer required in logistics operations.

a). Both statements 1 and 2 are true

b). Statement 1 is true and statement 2 is false

c). Statement 1 is false and statement 2 is true

d). Both statements 1 and 2 are false

32. Consider the following statements: Assertion(A) and Reason (R). Choose the correct alternative. [U] / [CO2]
Assertion (A): For a fleet of delivery vans, implementing a rigorous preventive maintenance schedule is more cost-effective in the long run than a corrective maintenance approach.
Reason (R): Preventive maintenance reduces the risk of unexpected breakdowns, which can lead to expensive emergency repairs, customer dissatisfaction, and lost revenue.

a). Both A and R are true, and R is the correct explanation of A

b). Both A and R are true, but R is not the correct explanation of A

c). A is true, but R is false

d). A is false, but R is true

33. Choose the correct statement from the following: [U] / [CO3]
Statement I: Flexibility in warehouse design supports scalability.
Statement II: Scalability means adapting to future growth and demand changes.

a). Both statements are true

b). Statement I is true, and Statement II is false

c). Statement I is false, and Statement II is true

d). Both statements are false

34. Match the following: [U] / [CO4]

a. Order accuracy	i. Builds customer trust
b. Communication	ii. Real-time updates on shipments
c. Returns management	iii. Long-term loyalty
d. Personalization	iv. Flexible delivery options

a). a-i, b-ii, c-iii, d-iv

b). a-ii, b-i, c-iii, d-iv

c). a-ii, b-iii, c-i, d-iv d). a-i, b-iii, c-ii, d-iv

35. A truckload of goods arrives at a warehouse and is immediately sorted and transferred onto outbound trucks without being stored. Which warehouse process is being applied? [K] / [CO3]

a). Order picking b). Cross-docking

c). Put-away d). Cycle counting

36. Consider the following statements and choose the correct option. [U] / [CO1]
Statement I: Inbound logistics involves the transportation of raw materials to a company.
Statement II: Inbound logistics deals with delivering finished goods to customers.

a). Statement I is true, Statement II is false b). Statement I is false, Statement II is true

c). Both statements are true d). Both statements are false

37. Consider the following statements about the objectives of packaging and state which are correct. [U] / [CO2]
Statement (1): Packaging aids in handling and transportation by reducing manual effort.
Statement (2): Unitisation helps in space optimisation and bulk movement.
Statement (3): Apportionment ensures portion control and ease of sale.
Statement (4): Sustainability in packaging has no relation to cost reduction.

a). (1), (2), and (3) only b). (2), (3), and (4) only

c). (1) and (4) only d). (1), (3), and (4) only

38. In India, warehouse receipts can be used for: [U] / [CO3]

a). Loan collateral b). Tax rebates

c). Insurance settlement only d). Brand valuation

39. A logistics company notices unusual duplicate invoices from a supplier. AI flags this transaction as suspicious using anomaly detection. [An] / [CO4]
This represents:

a). Predictive maintenance b). Supplier management

c). Fraud detection d). Inventory replenishment

40. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO4]
Assertion (A): Proper LRM leads to cost reduction and higher efficiency.
Reason (R): Efficient allocation of resources avoids duplication and waste.

a). Both A and R are true, and R is the correct explanation of A

b). Both A and R are true, but R is not the correct explanation of A

c). A is true, but R is false

d). A is false, but R is true

41. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO1]

Assertion (A): Big data analytics supports demand forecasting in logistics.

Reason (R): It helps companies predict customer demand patterns using past data

a). Both A and R are true, and R is the correct explanation of A

b). Both A and R are true, but R is not the correct explanation of A

c). A is true, but R is false

d). A is false, but R is true

42. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO1]

Assertion (A): Third-Party Logistics (3PL) providers are often used in outbound logistics.

