(4x8=32)

Section D- Case Study/ Situation Analysis

Answer any **1** question that carries **25** marks.

22. "Mystic Chai" is a traditional tea company with a rich 50-year history. While their product is premium and ethically sourced, their digital presence is outdated. They currently post static photos once a month on Facebook, a platform where their current audience is primarily aged 45+. To survive, they must modernize and attract a younger audience (Ages 18–34) who value sustainability and brand stories.

    A) Identify the primary platform that appeals to the 18–34 age group and specialises in "Visual + trends" and explain why your choice of social media platform is a better fit for this brand's new focus on "Visual Storytelling" compared to their current Facebook strategy.

    B) Suggest a few SMM strategies suitable for the company. And validate your choice of strategies.

    C) Suggest two specific Brand Mnemonics that Mystic Chai can use to ensure their content is instantly recognisable to the 18–34 audience. ***(CO2, An)***

23. Axis Bank has increasingly adopted digital platforms such as social media, mobile apps, email marketing, and online advertising to communicate with customers. In recent years, the bank launched digital campaigns focusing on financial awareness, mental well-being, and responsible money management rather than aggressive product selling. Campaigns such as #PauseThePressure encouraged customers to slow down, reflect on financial decisions, and prioritise mental health. At the same time, Axis Bank uses personalised digital communication based on customer data to promote banking products and services. This raises ethical concerns related to data privacy, consent, transparency, and emotional influence in financial marketing. The case highlights the ethical balance between persuasive digital marketing and responsible brand communication in the financial services sector.

    As a digital marketing analyst, critically evaluate Axis Bank's digital marketing and brand communication practices from an ethical perspective. Your answer should cover:

    a) Ethical principles reflected in Axis Bank's digital campaigns.
    b) Role of empathy and social responsibility in financial brand communication.
    c) Ethical issues related to personalisation and use of customer data.
    d) Impact of ethical digital communication on consumer trust and brand reputation.
    e) Recommendations for strengthening ethical practices in digital marketing for financial institutions. ***(CO4, An)***
