Handle: A system of persistent identifiers used to uniquely identify digital objects, commonly employed in institutional repositories. (CO 3)

Marking:

a. Any 2 of the above is written Full Mark b. Any related idea Half Mark c. Any attempt 2/5 Mark

15.

Connecting Researchers: Provides platforms for researchers to find and connect with peers globally. Sharing Research: Allows easy sharing of research outputs, papers, and data with colleagues and the wider community.
Networking Opportunities: Facilitates discussions, collaborations, and networking events for joint research initiatives.
Idea Exchange: Enables researchers to exchange ideas, ask questions, and discuss ongoing research projects.
Collaborative Tools: Offers tools for document sharing, project management, and co-authoring papers. Visibility and Impact: Increases the visibility of researchers' work, leading to more opportunities for collaboration.
Access to Expertise: Helps identify experts in specific fields for potential collaboration and mentorship. Research Groups: Provides spaces for researchers to join or form groups focused on specific research topics.
Funding Opportunities: Shares information about grants, fellowships, and funding sources for collaborative projects.
Cross-Disciplinary Collaboration: Promotes collaboration across different fields and disciplines to foster innovative research. (CO 2)

Marking:

a. Any 2-3 of the above is written Full Mark
b. Any related idea Half Mark c. Any attempt 2/5 Mark

PART – C (10 MARK QUESTIONS)

(Two questions out of 3 shall attend)

16. Any attempt shall give maximum mark. The cognitive domain of this term in syllabus is, up to apply level (A). The question shows Understand level (U). But the question ation word “compare” shows it is an Analysis level question. Whatever may be the CO, the question is beyond the scope of the

syllabus. So, it shall be considered as the student have attained CO4 as expected by this question.

(CO 4)

17. Ancient Libraries: Early libraries focused on the preservation and storage of knowledge, typically housed in temples or palaces, such as the Library of Alexandria.

Medieval Libraries: Libraries during the middle Ages were mainly monastic, preserving religious and classical texts through hand-copying manuscripts.

Renaissance Libraries: Marked by the rise of humanism, these libraries began to collect a wider range of texts, including secular knowledge, and were often privately owned or in royal courts.

Public Libraries: In the 17th and 18th centuries, public libraries began to emerge, making knowledge more accessible to the general public and democratizing learning.

Academic and Research Libraries: These libraries evolved to support scholarly research and academic education, focusing on specialized collections, journals, and databases.
Modern Libraries: Today, libraries support various functions, including digital access to resources, community services, information literacy, and research collaboration.

Digital Libraries: With the advent of the internet and technology, libraries have transformed into digital spaces, providing access to e-books, databases, and digital archives.

Library as a Community Hub: Libraries have increasingly become centers for social and cultural activities, offering spaces for learning, collaboration, and civic engagement.

Specialized Libraries: Libraries serving specific industries or interests, such as law libraries, medical libraries, and corporate libraries, evolved to meet the needs of specialized communities.

Virtual Libraries: Fully online libraries that provide resources and services without a physical space, catering to global access via the web. (CO 1)

Marking:

a. Any 5-6 of the above is written Full Mark
b. Any related idea Half Mark c. Any attempt 3/10 Mark

18. Marking: Explain Zotero 2 marks
Explain Cloud Storage Solutions 2 marks
Integration of Zotero with Cloud storage solutions 6 Marks (CO 6)

******END OF THE SCHEME**