Reason (R): Outsourcing distribution reduces the need for in-house logistics infrastructure.

a). Both A and R are true, and R is the correct explanation of A

b). Both A and R are true, but R is not the correct explanation of A

c). A is true, but R is false

d). A is false, but R is true

43. Match the following: [U] / [CO3]

a. Cross-docking	i. Direct transfer between trucks
b. Consolidation	ii. Combining small shipments into one
c. Deconsolidation	iii. Splitting bulk shipments
d. GOH Storage	iv. Hanging garments to preserve quality

a). a-i, b-ii, c-iii, d-iv

b). a-ii, b-iii, c-iv, d-i

c). a-iii, b-iv, c-i, d-ii

d). a-iv, b-ii, c-iii, d-i

44. Arrange the carrier onboarding process in the correct sequence: 1. Performance monitoring setup 2. Rate negotiation and agreement 3. Carrier evaluation and qualification 4. System integration and testing 5. Contract execution 6. Insurance and compliance verification [U] / [CO4]

a). 3 → 6 → 2 → 5 → 4 → 1

b). 1 → 6 → 2 → 5 → 4 → 3

c). 3 → 2 → 6 → 5 → 4 → 1

d). 3 → 6 → 1 → 4 → 5→ 2

45. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO2]

Assertion: Industrial trucks improve the speed and efficiency of material movement within warehouses.

Reason: Industrial trucks can store and retrieve pallets automatically without human supervision.

a). Both A and R are true, and R is the correct explanation of A

b). Both A and R are true, but R is not the correct explanation of A

c). A is true, but R is false

d). A is false, but R is true

46. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO1]

Assertion (A): Green logistics initiatives can be applied to outbound logistics.

Reason (R): Optimized routes and eco-friendly packaging reduce environmental impact.

a). Both A and R are true, and R is the correct explanation of A

b). Both A and R are true, but R is not the correct explanation of A

c). A is true, but R is false

d). A is false, but R is true

47. Consider the following statements and state which of the statements are true. [U] / [CO2]

Statement (1): The term "tertiary packaging" refers to the individual package that is in direct contact with the product.

Statement (2): A pallet containing multiple boxes of goods ready for shipping is an example of tertiary packaging.

Statement (3): Tertiary packaging primarily focuses on protecting the product during transit and handling.

Statement (4): The main purpose of tertiary packaging is to be appealing to the final consumer.

a). (1), (2), and (3) only

b). (2) and (3) only

c). (2), (3), and (4) only

d). (1) and (4) only

48. Consider the following statements and choose the correct option. [U] / [CO3]

Statement I: Dynamic layouts (flexible zones and reconfigurable racking) are especially beneficial where product mix and volume vary seasonally.

Statement II: Grid layouts are widely used in e-commerce warehouses because they allow systematic zoning and shorter picking routes when supported by automation.

a). Both statements are true

b). Statement I is true, and Statement II is false

c). Statement I is false, and Statement II is true

d). Both statements are false

49. What factors indicate readiness for a digital transformation in LIS? [U] / [CO4]

I. Stable current operations II. Change management capability III. Data quality and governance processes IV. Stakeholder buy-in across the organization

a). I and III only

b). II and IV only

c). I, II, and IV only

d). All factors I, II, III, and IV

[2x25 = 50]

MGU-UGP (HONOURS) Regular EXAMINATION October 2025

Third SEMESTER

Discipline Specific Elective (DSE) - MG3DSECOM205 - FUNDAMENTALS OF LOGISTICS MANAGEMENT

(2024 ADMISSION ONWARDS)

Duration: 1 Hour 15 Minutes **Maximum Marks: 70**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

MCQ Questions

Answer any **20** questions

Each question carries **1** marks

1. Which document is checked against goods received at a warehouse? [U] / [CO3]

   a). Sales Invoice b). Purchase order

   c). Delivery Note d). Work order

2. The primary function of secondary packaging is to: [U] / [CO2]

   a). Directly protect the product from damage b). Facilitate handling, grouping, and transportation of primary packages

   c). Act as the final retail-ready package d). Provide tamper evidence only

3. Goods are placed in racks, shelves, or bins in which warehouse zone? [U] / [CO3]

a). Packing zone b). Storage zone

c). Shipping zone d). Receiving zone

4. Which type of warehouse is owned and operated by a single business entity? [U] / [CO3]

a). Public Warehouse b). Private Warehouse

c). Contract Warehouse d). Bonded Warehouse

5. The “Green Dot” symbol on packaging in India indicates: [U] / [CO2]

a). The product is eco-friendly b). The product is suitable for vegetarians

c). The packaging is recyclable d). The product is GMO-free

6. Which of the following is not stored in a temperature-controlled warehouse? [U] / [CO3]

a). Fresh produce b). Frozen meat

c). Industrial items d). Ice cream

7. Which of the following statements is true about logistics? [U] / [CO1]

a). Logistics focuses only on transportation. b). Logistics is confined to domestic markets.

c). Logistics includes planning, movement, and storage of goods, services, and information. d). Logistics is unrelated to customer satisfaction.

