20. Sovereignty ensures a state's autonomy and authority, distinguishing it from political entities like non-governmental organisations, or international organizations, which may share or lack such powers. [Correct CO: 2 Taxonomy: Understand (U)]

PART-C

21. Kerala's history of land struggles, especially recent Adivasi-led standing protests, highlights the urgent need for equitable land redistribution-these protests advocate for the restoration of Adivasi land and recognition of their traditional rights- it should inspire new policy models that emphasize inclusive land reform, acknowledging historical injustices and addressing long-standing socio-economic disparities-such governance models would prioritize community-based resources, environmental sustainability, and genuine participatory processes. [Correct CO:4 Taxonomy: Apply(A)]

22. Globalization has transformed national governance by promoting economic and technological integration, influencing policy-making, and increasing international cooperation-national governments now engage in a complex web of global markets, transnational organizations, geo-economic policies-this shift has led to the adoption of market-driven

reforms, regulatory changes, and global governance practices, often challenging traditional conceptions of sovereignty. [Correct CO:1 Taxonomy: Understand (U)]

23. Opined by Harold Laski- for Laski, men enjoy rights not merely as members of the state, but also as members of the society and various associations and relationships in society- the material source of rights is the community's sense of justice and not the law-Laski emphasized that individual rights are fundamental for personal growth and well-being-without rights, individuals cannot fully express themselves, participate in society, or achieve their potential, limiting both their personal fulfilment and their contribution to the community-for Laski, rights were not just legal entitlements but essential conditions for the flourishing of both individuals and society [Correct CO:2]

24. Political science evolved as a distinct field of study from philosophy, focusing on the analysis of political institutions, behaviour, and governance-initially dominated by political theory-expanded in the 19th and 20th centuries with the development of empirical methods and comparative politics-the rise of Behaviouralism, quantitative research, and interdisciplinary approaches solidified its status as a separate discipline, engaging with sociology, economics, and history to understand power dynamics, state functions, and citizen behaviour-Post-Behaviouralism played a significant role in reconciling facts and values concerning politics-new methodologies and theoretical perspectives- today, the discipline addresses technology, climate issues, gender, migration, and transnational governance systems etc. [Correct CO:1 Taxonomy: Remember(K)]
