ANSWER KEY

QP CODE: 25900579

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) Regular EXAMINATION October 2025

THIRD SEMESTER

Discipline Specific Core Course (DSC) - MG3DSCPOL201, Discipline Specific Elective (DSE)-MG3DSEPJM200

INTRODUCTION TO INTERNATIONAL RELATIONS

(2024 ADMISSION ONWARDS)

PART A

1. Liberalism and Nationalism

2. Creoles were people of European/mainly Spanish descent born in the colonies of Latin America.

3. Holy Roman Empire

4. MNCs exploit cheap labour and natural resources/causing economic dependency and inequality in developing nations.

5. Sovereign States

6. States/ Sovereign Governments

7. National Identity/Shared Values

8. Techno-Nationalism/Geopolitical Technological Rivalry

9. International Atomic Energy Agency (IAEA)

10. The Horn of Africa/especially Somalia and neighbouring regions such as Kenya and Ethiopia

PART B

11. Bretton Woods system (1944) established postwar global economic order- creating the IMF and World Bank to ensure monetary stability, fixed exchange rates pegged to the U.S. dollar, and promote international trade and reconstruction after World War II.

12. Principle of collective security means that an attack on one state is considered an attack on all, requiring joint action to preserve peace—seen in institutions like the League of Nations and the United Nations.

13. Debates between Traditionalists and the Behaviouralists-methodologies of traditionalism versus scientism-the former believed a historical and interpretive approach was necessary to understand the complexity of world politics- the later promoted scientific, empirical, and quantitative methods—surveys, statistical analysis, and hypothesis testing—to make International Relations more objective, predictive, and systematic, moving away from normative or historical approaches.

14. World War I's devastation spurred efforts to understand and prevent future wars, leading to the academic study of International Relations emphasizing peace, diplomacy, and institutions—exemplified by the founding of the first IR chair at Aberystwyth in 1919.

15. Realism, rooted in Hobbes, views human nature as self-interested and conflictual, prioritizing power and survival-Liberalism, inspired by Kant, stresses cooperation, moral progress, and institutions to achieve perpetual peace through collective action and mutual interdependence.

16. Neoliberalism views globalization as a process driven by market liberalization, free trade, and deregulation- enhancing efficiency and global interdependence-frames globalization as inevitable and beneficial through integration of economies and minimal state intervention.

17. G20 is a forum of major economies—both developed and emerging—that coordinates global economic policy-reflects multipolarity by including diverse powers like China, India, and Brazil- reducing dominance of Western-led institutions like the G7.

18.Kenneth Waltz identified three levels of analysis for the causes of war- individual (human nature, leaders), state (regime type, nationalism), and systemic (anarchic international structure)-each level explains different dynamics influencing conflict and cooperation.

19. Copenhagen School defines five security sectors—military, political, economic, societal, and environmental-these sectors highlight how threats can extend beyond armed conflict to identity, stability, resources, and ecological sustainability, broadening the concept of security.

20. North–South divide in sustainable development debates reflects inequalities where the Global North emphasizes environmental protection, while the South prioritizes economic growth and equity- underscores tensions between development needs and global ecological responsibility.

PART C

21. UN Charter upholds state sovereignty through principles of equality and non-interference while balancing it with collective security- Chapters VI and VII-allows the Security Council to take collective action against threats to peace, emphasizing cooperation without permanently undermining national independence or self-determination.

22. Neo-Liberalism redefines states as cooperative actors operating within institutional frameworks-through institutionalism, it stresses that international organizations like the WTO, IMF, and UN reduce anarchy by creating rules, transparency, and interdependence-States pursue mutual gains through economic and political cooperation rather than solely maximizing power or self-interest.

23. Polycentricity in IR evolved from a state-centric to a multi-actor concept- recognizing multiple centres of authority—states, organizations, corporations, and networks- highlights the diffusion of power in global governance, where decision-making is shared across levels, reflecting the rise of complex interdependence and multipolar world dynamics.

24. Brundtland definition of sustainable development emphasizes meeting present needs without compromising future generations' ability to meet theirs-integrates three principles—economic growth, social equity, and environmental protection—promoting intergenerational justice, resource conservation, and sustainable global partnerships for balanced human and ecological well-being.