8. A major cause of water pollution linked to logistics operations is: [U] / [CO4]

a). Runoff from fuel spills at transport hubs b). Use of energy-efficient lighting

c). Optimized supply chain software d). Employee carpooling initiatives

9. Which of the following is true about intermodal transportation [U] / [CO1]

a). One operator is responsible for the entire journey b). A single transport contract is issued

c). Multiple carriers issue their own document d). Liability rests only with the first carrier

10. Which of the following is a major advantage of road transport in logistics? [U] / [CO1]

a). High speed for long international routes
b). Door-to-door delivery and flexibility
c). Lower cost for bulk commodities
d). No restrictions on cargo weight

11. Which of the following is an example of reverse logistics? [U] / [CO1]

a). Delivering groceries to households
b). Collecting used mobile phones for recycling
c). Shipping new cars to dealerships
d). Sending raw materials to factories

12. A purchase requisition is created to: [U] / [CO2]

a). Pay suppliers
b). Request goods or services
c). Approve contracts
d). Track transport

13. A major barrier to implementing new technology in logistics, especially for small and medium-sized enterprises (SMEs), is often the: [U] / [CO4]

a). Lack of a clear return on investment (ROI)
b). Overabundance of skilled technical staff
c). Ease of integration with existing systems
d). Low initial cost of the technology

14. Which provider integrates technology, strategy, and supply chain management across multiple 3PLs? [U] / [CO1]

a). 5PL
b). 3PL
c). 4PL
d). 6PL

15. Which equipment is widely used in ports for loading/unloading ships? [U] / [CO2]

a). Gantry cranes
b). Conveyor belt
c). Pallet trolley
d). Handcart

16. When analysing ERP functions, what does the term MRP represent? [An] / [CO4]

a). Material Resource Planning
b). Material Requirements Planning
c). Manual Resource Processing
d). Market Research Planning

17. Which engineered system is most suitable for moving goods in a fixed route continuously? [U] / [CO2]

a). Conveyor system b). Forklift

c). Hand trolley d). Drone delivery

18. The Reorder Point Formula considers: [An] / [CO3]

a). Lead time and average usage b). Storage capacity

c). Number of suppliers d). Packing efficiency

19. Cross-docking is a warehouse strategy that: [U] / [CO4]

a). Stores products for long periods b). Transfers goods directly from inbound to outbound without storage

c). Only handles damaged goods d). Requires maximum storage space

20. Which of the following is NOT a core component of an RFID system? [U] / [CO2]

a). Barometric Sensor b). RFID Tag

c). RFID Reader d). Antenna

21. Which of the following best describes the role of IoT in logistics? [An] / [CO4]

a). Predicting customer emotions b). Connecting physical devices for real-time tracking and monitoring

c). Replacing ERP systems entirely d). Reducing the need for transportation

22. Which logistics document is represented by EDI 856? [An] / [CO4]

a). Invoice b). Advance Ship Notice (ASN)

c). Purchase Order d). Payment advice

[1x20 = 20]

Part B

MCQ Questions

Answer any **25** questions

Each question carries **2** marks

23. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO1]

Assertion (A): Big data analytics supports demand forecasting in logistics.
Reason (R): It helps companies predict customer demand patterns using past data

a). Both A and R are true, and R is the correct explanation of A
b). Both A and R are true, but R is not the correct explanation of A
c). A is true, but R is false
d). A is false, but R is true

24. Consider the following statements: Assertion(A) and Reason (R). Choose the correct alternative. [U] / [CO2]
Assertion (A): For a fleet of delivery vans, implementing a rigorous preventive maintenance schedule is more cost-effective in the long run than a corrective maintenance approach.
Reason (R): Preventive maintenance reduces the risk of unexpected breakdowns, which can lead to expensive emergency repairs, customer dissatisfaction, and lost revenue.

a). Both A and R are true, and R is the correct explanation of A
b). Both A and R are true, but R is not the correct explanation of A
c). A is true, but R is false
d). A is false, but R is true

25. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO4]
Assertion (A): Proper LRM leads to cost reduction and higher efficiency.
Reason (R): Efficient allocation of resources avoids duplication and waste.

