QP CODE: 24900151

FIRST SEMESTER MGU-UGP (HONOURS) REGULAR EXAMINATION
NOVEMBER 2024
First Semester
Discipline Specific Core Course -MG1DSCPJM 101,
MG1DSCJMC100 - INTRODUCTION TO COMMUNICATION

Duration: 2 Hours Maximum Marks: 70

Part A Multiple Choice Questions

Answer all questions.
Each question carries 1 mark

1. c) Latin [U] [1]
2. d) Sender, message, channel, receiver, feedback [U] [1]
3. a) Social interaction [U] [1]
4. a) Feedback is the response sent by the receiver back to the sender [U] [2]
5. c) Siebert, Peterson, and Schramm [U] [2]
6. b) The emotional flavor or essence evoked in an audience [U] [3]
7. a) Daniel Bell [U] [3]
8. a) Signs and symbols and their use or interpretation [U] [3]
9. c) The difference in access to and use of information technologies among different social groups [U] [4]
10. d) Theodore Newcomb [U] [3]

(10x1=10)

Part B Short Answer Type Questions

Answer any ten questions.
Each question carries 3 marks

11. Two-Step Flow Theory in Social Media Era: [An] [3]

- Relevance: Social media influencers act as opinion leaders.
- Influence: They interpret information and shape followers' views.
- Spread: Information flows from media to influencers, then to the wider audience.

12. Role of Opinion Leaders: [An] [3]

- Influence Perceptions: Opinion leaders interpret and disseminate information.
- Trust: They are trusted sources within their communities.
- Impact: Shape public opinions and attitudes towards various issues.

13. Limitations of Linear Model of Communication: [U] [2]

- No Feedback: One-way communication without interaction.
- Simplistic: Ignores context, noise, and complexity of communication.
- Static: Does not account for the dynamic nature of communication processes. [An] [3]

14. Cultivation Theory Effects:

- Perception: Long-term TV exposure shapes viewers' perceptions of reality.

[U] [4]

- Mean World Syndrome: Heavy viewers may see the world as more dangerous.
- Normalization: Repeated themes and images become normalized in viewers' minds.

15. Syntagmatic and Paradigmatic Relations:

- Syntagmatic: Linear combinations of signs (e.g., sentence structure).
- Paradigmatic: Choices among related signs (e.g., synonyms).
- Meaning: Both relations shape the meaning of signs in language and media.

[E] [4]

16. Saussure's Semiotic Theory Application:

- Signifier and Signified: Study of how signs (words, images) create meaning.
- Language: Analyzing how language constructs reality.
- Cultural Analysis: Understanding cultural symbols and their meanings.

[U] [1]

17. Levels of Communication:

- Intrapersonal: Self-talk and internal dialogue.
- Interpersonal: One-on-one communication, personal interactions.
- Group: Small group discussions, team communication.
- Public: Addressing large audiences, public speaking.
- Mass: Media communication to large audiences (TV, radio, internet).

[U] [2]

18. Berlo's SMCR Model:

- Source: The originator of the message.
- Message: The content being communicated.
- Channel: The medium used to send the message.
- Receiver: The audience or recipient of the message.
- (with model structure)

[U] [2]

19. Johari Window:

- Open Area: Known to self and others.
- Hidden Area: Known to self but not to others.
- Blind Area: Known to others but not to self.
- Unknown Area: Unknown to both self and others. (with structure)

20. McLuhan’s Global Village: [An] [3]

- Concept: Predicts global interconnectedness through electronic media.
- Impact: Shrinking of geographical barriers.
- Social Media: Anticipates the interconnected nature of the internet and social media.

[E] [3]

21. Marxist Theory of Ideology:

- Critique: Media serves capitalist interests.
- Objectivity: News perceived as neutral may actually reinforce power structures.
- Power Dynamics: Examines how media maintains dominant ideologies.

[E] [4]

22. Cultural Hegemony:

- Media's Role: Reinforces dominant ideologies.
- Status Quo: Maintains societal norms and capitalist structures.
- Ideological Control: Media shapes public consciousness to align with ruling class interests.

(10 × 3 = 30)

Part C Essay Type Questions

Answer any two questions.
Each question carries 15 marks

23. Hypodermic Needle Theory vs. Uses and Gratifications Theory: [An] [3]

The Hypodermic Needle Theory posits that media messages are injected directly into the passive audience, leading to immediate and uniform effects. It suggests that the audience is easily influenced and manipulated by the media. In contrast, the Uses and Gratifications Theory views the audience as active participants who selectively use media to fulfill their needs and desires. This theory emphasizes the individual's role in interpreting and integrating media content based on personal preferences. While the Hypodermic Needle Theory assumes a direct and powerful media influence, the Uses and Gratifications Theory recognizes the audience's active engagement and varied responses to media messages. [U] [1]

24. Elements and Process of Communication:

Communication involves several key elements: sender, message, channel, receiver, feedback, noise, and context. The sender initiates the communication by encoding and transmitting the message through a selected channel. The message is the content being conveyed, while the channel refers to the medium used, such as speech, writing, or digital media. The receiver decodes and interprets the message, and feedback is the receiver's response, which can indicate understanding or need for clarification. Noise includes any interference that may distort the message. Context encompasses the environment and circumstances that influence the communication process. Each element contributes to the effectiveness and clarity of message delivery. (can add the diagram of the process of communication) [An] [4]

25. Role of Communication Technologies in Knowledge Economy:

Communication technologies play a pivotal role in the knowledge economy by facilitating the creation, dissemination, and utilization of information. They enable seamless communication and collaboration across geographic boundaries, enhancing productivity and innovation. Technologies such as the internet, email, video conferencing, and social media platforms allow for the rapid exchange of knowledge and ideas. These tools support distance learning, telecommuting, and online collaboration, making information more accessible and enhancing decision-making processes. [An] [2]

Additionally, data analytics and artificial intelligence contribute to managing and analyzing vast amounts of information, driving growth and competitiveness in the knowledge economy.

26. Relevance of Normative Theories of Media:

Normative theories of media, such as Authoritarian, Libertarian, Social Responsibility, and Development Media theories, provide frameworks for understanding the role and function of media in society. The Authoritarian theory emphasizes media control by the state, whereas the Libertarian theory advocates for free press and minimal government intervention. The Social Responsibility theory highlights media's duty to serve the public good, ensuring ethical standards and accountability. Development Media theory focuses on using media to support national development and social change. These theories remain relevant as they guide media practices, policy-making, and the balance between freedom and responsibility in media operations, reflecting different socio-political contexts and challenges.
