MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) Regular EXAMINATION October 2025

Third SEMESTER

Discipline Specific Elective (DSE) - MG3DSEFSQ202 - PRE-REQUISITES IN FOOD INDUSTRY

(2024 ADMISSION ONWARDS)

Duration: 2 Hours **Maximum Marks: 70**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

MCQ

Answer all questions

Each question carries **1** marks

1. Use in potable water in food preparation by street vendors is a requirement of: [U] / [CO1]

   a). Packaging and labelling regulations

   b). Food recall guidelines

   c). FSSAI Schedule 4 Part 1

   d). Food Safety Management System

2. Proper stock rotation during food distribution ensures [U] / [CO2]

   a). FIFO and FEFO principles are followed

   b). Expired products used first

   c). Materials are stored without labelling

   d). Quality check are skipped

3. Select the international standard requires proper audit documentation and records in food industry [U] / [CO3]

   a). ISO 9001

   b). ISO 45001

c). ISO 14000 d). ISO 22000/HACCP

4. Select the material which is most suitabe for meat contact surfaces [A] / [CO4]

a). Wood b). Stainless steel

c). Painted iron d). Plastic sheets

5. HACCP implementation without prerequisites programs become ineffective. [U] / [CO1]

a). It requires few documents b). PRPs increase production speed

c). HACCP verifies PRPs d). PRPs manage general hazards such as sanitation, pest control, layout, and hygiene

6. FSSAI requires potable water in food premises to be: [U] / [CO1]

a). Any available supply used after boiling b). Taken directly from municipal drains if filtered

c). From an approved source, meeting BIS standards d). Free from contaminants and meeting BIS standards

7. In cold storage of food products, maintaining and appropriate temparature range ensures: [U] / [CO2]

a). Faster cooking times b). Increased product shelf life and safety

c). Higher advertising expenses d). Lower supplier cost

8. A supervisor in the food industry should primarily focus on : [U] / [CO3]

a). Training workers on hygiene and safety b). Ignoring workplace hazards

c). Reducing employee communication d). Overlooking standard procedure

9. Select from options,which is NOT a sanitary requirement for milk storage [U] / [CO4]

a). Tanks should be regularly cleaned and sanitized b). Use of potable water for cleaning

c). Properly sealed lids to avoid contamination d). Storing milk directly on the floor in open vessels

10. The placement of insect light traps in food premises should : [U] / [CO3]

a). Near open food process areas
b). At entry points and near waste areas
c). Inside cold storage only
d). Under water pipes

11. An ideal location for a food establishment is one that: [U] / [CO1]

a). Is adjacent to sewage lines for easy disposal
b). Avoids contamination sources like drains and waste areas
c). Shares premises with chemical industries
d). Allows rainwater to accumulate near entrances

12. Proximate analysis in food testing includes estimation of : [U] / [CO3]

a). Protien,fat ,carbohydrate,moisture and ash
b). Only vitamins and minerals
c). Only flavor and texture
d). Packaging quality

13. Personal hygiene is food handlers is important for: [U] / [CO3]

a). Prevention contamination during food handling and processing
b). Reducing cleaning efforts
c). Lowering packaging cost
d). Avoid product labelling

14. Select the key requirement for personal hygiene of food handlers in catering establishment [A] / [CO4]

a). Wearing ornaments while cooking
b). Using clean protective clothing
c). Smoking in food processing area
d). Using strong perfumes in kitchen

15. Storage area in food establishments must be: [U] / [CO1]

a). Clean, dry, well- ventilated, and protected from pests
b). Rndom storage of raw material
c). Dark, poorly ventilated, and moist
d). Shared with chemical storage for convenience

16. Tracebility in prerequisites programs help in: [U] / [CO1]

a). Identifying the source of raw materials and finished products
b). Increasing food price

c). Reducing marketing costs d). Avoiding export certification

17. The proper method to prevent nail-related contamination during food preparation is: [U] / [CO3]

a). Keeping nails long and painted b). Keeping nails short clean and unpolished

c). Wearing nail extension d). Using artificial colours on nails

18. The primary source of liquid food processing units include : [U] / [CO3]

a). Raw materials using washing equipment b). packaging material disposal

c). Expired canned products d). Transportation leakage

19. Select from the option .Which type of flooring is required in a meat processing unit: [A] / [CO4]

a). Wooden and porous b). Carpeted for comfort

c). Smooth,washable and non-absorbent d). Mud flooring

20. According to FSSAI Schedule 4 Part 3,waste from food processing units should be: [U] / [CO4]

a). Thrown outside the factory b). Stored indefinitely inside

c). Collected,stored and disposed safely d). Mixed with finished products

[1x20 = 20]

Part B

Short Answer

Answer any **6** questions

Each question carries **5** marks

21. Describe the personal hygiene practices that street food handlers must follow to prevent food contamination. [U] / [CO1]

22. Explain the role of proper sealing techniques in maintaining the safety and quality of packaged food products. [U] / [CO2]

23. Describe the role of regular inspection and preventive maintainance schedules in ensuring hygienic premises in the food industry [U] / [CO3]

24. Write a short note on sanitation practices under GMP [A] / [CO4]

25. Explain the importance of monitoring water quality and sanitation in food processing environment [U] / [CO2]

26. Discuss the role FSSAI and license number in maintaining consumer confidence in India [A] / [CO4]

27. Describe the importance of proper procurement of raw materials as a prerequisite for unit operations in the food industry. [U] / [CO2]

28. Explain briefily solid waste management [U] / [CO3]

[5x6 = 30]

Part C

Essay

Answer any **2** questions

Each question carries **10** marks

29. Explain in detail about,how can visitor becme a source of contamination in food premises.give examples [A] / [CO4]

30. Discuss the importance of designing food premises to allow easy cleaning and maintenance. [U] / [CO1]

31. Discuss the significance of using smooth, washable surfaces in food equipment and containers. [U] / [CO1]

32. Discuss the role of management in implimenting Good Manufacturing Practices(GMP) and food safety [U] / [CO3]

[10x2 = 20]