a). Both A and R are true, and R is the correct explanation of A
b). Both A and R are true, but R is not the correct explanation of A
c). A is true, but R is false
d). A is false, but R is true

26. What factors indicate readiness for a digital transformation in LIS? [U] / [CO4]
I. Stable current operations II. Change management capability III. Data quality and governance processes IV. Stakeholder buy-in across the organization

a). I and III only
b). II and IV only
c). I, II, and IV only
d). All factors I, II, III, and IV

27. Consider the following statements and choose the correct option. [U] / [CO1]
Statement I: Inbound logistics involves the transportation of raw materials to a company.
Statement II: Inbound logistics deals with delivering finished goods to customers.

a). Statement I is true, Statement II is false
b). Statement I is false, Statement II is true

c). Both statements are true
d). Both statements are false

28. A retailer complains that it cannot track the location and condition of its shipments in real-time. Which AI-driven solution MOST directly resolves this issue? [U] / [CO4]

a). Predictive maintenance tools
b). AI + IoT enabled tracking systems

c). Virtual assistants for HR tasks
d). Automated billing software

29. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO4]

Assertion (A): Automation in digital logistics reduces human errors.
Reason (R): Automated systems minimize manual data entry and processing.

a). Both A and R are true, and R is the correct explanation of A
b). Both A and R are true, but R is not the correct explanation of A

c). A is true, but R is false
d). A is false, but R is true

30. Match the following: [U] / [CO3]

a. Cross-docking	i. Direct transfer between trucks
b. Consolidation	ii. Combining small shipments into one
c. Deconsolidation	iii. Splitting bulk shipments
d. GOH Storage	iv. Hanging garments to preserve quality

a). a-i, b-ii, c-iii, d-iv
b). a-ii, b-iii, c-iv, d-i

c). a-iii, b-iv, c-i, d-ii
d). a-iv, b-ii, c-iii, d-i

31. Consider the following statements and choose the correct option. [U] / [CO3]

Statement I: Dynamic layouts (flexible zones and reconfigurable racking) are especially beneficial where product mix and volume vary seasonally.
Statement II: Grid layouts are widely used in e-commerce warehouses because they allow systematic zoning and shorter picking routes when supported by automation.

a). Both statements are true
b). Statement I is true, and Statement II is false

c). Statement I is false, and Statement II is true
d). Both statements are false

32. Match the following: [U] / [CO4]

a. Order accuracy	i. Builds customer trust
b. Communication	ii. Real-time updates on shipments
c. Returns management	iii. Long-term loyalty
d. Personalization	iv. Flexible delivery options

a). a-i, b-ii, c-iii, d-iv b). a-ii, b-i, c-iii, d-iv

c). a-ii, b-iii, c-i, d-iv d). a-i, b-iii, c-ii, d-iv

33. Consider the following statements and choose the correct option. [U] / [CO1]
Statement 1: Automation in warehouses reduces errors and improves efficiency.
Statement 2: Human labor is no longer required in logistics operations.

a). Both statements 1 and 2 are true b). Statement 1 is true and statement 2 is false

c). Statement 1 is false and statement 2 is true d). Both statements 1 and 2 are false

34. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO2]
Assertion: Industrial trucks improve the speed and efficiency of material movement within warehouses.
Reason: Industrial trucks can store and retrieve pallets automatically without human supervision.

a). Both A and R are true, and R is the correct explanation of A b). Both A and R are true, but R is not the correct explanation of A

c). A is true, but R is false d). A is false, but R is true

35. A company has high inbound and outbound volumes and wants to minimize product travel time by keeping docks close together. Which layout should they choose? [An] / [CO3]

a). Randomized flexible layout b). L-shaped layout

c). U-shaped layout d). I-shaped (through-flow) layout

36. Arrange the carrier onboarding process in the correct sequence: 1. Performance monitoring setup 2. Rate negotiation and agreement 3. Carrier evaluation and qualification 4. System integration and testing 5. Contract execution 6. Insurance and compliance verification [U] / [CO4]

a). 3 → 6 → 2 → 5 → 4 → 1 b). 1 → 6 → 2 → 5 → 4 → 3

c). 3 → 2 → 6 → 5 → 4 → 1 d). 3 → 6 → 1 → 4 → 5→ 2

37. Consider the following statements and choose the correct option. [U] / [CO1]
Statement 1: Containerization revolutionized logistics in the mid-20th century.
Statement 2: Containerization refers to the use of standard containers for efficient transportation.

