Name : .....

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) Regular EXAMINATION October 2025

Third SEMESTER

Value Addition Course (VAC) - MG3VACMBG201 - SENSORY EVALUATION OF FOODS

(2024 ADMISSION ONWARDS)

Duration: 1 Hour 30 Minutes **Maximum Marks: 50**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple Choice Questions

Answer all questions

Each question carries **1** marks

1. Which of the following is a crunchy food? [U] / [CO1]
   a). Bread b). Carrots
   c). Custard d). Pudding

2. Viscosity or thickness in soups and sauces is related to: [U] / [CO2]
   a). Flavour b). Gloss
   c). Texture d). Colour

3. Why are standardized scorecards used during evaluation? [K] / [CO2]
   a). To provide uniform guidance for assessing specific quality attributes
   b). To calculate scores automatically
   c). To reduce the need for briefing
   d). To record only the names of panelists

4. How many samples are presented at a time in a Paired Comparison Test? [K] / [CO3]
   a). One b). Two
   c). Three d). Four

5. Three coded soup samples are given to a panellist; two are same and one is different. The panellist must spot the odd one. Identify this test method. [U] / [CO3]

a). Paired Comparison test b). Triangle test

c). Ranking test d). Rating test

6. How many panel members are usually involved in Flavour Profile Analysis? [K] / [CO3]

a). 2 to 3 b). 4 to 5

c). 6 to 9 d). 8 to 10

7. Which of the following is called Quantitative Descriptive Analysis? [K] / [CO3]

a). Stimulus detection threshold b). Food action scale

c). Category scaling d). Free-choice profiling

8. Which of the following correctly defines stimulus detection threshold? [K] / [CO3]

a). Minimum concentration at which stimulus is correctly identified

b). Minimum concentration at which a stimulus is noticed

c). Maximum concentration at which a substance is identified

d). Maximum concentration at which a substance is undetectable

9. A panellist selects the statement ‘I would eat this only if I had no choice' on food action scale rating. What does this indicate? [K] / [CO4]

a). Neutral opinion b). Strong rejection

c). High acceptance d). Confusion

10. What does the term 'hedonic' mean in the context of sensory evaluation? [K] / [CO4]

a). Chemical reaction

b). Preference measurement

c). Pleasure-related response

d). Taste blindness

[1x10 = 10]

Part B

Fill in the blanks questions

Answer all questions

Each question carries **1** marks

11. Smell and taste together make up the _____ factors of food. [U] / [CO1]

12. _____ difference from control denotes the absolute difference or magnitude of difference of a test sample from the control. [U] / [CO3]

13. Smelling is performed using a series of _____, rather than one long inhalation. [U] / [CO2]

14. Individual small cubicles provided for panellists in the sensory laboratory are called _____. [U] / [CO2]

15. _____ tests are used to evaluate the acceptance or preference of a product by the consumer. [U] / [CO4]

[1x5 = 5]

Part C

True or false questions

Answer all questions

Each question carries **1** marks

16. The sweetness of sugar is a textural factor of food. [K] / [CO1]

17. Candidates with fixed eating habits and strong food preferences make ideal panel members. [U] / [CO2]

18. Duo-Trio test is a kind of difference test. [K] / [CO3]

19. Analytical tests are performed by untrained consumers to evaluate personal preferences. [K] / [CO3]

20. Only experimental products can be compared in a paired-performance test, not standard products. [K] / [CO4]

[1x5 = 5]

Part D

One word answer questions

Answer all questions

Each question carries **1** marks

21. Indicate the factors affecting food acceptance. [U] / [CO2]

22. What do you mean by appearance factors? [K] / [CO1]

23. What kind of instructions should be given to the panellists during panel briefing? [K] / [CO2]

24. How does the panellist record results in a ranking test when presented with samples differing in sensory attributes? [K] / [CO3]

25. Indicate the test where the panellists assign ranks to the samples in the order of their preference. [K] / [CO4]

[1x5 = 5]

Part E

Short answer questions

Answer any **5** questions

Each question carries **2** marks

26.	Explain flavour factors. Why are they important in food acceptance?	[U] / [CO2]
27.	What are the qualifications required for panellists in sensory evaluation?	[U] / [CO2]
28.	Explain how inadequate air-flow can affect the sensory evaluation of foods.	[U] / [CO2]
29.	Explain the purpose of estimating scalar difference between test and control samples.	[U] / [CO3]
30.	You are given three juice samples: J128, M442, and R315. Note that two of the samples J128 and M442, are identical and R315 is different. Draw a scorecard for triangle test and indicate the results on it.	[A] / [CO3]
31.	Discuss category scaling and ratio scaling in the context of sensory evaluation.	[U] / [CO3]
32.	You are given a cookie sample labeled 'M483'. Draw a hedonic scale scorecard and indicate that the sample was not liked at all.	[A] / [CO4]
33.	List out and explain the key responsibilities of a beer sommelier.	[K] / [CO4]

[2x5 = 10]

Part F

Long answer questions

Answer any **3** questions

Each question carries **5** marks

34.	Distinguish between trained panel and untrained panel indicating their roles in sensory evaluation.	[U] / [CO2]
35.	Describe in detail the essential components of a sensory evaluation facility.	[U] / [CO2]
36.	Write a sample scorecard for a triangle test and explain how the test is conducted.	[U] / [CO3]
37.	Compare flavour profile analysis with texture profile analysis in the attribute rating technique.	[U] / [CO3]
38.	Discuss the significance of hedonic rating scale in sensory evaluation.	[U] / [CO4]

[5x3 = 15]