a). Both statements 1 and 2 are true b). Statement 1 is true and statement 2 is false

c). Statement 1 is false and statement 2 is true d). Both statements 1 and 2 are false

38. A truckload of goods arrives at a warehouse and is immediately sorted and transferred onto outbound trucks without being stored. Which warehouse process is being applied? [K] / [CO3]

a). Order picking b). Cross-docking

c). Put-away d). Cycle counting

39. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO1]
Assertion (A): Green logistics initiatives can be applied to outbound logistics.
Reason (R): Optimized routes and eco-friendly packaging reduce environmental impact.

a). Both A and R are true, and R is the correct explanation of A b). Both A and R are true, but R is not the correct explanation of A

c). A is true, but R is false d). A is false, but R is true

40. Choose the correct statement from the following: [U] / [CO3]
Statement I: Flexibility in warehouse design supports scalability.
Statement II: Scalability means adapting to future growth and demand changes.

a). Both statements are true b). Statement I is true, and Statement II is false

c). Statement I is false, and Statement II is true d). Both statements are false

41. A logistics company notices unusual duplicate invoices from a supplier. AI flags this transaction as suspicious using anomaly detection. [An] / [CO4]
This represents:

a). Predictive maintenance b). Supplier management

c). Fraud detection d). Inventory replenishment

42. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO1]
Assertion(A): Ocean freight is more economical than air freight for bulk shipments.
Reason(R): Sea transport has higher cargo capacity and lower cost per unit.

a). Both A and R are true and R is the correct explanation of A

b). Both A and R are true, but R is not the correct explanation of A

c). A is true but R is false

d). A is false but R is true

43. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO4]
Assertion (A): Automated inventory management systems reduce human error in stock tracking.
Reason (R): Manual data entry is prone to mistakes and inconsistencies

a). Both A and R are true, and R is the correct explanation of A

b). Both A and R are true, but R is not the correct explanation of A

c). A is true, but R is false

d). A is false, but R is true

44. Consider the following statements: Assertion (A) and Reason (R). Choose the correct alternative. [U] / [CO1]
Assertion (A): Third-Party Logistics (3PL) providers are often used in outbound logistics.
Reason (R): Outsourcing distribution reduces the need for in-house logistics infrastructure.

a). Both A and R are true, and R is the correct explanation of A

b). Both A and R are true, but R is not the correct explanation of A

c). A is true, but R is false

d). A is false, but R is true

45. In India, warehouse receipts can be used for: [U] / [CO3]

a). Loan collateral

b). Tax rebates

c). Insurance settlement only

d). Brand valuation

46. The gravity principle in material handling refers to: [U] / [CO2]

a). Increasing labor dependency

b). Using gravity to move materials and reduce power consumption

c). Moving materials only upwards

d). Selecting equipment based on material weight

47. Consider the following statements and state which of the statements are true. [U] / [CO2]
Statement (1): The term "tertiary packaging" refers to the individual package that is in direct contact with the product.
Statement (2): A pallet containing multiple boxes of goods ready for shipping is an example of tertiary packaging.
Statement (3): Tertiary packaging primarily focuses on protecting the product during transit and handling.
Statement (4): The main purpose of tertiary packaging is to be appealing to the final consumer.

a). (1), (2), and (3) only

b). (2) and (3) only

c). (2), (3), and (4) only

d). (1) and (4) only

48. Which of the following examples reflects a people-oriented security concern rather than asset-oriented? [U] / [CO3]

a). Preventing forklift collisions in aisles

b). Restricting entry to the bonded warehouse

c). Installing RFID tags on cartons

d). Securing locks on storage racks

49. Consider the following statements about the objectives of packaging and state which are correct. [U] / [CO2]
Statement (1): Packaging aids in handling and transportation by reducing manual effort.
Statement (2): Unitisation helps in space optimisation and bulk movement.
Statement (3): Apportionment ensures portion control and ease of sale.
Statement (4): Sustainability in packaging has no relation to cost reduction.

a). (1), (2), and (3) only

b). (2), (3), and (4) only

c). (1) and (4) only

d). (1), (3), and (4) only

[2x25 = 50]
